LEUPOLD®

© 2003 Leupold & Stevens, Inc.

We stake our integrity on one shot. Yours.

Let's face it. Our engineers aren't out on the range training every day, in every condition for that single, important shot. You are. Which is why we teamed with professionals like you to develop the new Nikon Tactical 2.5-10x44 and 4-16x50. After countless hours listening to what you wanted and needed in mid- and long-range tactical riflescopes, we developed two all-new designs which you tested and retested.

In the end, it took several years and more than a few prototypes, but with hard work, determination and your help, we finally hit our mark. And most important, so will you.

Nikon's new Tactical Riflescopes

- **Internal Adjustments.** 2.5-10x44 includes precise, repeatable 1/4 MOA adjustments with a full 85 total MOA internal travel. 4-16x50 includes 1/4 MOA adjustments with 50 total MOA internal travel.
- **Mildot Reticle.** Glass etched for the ultimate in ruggedness. Placed on rear focal plane to maximize low light viewing.
- **High Resolution, Fully Multicoated Optics.** Sharp to all edges. Maximum light transmission (95%).
- **30mm Body Tube.** Encases full-size internal optics. Internal blackening to eliminate glare. Heavy-walled for toughness, durability and dependability.
- **Fully Waterproof, Fogproof and Shockproof.**
- **Includes Sunshade and Butler Creek® "Flip-Up" Scope Covers.**

- 6692 2.5-10x44 Mildot
- 6690 2.5-10x44 Nikoplex
- 6694 2.5-10x44 Dual Illuminated Mildot
- 6696 4-16x50 Mildot
- 6698 4-16x50 Nikoplex

The trusted name in optics.™ Nikon

42-2104M Elite® 4200: 2.5-10 x40 Matte Black
Featuring Patented Rainguard® Technology | 100% Waterproof

★★★ ELITE 4200 ★★★

PACKING OUT AN ELK A QUARTER AT A TIME IS NO WALK IN THE PARK.

BUT IT'S A HELL OF A LOT BETTER THAN PACKING OUT SOMEONE ELSE'S ELK.

Every hunter alive knows the load is a lot lighter when it's your tag. That's why more and more hunters are carrying the Elite® 4200 Riflescope. The one-piece aluminum and titanium alloy tube is hammer-forged and precision-machined offering unprecedented strength. Fully multi-coated optics and maximum light transmission make the Elite 4200 the brightest scope in the world. And our exclusive Rainguard® technology means they're 100% waterproof and fogproof inside and out. If a finer riflescope exists it certainly hasn't presented itself. Remember to at least thank your buddy with a couple tenderloins.

RAINGUARD®

Bushnell®

Magnify Life.

INDEX

MESSAGE FROM THE PRESIDENT

Thank you for taking the time to view our catalog. Inside you will find just about every scope, binocular and spotting scope made at unbeatable prices. Every item listed is in stock and can be in your hands tomorrow. Buy with confidence knowing that we have been in business for over 25 years and have a very qualified expert staff to assist with any questions you may have. Every product is backed by a manufacturers warranty as well as our famous "Hand Shake Guarantee". We are so confident that you will not find a better price that we will beat any competitors price by 110% of the difference.

S.W.F.A. Inc.'s Handshake Guarantee:
We do business based on a very simple idea. If you're not 100% satisfied with our products, or service, we'll refund you money! Just return any new or unused item to us within 10 days from the date delivered. Include a copy of your receipt, and we'll issue a refund. Shipping charges are not refundable. We can not accept returns on special orders!

110% Low Price Guarantee
If you find a lower price at any competitor's store on a new identical item, just show us the lower price when you buy the item at SWFA or within 10 days after your SWFA purchase and we'll give you 110% of the difference (up to $55.00). Our 10-day price-match guarantee is good on everything from optics to accessories. The item must be in stock and available for purchase at that price from a company (excluding wholesale or membership clubs) with a physical store location in the U.S., who is authorized by the manufacturer to sell the product.

- Item must be identical: For example, it must have the same U.S. manufacturer's warranty. It must also have the same model number and contain the same components.
- Price Verification: SWFA reserves the right to verify another company's product availability and price before issuing a price match guarantee. Computer screenshots are not acceptable as proof of a competitor's price – the lower price must be accurate and live on a competitor's site at the time of the price-match.
- Other Discounts: Available coupons and rebates will be deducted from the SWFA price to come up with a new SWFA price when calculating the price match. For example, if you buy an item from us for $100 and we offer a $10 rebate, the net price is $90. If the item is available from another company for $90 or more, there will be no price match. Another example would be if you buy an item from us for $139 and you have a $30 coupon; the net price is $109. If the item is available from another company for $105 the price match will be for $4.40 (110% of the difference).
- Shipping and handling: These charges are included when comparing our price to another company's delivery price, the equivalent shipping and handling charges will be included. If proof of the other company's shipping and handling charges are not supplied, then our standard shipping and handling charges will be added to the other company's price. For example, if you buy an item from us for $100, with $10 shipping and handling, and the item is available from another company for $90 with shipping and handling charges of $7, then the difference is $13. You would receive 110% of $13, which is $14.30.
- Special Offers: If another company offers a product that comes with a free or discounted item and SWFA does not carry the free or discounted item, there will be no price match. For example, if another company offers a free product with the purchase of a scope, and the SWFA price is equal to the company's price for the scope, there will be no price match if SWFA does not carry the free product being offered.
- Quantity Limits: We may limit the quantity of an item that may be price-matched. For example, if the other company limits the number you may buy, we may also limit the number. In addition, SWFA reserves the right to limit quantities sold to a customer.
- Exclusions: We price match almost everything. We don't price match products and services provided or sold at local or special events (e.g., grand opening, anniversary, clearance or liquidation sales), items sold at wholesale/membership clubs or products sold on Internet auction sites. We also don't price match taxes, typographical errors or any item or price that includes a rebate.

Aimpoint
Any Other Sight Is Pointless

Aimpoint red dot sights are the original red dot sights. Aimpoints have the widest field of view, are 100% parallax free, and are waterproof and shockproof. You do not have to center the dot, you hit where you aim. They are available in two dot sizes, 4 minute of angle (M.O.A.)= 4" @ 100 yds for precision shooting and 2 minute of angle = 2" @ 100 yds in the 2x versions. Aimpoints have no eye relief so they work on handguns, rifles, or shotguns.

Aimpoint's electronic reflex sights are manufactured using a unique patented double front lens which eliminates the parallax error inherent in other red dot sights. This feature allows the shooter to get on target more quickly and shoot more accurately, because the dot does not need to be centered inside the sight.

Aimpoint's both-eyes-open, heads-up display generates rapid target acquisition and unequaled accuracy. By superimposing the red dot on the target, the shooter is mentally freed from his position behind the firearm. The physical adjustments a shooter must make with his body and his firearm, adjustments which require precious time and energy, become second nature with an Aimpoint.

Aimpoints are parallax free, a result of Aimpoint's patented double-lens system. You will appreciate the confidence of knowing that with an Aimpoint, you will hit whatever is under the red dot. The dot does not have to appear in the center of your view. If the dot is on it, then you will hit it.

This concept seems impossible but if you think about it you will understand how it works. The scope has no parallax or eye relief, so it will appear that the dot is not in the center sometimes but actually the dot is always in the center. It is the way that you look through the Aimpoint that changes, unlike a conventional scope that requires that you be perfectly aligned directly behind the unit, you can look through an Aimpoint and shoot from any position and this is what makes the dot appear to "float" when actually it never leaves the center.

The U.S. Army signed a contract with Aimpoint guaranteeing the purchase of 80,000 (with the option of purchasing an additional 20,000) Aimpoint Comp M electronic reflex sights and associated mounts for the M16A2 rifle and M4A1 carbine. Aimpoint sights now become the primary aiming systems for these two military firearms.

As the choice of the U.S. Army and elite forces around the world, Aimpoint sights offer high performance, military-proven technology and rugged durability. Aimpoint's both-eyes-open, heads-up, rapid target acquisition and superior accuracy deliver unmatched precision for a variety of applications.

After 18 months of rigorous testing, only one red dot sight earns the U.S. Army's seal of approval AIMPOINT! The U.S. Army dropped, baked, froze, and submerged sights from leading manufacturers during an eighteen month testing period to determine which sight could withstand the most punishing military conditions. After outscoring the competition in both operational and developmental testing, Aimpoint sights are the only sights chosen for the U.S. Army contract. Aimpoint sights are not only the choice of the U.S. Army, but the U.S. Special Forces, the Federal Bureau of Investigations, S.W.A.T. teams, and elite military units around the world.

BSA BigCat Series Scopes

A super new scope with all the features wanted in a hunting scope: long eye relief; fully multi-coated lenses; very bright, three piece objective lens. Definitely the look of the future. The BigCat™ has a longer eye relief, a full 5 inches and finger adjustable windage and elevation knobs. The three piece objective lens system provides sharper resolution, better color and less distortion. And for extra brightness. the lenses are 14 layer, fully multi-coated. All six BigCat models are very compact and finished in Shadow Black rubber coating which eliminates reflections and glare and resists fingerprints.

- 4-5" eye relief
- Shadow Black® rubber finish
- Finger adj. windage & elevation
- Fully multi-coated optics

BSA Deer Hunter Series Scopes

The BSA Deer Hunter was designed for the hard working man that hunts the same way. He wants a quality scope that is accurate and will hold up day after day. The black textured finish on BSA DEERHUNTER scopes eliminates any bright reflections and covers the entire scope, even the turret caps. They have fully-coated optics and finger adjustable turrets for windage & elevation and one piece, 1" tube construction.
The BSA Deer Hunter model DH39X40IR has an illuminated reticle with 11 brightness settings and ocular speed focus. It has a rugged textured finish and is fog proof, waterproof and shockproof. Comes with a standard 3V lithium battery.

- Black matte textured finish
- Finger adjustable windage & elevation
- One piece 1" tube
- Fully coated optics
- Fogproof, shockproof, waterproof

BSA CatsEye Series Scopes

The BSA CATSEYE has a large objective lens and camera quality glass is used to give a clear, undistorted image. The objective and ocular lenses are fully multi-coated to provide the brightest possible view. The ocular lens has a 4" to 5" eye relief without reducing your field of view. A European style reticle not only helps you to see better in low light, but it makes quick target acquisition easier. All BSA Catseye models are made of one-piece aluminum tubing, and then covered with a Shadow Black coating. Finger adjustable windage and elevation knobs are easy to turn even when wearing cloves. Waterproof, fogproof and shockproof.

- The 4-16 and 6-24 models are 2 piece tubes.
- Shadow Black® rubber finish
- Finger adjustable windage & elevation
- Fully multi-coated optics
- European 3 post reticle
- Speed Focus ocular
- 4-5" eye relief

BSA
SPORT & RECREATIONAL OPTICS

BSA Sweet .17 Series Scopes

Designed using technology similar to the sniper trajectory compensation scopes, the Sweet 17 elevation drum increments are precisely calculated to compensate for the elliptic drop of a .17 HMR/17 grain bullet.

Simply
- Zero the scope at 100 yards
- Loosen the screws of the elevation drum
- Turn the drum until the 100 yard marking matches the elevation turret indicator
- Retighten the screws

Now you can compensate the trajectory of a bullet for any distance between 100 and 300 yards by just turning the elevation drum to the desired elevation marking.

SWFA RifleScopes.com

Ballistic Mil-Dot™
available on 4X-16X, 6X-24X, and 8X-32X

When Success is not an Option

Stunning clarity, maximum brightness, and uncompromising accuracy are generated by ultra-pure lenses, HiLume anti-reflection lens coatings, and precision-crafted mechanical designs. Side Focus parallax adjustment on high magnification scopes makes yardage adjustment fast and easily viewable. The new designs are shorter, lighter, and modestly ...quite handsome. Made to perfection in the U.S.A. and warranted forever, the mission of searching for the ideal riflescope is complete.

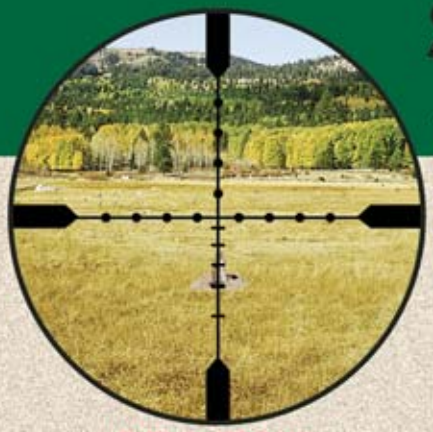
Serious About Long Distance

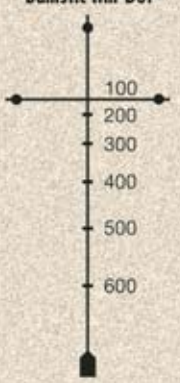
BURRIS®



Ballistic Mil-Dot™
close-up at 400 yards

Today's serious ammo and serious rifles help extend the ethical limits of long range shooting. The **Ballistic Mil-Dot™** in serious Burris scopes completes the hardware equation allowing precise holdover at all reasonable distances and then some. The left, right, and upper Mil-Dots also provide a means of rangefinding when a laser is not available.

Ballistic Mil-Dot is simple and works for almost any flat shooting cartridge -- 30 customized labels come with each scope.



Example Cartridges that calibrate for 100 to 600 yards.

Bushnell

ELITE® 4200

Bar none, it's the brightest scope in the world. Boasting 95% light transmission at 550nm, this is the top-of-the-line riflescope. The exclusive, hydrophobic Rainguard® lens coating, which disperses condensation into microscopic specks, allowing you to literally see around the moisture ensures you won't miss that trophy buck because you breathed on your eyepiece or you couldn't wipe the rain away in time. All optical lens surfaces are fully multi-coated for the absolute maximum light transmission and the sharpest image. Fingertip, audible/resettable 1/4 M.O.A. adjustments make windage and elevation tuning quick and easy. The ultra-strong one-piece tube is hammer-forged from an aluminum and titanium alloy for 30% more strength than standard aluminum scopes -and to be sure it lasts, it is recoil-tested to 10,000 rounds of a .375 H&H Magnum! Finally, the Elite® 4200 scopes offer some of the largest magnification ranges in the industry for optimum versatility in the most challenging hunting situations. In the world of big game pursuit, there are hunters - and there are serious hunters. If you consider yourself the latter, the Elite® 4200 is the scope that does justice to your commitment.

Bushnell is so proud of their BUSHNELL® ELITE® riflescopes that their materials and workmanship are warranteed to be free of defects for the life of the ELITE riflescope. The warranty is available to any owners of the ELITE riflescope. No receipt or warranty card is required. This warranty does not cover damages caused by misuse or improper handling, installation or maintenance of the riflescope.

ELITE® WITH RAINGUARD®

Introducing RainGuard™, the revolutionary new lens coating system which increases light transmission to 95% on 4200 series and is now available exclusively on Elite® Riflescopes. RainGuard™ is a special water repellent coating on which condensation forms in much smaller droplets when the scope is exposed to rain, fog or snow. These droplets result in a much clearer and more usable view. Water actually sheets off of RainGuard™ coated lenses much more readily than from a standard coating. Now, the hunter will not miss the shot of a lifetime because he accidently breathed on his scope eyepiece while aiming. At 95% light transmission, these 4200 series scopes rank the brightest in the world, which lets you see your target better in low light.

ELITE® 3200

The Elite® 3200 offers multi-coated optics for generous light transmission and crisp image quality. To prevent light distortion from moisture, the exclusive, patented Rainguard® lens coating reduces large drops of water into near-microscopic specks. Scattering far less light, their significantly smaller size results in dramatically increased light transmission and a remarkably clearer image in wet weather (including condensation from your own breath). Like the Elite 4200® the Elite 3200 riflescopes also feature ultrastrong, one-piece hammer-forged aluminum and titanium alloy tubes which are 30% stronger than standard aluminum scopes. They are also recoil-tested to 1000 rounds of a .375 H&H Magnum. With 1/4 M.O.A. fingertip, audible/resettable windage and elevation adjustments, the 3200 offers everything the most avid and discriminating hunter requires.

FireFly™ Glowing Reticle

When you see a trophy your eyes light up. Now you'll have the scope to match. Developed by Bushnell® engineers especially for the lowest light hunting situations, the new FireFly™ reticle illuminates the cross hairs after only a quick 10 second charge with a flashlight. Unlike battery-powered reticles - which often fail at the absolute worst times - the FireFly reticle will glow green and you will see your crosshairs against the animal. Look for the exciting new FireFly reticle on select models of our Elite 4200 and 3200 riflescopes. It's the pinnacle of reticle innovation.

Armament Technology INCORPORATED

ELCAN M145
OPTICAL SIGHT

The ELCAN M145 Optical Sight combines ELCAN's legendary robustness and optical brilliance with a ballistically calibrated LED-illuminated ranging reticle. Designed for application to Machine Guns and M4 Carbines, it is in wide service with the United States Army (NSN 1240-01-411-6350) and has been proven to withstand the rigors of modern combat.

The sight may be mounted to any MIL-STD-1913 receiver or base in seconds and will retain zero when removed and re-attached to the weapon. The **ELCAN M145** is built in Canada to stringent specifications and may be supplied with laser protection or special reticles required by military customers.

specterIR
Protective IR Optics by ELCAN

Introducing SpecterIR[a] by ELCAN; the first affordable thermal weapon sight designed specifically for homeland security, police and security professionals. SpecterIR uses heat imaging technology previously only available for military applications and offers true "see in-the-dark"infrared capability. Intended for hand-held or weapon mounted use, this simple-to-operate passive infrared sight can see what the human eye cannot. Darkness, rain, fog, dust and smoke are rendered completely transparent to the SpecterIR sight.

EOTech Electro-Optics Technologies

WORLD'S FIRST HOLOGRAPHIC SIGHT

The Magic of Holography

In holography, all the information required to reconstruct the reticle image is recorded everywhere in the Heads-Up display window. If the window is obstructed by mud, snow, rain, etc., the HDS remains fully operational, with point of aim/impact being maintained. Even in such extreme cases where the laminated window is shattered, the HDS is fully functional! As long as the operator can see through any portion of the window, the entire reticle pattern is visible on target...the operator can still engage with confidence.

MUD SNOW DAMAGE

HOLOgraphic Diffraction Sights (HDS)

The HDS is designed to withstand Mil-Spec drop tests and still remain fully operational and hold zero. The HDS has been extensively tested in a punishing recoil simulator generating 3,500 G's of acceleration in less than 0.5 milliseconds (the recoil of a .454 Casull revolver) as well as various environmental chambers.The Heads Up Display is constructed with a 3 layer, shatterproof laminate glass that is 3/16" thick for added durability. Additional protection of the Heads Up Display is provided with a "roll bar" ruggedized hood. The EOTech 510 and 550 series feature these Holographic sights.

EOTech 550 Military Series

- Compatible with Gen. I-IV Night Vision Systems (tandem operation)
- Includes ruggedized hood assembly and knobbed, tool-less mounting bolt
- Interfaces to standard 1" Weaver dovetail/Picatinny rail

FREE Neoprene Protective Cover w/ EOTech Purchase ($19.95 Value)

AA Battery Option

The M510 and M550 are available with the universally available AA battery source as an option. The AA option also allows interchangeability with one common battery source across all standard battery powered gear. Now operators can stock, maintain, and deploy with one common battery for CQB optic, night vision systems, GPS, flashlights, radio equipment, etc. The AA version extends the battery life to over 500 hours at the nominal daylight setting and allows operation in extreme artic temperatures. The AA models accommodate all versions of AA batteries including lithium, alkaline, and rechargeable types. The length is extended by 1.3 inches and all other functions of the HDS are maintained. Battery useage at the default brightness setting of 12 Type "N" Alkaline batteries, 70 hours of continuous use Type "AA" batteries Alkaline, 300 hours of continuous use

EOTech 510 Tactical Series

- Includes ruggedized hood assembly and knobbed, tool-less mounting bolt
- Interfaces to standard 1" Weaver dovetail/Picatinny rail

HOLOGRAPHIC WEAPON SIGHT **Speed...**

Means Survival

Firefights in close quarter environments are won by fast accurate target acquisition. Locking onto the target fast means you win. The alternative is not an option. The HOLOgraphic Weapon sight (HWS) delivers unmatched speed gains... and is the solution.

Multiple threats are a given in tactical situations. Peripheral vision is critical for threat ID and situation awareness. The HWS's tubeless, heads up display allows operators to engage with both eyes open.

Deployed with elite Special Forces and SWAT teams, the HWS features passive operation with no muzzle side signature and compatibility with all night vision systems. The HWS is waterproof, shockproof, fogproof and adapts easily to virtually any tactical weapon platform.

NEW ITEMS ADDED DAILY!

SWFA RifleScopes.com WANTS YOU!

To win your share of $10,000.00 worth of Prizes

Including the Grand Prize - a Leica Ultravid 10x42 Binocular valued at over $1,500.00

The rules are very easy making it possible for anyone to win. Basically, you take a picture that includes a product you bought from us and submit it along with a story, the best picture and story combination wins the Grand Prize. Pictures can be anything from hunts, vacation, sporting events, races, it does not matter as long as the product you purchased from us is in the picture and has relevance in the story. You must be in our data base as purchasing the product on or after Sept. 1, 2003 and most importantly that product must be in the picture you submit. Contest ends at midnight Jan. 31, 2004. Ten finalists will be named at that time. Once the ten finalists are selected the general public will begin voting Feb. 1, 2003 – Feb. 29, 2003. Places 1 -10 will be determined on the amount of votes received per finalist.

Kyle Bradford from Alaska and his Leica Binoculars.

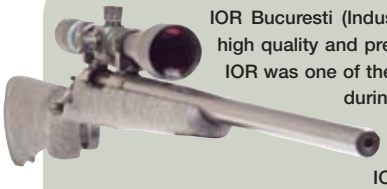
All photos will not be returned and become the property of SWFA to be used in future promotional material as desired. Winners announced February 2004.

For a complete entry form visit www.RifleScopes.com

The finalist are guaranteed one of the ten prizes that include a (1) Leica 10x42 Ultavid binoculars, (2) Burris Fullfield II 3.5-10x50 Illuminated Ballistic Plex, Burris Signature 10x50 binocular and Burris Landmark 20-60x80 spotting scope, (3) Leupold 3.5-10x40 VariX-III, Leupold 10x42 Cascades binocular and Leupold 15-45x60 Wind River Sequoia spotting scope, (4) Super Sniper 10x42 Side Focus, Super Sniper Anti-reflection device, Super Sniper sun shade and a Mil Dot Master, (5) Zeiss Conquest 3-9x40 and Zeiss Conquest 8x30 binocular, (6) Bushnell Elite 3200 5-15x40 and Bushnell Yardage Pro-Legend laser range finder, (7) Swarovski 8x30 SLC binocular, (8) Nikon 10x40 Monarch binocular and Nikon Coolpix 3100 Digital Camera , (9) Steiner 9x40 Big Horn Binocular, (10) Gamo Silver Shadow Supreme .177 air rifle with a BSA 3-12x50 air rifle scope.

the brand new Leica 10x42 Ultravid.

SWFA RifleScopes.com



IOR Bucuresti (Industry Optic Romania) has produced high quality and precision optics since the late 1800's. IOR was one of the largest suppliers of military optics during the cold war and still provides a large number of devices to various armed forces across the globe. IOR optics are bright, crisp and clear. They were standard issue to the Warsaw Pact as well as a wide variety of national forces.

I.O.R. (Romanian Optics Industry), is one of the largest and oldest factories in Europe, initially specialized in producing elite military opto-mechanical devices since 1936, products tested with great success even during W.W.II. Kept under the darkest shadow, as one of Romania's biggest secrets by the former dictator Nicolae Ceausescu, I.O.R. has developed and produced a few line of optics, rated as some of the finest in the world. During the "Cold War" years the I.O.R. products were successfully used by the Warsaw Pact Army and Navy elite troops, along with other similar products from Carl Zeiss Jena Germany.

Today, I.O.R. - as the last original optical factory of Eastern Europe - to continue their legendary existence, remains a serious and reliable supplier of optical components and assemblies for other famous European companies like: Leica, Schnider, Hensoldt, Pentacon, Fog-Gorlitz, Carl Zeiss GMBH, at the same time continuing their long time collaboration with Jaener GlassWerk GMBH from Jena - Germany.

TDS Tri-Factor Reticle System

Designed and licensed by TD Smith*. This reticle will enable any shooter, to quickly determine a straight line aim to a target corrected for distance and wind. This system, which has been tested and documented in over 2500 "One shot" harvest of wild game provides the shooter with an easy means of quickly making the sight adjustment decisions necessary to place an accurate shot on a target at ranges from 100 to 900 yards. As with any aiming device, a shooter must apply good,careful shooting technique, discipline and practice. The Benefit of the TDS Tri-factor System the TDS Tri-Factor system guides your eyes intuitively into following your body –much the same as when you point your finger at an object. Your eyes look where your finger is pointing, not the other way around. This system presents to you a dominant 9X or straight line aim to the target, depending on the model of scope selected and reduces the stress of guessing range, and holdover. GOOD HUNTING.

SSG William C. Ball (right) and SSG Kevin Q. Griffin set NC state record at qualifying match for the W.P. Wilson National Sniper Championship Match. Using Leatherwood A.R.T.-II scopes SSG Bell won first place overall in the individual match shooting 326/13x out of 375. SSG Griffin placed 2nd overall shooting 309/9x out of 375. Together they won first in the team competition with a combined score of 638/22x out of 750.

Pentax Cleaning Cloth, 88028 .. $5.95

Lens Cleaners

Could be the most important item you buy to keep your optics clean and free from abrasives. Lenses are magnets for finger prints and smudges that greatly effect your visibility. Your optics will become dirty gradually and many times you won't realize how bad they are, until you clean them. It is very crucial to the longevity of your optics to clean them with the proper cleaners. Using cleaners that are not intended for the special coatings on your scope or binocular can remove the coatings. Use only cleaners that are safe for the coatings. Another remover of coatings is abrasives like fine dirt or dust. Remove all abrasives first then clean with an approved solution. We like to use canned air, the stuff that's made for computer key boards and such to blow off the dust then use any of the cleaners below. The lens pen is great for taking in the field with you because it has a retractable brush on one end and a non liquid dry cleaning compound with a chamois tip on the other end. The Pentax cleaning cloth is also invaluable. How many times have you been in light rain that later dries into water spots on your lens? The lens pen or cleaning cloth takes care of them, safely.

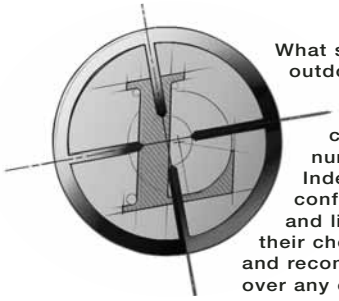
LEUPOLD



What scopes do the best outdoor writers, competitive shooters, guides, and custom gunmakers choose in overwhelming numbers? Leupold. Independent research now confirms: People whose lives and livelihoods may depend on their choice of optics, choose and recommend Leupold scopes over any other brand.

Researchers asked more than 100 outdoor writers, "Which one brand of riflescope do you most prefer when hunting?" Leupold was, by far, the top choice, due to Leupold's "clarity and quality." Several hundred of the best guides and outfitters in North America — people often asked for equipment recommendations — were asked, "Which one brand of riflescope do you most prefer to use when you hunt?" Leupold was the number one choice, as well as their top recommendation to clients. The reason? Reliability. Custom gunmakers were asked, "If you could mount any riflescope on your custom rifles, which one would it be?" A huge majority of these elite craftsmen replied "Leupold" for their overall quality and appearance.

SWFA 110% LOW PRICE GUARANTEE

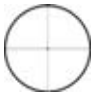
We offer Leupold scopes in the following reticles :

DUPLEX®
The Duplex design, invented by Leupold more than 20 years ago, is an industry classic. Heavy posts stand out against thick cover and in twilight conditions, point boldly to the intersection. Centering is a snap. The thin lines obscure nothing.

FINE DUPLEX®
A slightly finer version of the original designed for models with higher magnification, covering less area on the target for increased accuracy.

HEAVY DUPLEX®
Same as Duplex but thicker for close range (dangerous game) or brush.

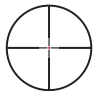
LEUPOLD DOT
A Leupold exclusive, this reticle still has a prominent dot like the so called "floating" dot. But a thin tapered crosshairs makes locating the dot much easier.



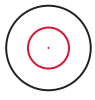
TARGET DOT
This is a conventional target shooters dot, which appears to "float" because the crosshairs are extremely fine.

CROSSHAIR
A conventional reticle. Fine crosshair with no taper.

3/4-MINUTE MIL. DOT
The standard range estimating reticle for all military branches. Mil stands for milliradian, the center-to-center distance between dots on the crosshairs.



ILLUMINATED MIL. DOT
All the ease of standard mil-dot, designed for use in any low light enviroment.



ILLUMINATED CIRCLE DOT
Designed for fast target acquisition in any enviroment, the illuminated Circle Dot reticle can also be used to estimate range.

ILLUMINATED DUPLEX
Built to the same standard as the traditional Duplex invented by Leupold more than 20 years ago. Ideal in twilight conditions, point boldly to the intersection. Centering is a snap.

All LPS Models :
* High Light Transmission - 99.65% per lens surface (94% of the available light to your eye)
* DiamondCoat lens ion assist formula makes lenses durable, scratch resistant, and easy to clean (passed the Military's toughest scratch resistant test (ten times)
* 30mm maintube contains a larger erector system for better image clarity
* 4 inches of constant eye relief
* Genererous windage and elevation travel (60" on the 3.5-14)
* Low profile windage and elevation adjustments
* Adjustment dials can be zeroed without tools & once sighted in, windage & elevation dials can be reset to zero
* Easy to grip rubber power selectors
* Fast Focus eyepiece
* Rugged one piece maintube made from 6061-T6 aluminum
* Waterproof to 33 feet
* Power setting and adjustable objective settings can be read while in the shooting position
* A full 4x erector system 3.5x4=14 (3.5-14 power range)
* Speed focus, rubber eye guard eye piece
* Lens Covers Included
* Wide field of view
* The famous Leupold Full Lifetime Guarantee

Leupold L.P.S. - Leupold Premier Scopes

Engineered from the ground up to out perform the best scopes in the world.

2.5-10x45

2.5-10x45
* Mid Range Magnification
* Ideal for all Big - Game Hunting
* Large Objective offers 4.5mm exit pupil even at 10x, yet small enough to mount close to the barrell
* NEW Optical system with superior resolution and contrast across the Field of View

3.5-14x50
* New Side Focus Parallax allows adjustments to be made from a shooting postion
* 50mm Objective can be mounted lower
* Longer maintube offers generous mount ring space to accomodate even the longest actions
* All new optical system with improved superior resolution and contrast across the Field of View
* Substantially lighter in weight than the previous model (18.5 oz vs. 22 oz)

LEUPOLD

Features :
- MultiCoat 4 anti-reflective lens coating
- Six models have a range estimating function (1.75-6, 2.5-8, 3.5-10, and 4.5-14 (both 40mm & 50mm)
- 1/4 MOA audible click windage and elevation adjustments
- Pointer dial that allows you to reset your zero
- Lug on power selector for easy adjustments
- The famous Leupold Full Lifetime Guarantee

Vari-XIIIs were the first Leupold to be computer designed. There are no internal parts that are interchangeable between the Vari-XIIIs and Vari-XIIIs. Most Vari-XIIIs start on 1/2X or 3/4X (i.e. 3.5-10), they also have a wider gold ring on the objective and the Leupold logo on the side of the scope.

Leupold Vari-X III

The Leupold Vari-X III series was first introduced in 1974 and has since set the standard in modern riflescope design and quality

LEUPOLD

Leupold VX-II's all start on whole numbers (i.e. 3-9) They also have a narrower gold ring when compared to the Vari-X III and have LEUPOLD spelled out on the side of the scope instead of the Leupold logo.

Features :

- 1/4-minute precise, audible and tactile "click" adjustments
- Multicoat 4® lens coatings on exterior eyepieces and objective lenses
- Absolute waterproof integrity
- The famous Leupold Full Lifetime Guarantee

The VX-II is an entirely new line of scopes. It's a new design based on Leupold's famous Vari-X II. Like all Leupold Golden Ring optics, it's made right in the U.S.A., and it's backed by the Leupold Full Lifetime Guarantee. When the light is low, the VX-II 3-9x50mm is the ultimate VX-II model, thanks in part to its large 50mm objective lens and the multicoated lenses. The VX-II 1-4x20mm gives you an extremely wide field of view: 75 feet at 100 yards, so it's perfect when the action is fast and close up.

The best scope in its class for hunters who want quality, accuracy, and affordability, all in an American-made scope. The Leupold VX-I series, while being an older design, still sets the standard for ruggedness, reliability, and quality in rifle scopes. VX-Is all start on whole numbers (i.e. 3-9) they also have a narrower gold ring when compared to the Vari-X III and have LEUPOLD spelled out on the side of the scope instead of the Leupold logo. The Leupold VX-I series are only available in gloss finish.

Features :

- The famous Leupold Full Lifetime Guarantee
- Complete waterproof integrity
- Fully coated lenses (Magnesium Floride)
- Friction windage and elevation adjustments

New! The New Rifleman™ Riflescope Series: American-made. Accurate. Durable. Rugged. Reliable. These words are the best description of the Leupold® Rifleman™ riflescopes. Just as all Leupold Golden Ring® scopes, they are made in the U.S.A. Accuracy is assured by the use of fully coated lenses for a clear and bright sight picture, and the trustworthy Leupold erector system so long prized by shooters around the world. Hunters will also appreciate the wide field of view, generous eye relief, and the rapid target acquisition offered by the new Wide Duplex® reticle.

LEUPOLD

Introducing the all new Competition Series.
The new Competition series will all have 1/8 moa click adjustment dials, side focus parallax adjustment, 30mm tubes (to accomodate the new revolutionary system design), and multi-coated lenses. The side focus parallax dial even has a cover so that it can't get bumped.

Made for the most discriminating competition shooter. If you are almost religious about precision, look no further.

Features :
- Extreme magnification
- Side Focus Parallax
- 30mm tube
- All new optical system
- Finger adjustable 1/8 moa target knobs
- Multicoat 4 coatings
- The famous Leupold Full Lifetime Guarantee

We offer three powers 35x, 40x and 45x in two different reticles (crosshair or 1/8 MOA Target Dot).

Leupold - Benchrest / Competition Rifle Scopes

Leupold is taking Benchrest shooting to a whole new level.

35x45mm Side Focus Parallax, Matte Finish, 1/8 moa Dot Reticle, Target Knobs LEU53432 ..... $949.95

2.5-8x32

Leupold - Illuminated Reticle Rifle Scopes

The illuminated series from Leupold was designed to aid in extreme conditions when the reticle is difficult to see.

Features :
- MultiCoat 4 anti-reflective lens coating
- 1/4 MOA audible click windage and elevation adjustments (except M-3s)
- Lug on power selector for easy adjustments
- Intensity adjustable illuminated reticle

All lenses are fully coated with Multicoat 4 lens coatings. Optional Illuminated Mil-Dot reticle for range estimation is available on all models except the 1.5-5x20. Worth its weight in gold for dangerous game (bear, cape buffalo, lion etc.), the 1.5-5x20 will be the ultimate in close range low light scopes. The 3.5-10's and 4.5-14 will be indispensable for varmint hunting and the mil-dot versions are sure to be the first choice of top law enforcement agencies.

"I'VE NEVER HAD A GUN THAT DIDN'T HAVE A LEUPOLD® ON IT. I HAVE NO INTENTION OF CHANGING."
— Jim Shockey, Professional Guide & Outdoor Writer
Jim Shockey hunted the most remote, punishing locales on earth to become the first hunter to complete the Ultimate Slam of North American Big Game with a muzzleloader. Jim faced extreme heat and cold, rain, snow, sand, rough terrain, and none of it could take out his tough, waterproof Leupold® riflescope. At every step, his Leupold's rugged reliability protected its outstanding clarity, low-light capability and accuracy. "I've been fortunate enough to go on some pretty brutal hunts, so I get to see scopes at every extreme," Jim says. "Nothing holds a candle to Leupold for ruggedness."
The world's best competitive shooters, guides, custom gunmakers and outdoor writers choose Leupold over any other scope. If you're looking for an American-made, rugged, waterproof, accurate and reliable hunting optic, it's time you joined them and got a Leupold for yourself.
LEUPOLD®
MADE RIGHT, MADE HERE.

LIFE OR DEATH:

YES, WE'D SAY THOSE STAKES DESERVE THE MOST RUGGED, ACCURATE AND DEPENDABLE TACTICAL OPTICS ON EARTH.

There are plenty of reasons why Leupold® is the overwhelming optic of choice for both military and law enforcement units worldwide. For some, it's the ruggedness that prevails against even the most wicked conditions. For others, it's Leupold's unflinching dedication to optical excellence and fail-safe accuracy. Our years of field-proven dependability seal the deal for most. No matter what your reasons are when choosing optics, know this: we build Leupold Tactical Optics like our lives are on the line, because we know yours is. For more information on Leupold Tactical Optics, call 1-800-929-4949 or visit our Web site: www.leupold.com.

LEUPOLD®
TACTICAL OPTICS

LEUPOLD

Every Mark-4 scope has multi-coat 4 coatings on all the lenses. The M1 series have target knobs with 1/4 MOA windage and elevation. The M3 series are cammed for bullet drop, instead of a target knob the M3s come with 4 interchangeable cams. The cam will change your zero from 100 yds to 1000 yds with one revolution of the cam. In order to get from 100 to 1000 in one revolution of the cam the scope has to have 1 MOA elevation adjustments.

What Makes The Mark 4® CQ/T™ Revolutionary:
- One AA battery powers the Mark 4® CQ/T™ for up to seven hours of continuous use (on the highest intensity setting)
- Reticle is visible when not illuminated (no batteries required to use the scope)
- Ten illumination settings match any light conditions without overwhelming your natural low-light vision; two low-intensity settings work with night-vision devices
- Battery check to determine battery life
- The famous Leupold Full Lifetime Guarantee

Leupold - Mark 4

10x40 Mk4 M3 Side Focus Parallax, Matte Finish, Mil-Dot Reticle, 30mm Tube, Comes with .308, 30-06, .300WM, and .223 cams Includes flip up lens covers and a screw on sun shade LEU47638 ..... $1289.99

Mark 4 M1 10x40

The Mil-Dot is a range estimating reticle that was developed for military applications. The space between the dot centers subtends one milliradian (Mil). One Mil subtends 3.6" at 100 yards, or 36" at 1,000 yards.

To use this system effectively in your Leupold Tactical Mil Dot scope you must know the size of the target. The top line on the table represents the size of the target as measured in feet or inches. The second line represents the conversion of the foot measurements to yards. The left column shows the mil measurements to the nearest 1/2mil. The mil scale can be split to the nearest 1/8mil. for a more accurate range measurement. To use the table follow the instructions below.

Please note that your Mil. Dot reticle was calibrated to be used at one magnification. If your scope is a 3.5-10 the correct magnification is 10x. On the 4.5-14 use 14x. The use of any other magnification will give inaccurate results.

- Estimate height of target and locate across the top.
- Measure height of target in mils and locate down the side.
- Move down from the top and left from the side to find the range in yards.

Height of target (yards) X 1,000 = Range (yards)
Height of target (mils)

Mil-Dot reticle

3.5-14x50 LEU53490

Leupold designates two models as Rimfire scopes that do not have adjustable objectives and have the parallax pre-set at 60 yards from the factory. The E.F.R. (Extended Focal Range) scopes will also work well on rimfire or airguns. The E.F.R.s have adjustable objectives that have the ability to focus at a very close range, thus being parallax free at closer ranges for airguns or rimfires. Airguns require scopes to be extra heavy duty because of the reverse recoil (all Leupold scopes are airgun compatible). The rimfire/airgun scopes are built to the same standard as the centerfire scopes.

Leupold - Rimfire / Airgun Riflescopes

Designed for close range precision shooting. The best there is, whether you are shooting competitively or just plinking.

Features :
- Light weight
- Compact with the same performance as the full size models
- Equivalent to the Vari-XII line
- Parallax adjusted for 60 yards
- Finer Duplex in the 4x

4x28 Gloss Finish, Fine Duplex Reticle LEU41129 ..... $224.99

Gloss Finish 2-7x28 Fine Duplex Reticle LEU46340 ..... $314.99

Compact 3-9x33 Adjustable Objective, Gloss Finish,Duplex Reticle, E.F.R LEU46402..... $364.99

Features :
- One piece anodized aluminum construction
- ScopeSmith shades are stackable and easily thread to one another
- Also aids in protecting the objective lens from dirt and scratches

Redesigned, these lens shades now feature the ability to thread one to another. This allows you to customize your lens shades by combining 2.5" and 4" shades to achieve a desired length. The 50mm shades will fit any 50mm Leupold scope, however the 40mm shades will only fit 40mm scopes that have an adjustable objective.

LEU42420 . . . . . $34.95

ScopeSmith Anti-Reflection Device (ARD) For 40mm scopes without an A/O
LEU52292 . . . . . $19.95
This honeycomb device snaps into 40mm fixed objective scopes that are non-threaded, mimicking the performance of traditional lens shades. Perforated with scores of tiny light-transmitting baffles and only a quarter-inch deep, the ARD reduces lens glare as effectively as a 7" lens shade.

Anit-Reflection Device
LEU52292

Leupold ScopeSmith - Lens Shades and Accessories

ScopeSmith lens shades enable you to shoot toward the sun without any target washout.

Accessories

Retractable Ballistic Chart
Keep critical, custom ballistics data where you can access it from any shooting position. Attaches to your scope's maintube (1" or 30mm) for instant access, and the durable metal tape with your ballistics data automatically retracts after use.
For 1" Scopes LEU54804 . . . . . $29.95
For 30mm Scopes LEU54778 . . . . . $29.95

Lens Pen LEU48807 . . . . . $9.95
Lab tests prove that the lightweight LensPen outperforms other products when it comes to removing oily fingerprints, which are the most common and damaging contaminant to lens surfaces. The natural chamois tip is impregnated with a special non-liquid cleaning compound that is automatically replenished. A gentle, retractable brush removes dust and grit.

Leupold Torx Screw Driver
LEU50818 . . . . . $9.95
Use the ScopeSmith Torx Driver to secure Torx head mounting screws, that will not strip like old-fashioned hex head mounting screws.

ScopeSmith Ring Wrench
LEU48762 . . . . . $14.95
To make scope mounting easier than ever, we offer the ScopeSmith Ring Wrench. The ideal tool for installing rings without damaging your rifle or scope. For 30mm or 1" rings.

Mounting Tool
LEU52296 . . . . . $19.95
A remarkably useful tool featuring one slotted screwdriver, two Torx® drivers, and five hex head drivers. As practical in the field as on the bench, the ScopeSmith Mounting Tool is perfect for making windage and elevation adjustments, and for installing rings and mount bases.

Magnetic Boresighter
Put your rifle, shotgun or pistol "on the paper" fast with the Leupold ScopeSmith Magnetic Boresighter. You can even use this revolutionary new Boresighter to recheck your zero quickly, anywhere, anytime. It's easy to use, fits all rifles, pistols or shotguns, and works with any optical sight. The ScopeSmith Magnetic Boresighter requires no barrel spuds or batteries, and it fits in a shirt pocket so you can take it anywhere. Great for the workbench, at the range, or in the field!
LEU53500 . . . . . $49.95

Scope Cover
Keep your Leupold scope looking like new! Protect its finish from dirt and damage with a ScopeSmith Scope Cover. Available in five sizes to fit most Leupold scopes, the ScopeSmith Scope Cover is made of water resistant, nylon-laminated neoprene. Protect your scope in storage or in the field. To determine the size required, see the Scope Cover sizing chart.
Small LEU53572 . . . . . $14.95
Medium LEU53574 . . . . . $14.95
Large LEU53576 . . . . . $14.95
X-Large LEU53578 . . . . . $14.95
XX-Large LEU53580 . . . . . $14.95
CQ/T LEU54857 . . . . . $19.95
Range Target Diskette LEU52390 . $14.95
This invaluable computer diskette contains nine different targets that you can print out at home. Compatible with IBM PCs, the ScopeSmith Range Target Diskette also contains a sheet for reloading data. Save time and money by printing your own targets at home.

For over eighty years, Nikon, Inc. has built high quality optics, including binoculars, spotting scopes, and since 1985, riflescopes. From inception, Nikon has espoused innovation, quality and ruggedness. Today, this dedication is manifested in a broad range of high performance, durable hunting optics designed to perform well on any hunt.

Nikon Sport Optics products are manufactured in state-of-the-art production facilities by efficient, innovative design and production teams utilizing advanced machinery and construction techniques. The result is a group of riflescopes, hunting binoculars and spotting scopes endowed with unequaled durability, resolution, brightness, clarity and dependability.

Nikon has never been content to rest on its laurels. With each passing year, Nikon engineers and designers incorporate new production methods, materials and designs in their quest to provide hunters with the best hunting optics in the world. This dedication to the advancement of optical excellence will allow Nikon Sport Optics to lead the industry into the twenty-first century.

The Mildot Master® is an analog calculator designed for performing the following operations: Rapid calculation of range to target, based on a measurement of the target with a mildot reticle. Simple calculation of the amount of sight correction necessary to compensate for bullet drop and/or wind drift for a given range. Additionally, angle of fire for uphill or downhill shots can be accurately measured, and the up/down compensation can be closely calculated to reduce errors.

Nikon

Nikon Titanium UCC Rifle Scopes

Features

- Titanium eye peice and objective milled from a solid peice of Titanium
- One-piece, O-ring sealed and nitrogen filled aircraft grade aluminum tubes are waterproof, shockproof and fogproof
- Positive click, precise steel-to-brass 1/4 MOA windage and elevation adjustments free of reticle creep or backlash
- Precision ground and polished lenses with Ultra ClearCoat® provide 95% light transmission and virtual 100% anti-reflection capability - the theoretical maximum
- Nikoplex reticle available in all scope models for quick target acquisition in any lighting conditions

3.3-10x44 Adjustable Objective, Titanium Finish with Niko-Plex Reticle
6630 ..... $579.99

5.5-16.5x44 Adjustable Objective, Titanium Finish with Niko-Plex Reticle
6680 ..... $599.99

The Nikon Titanium UCC Riflescopes feature titanium construction in both the ocular and objective bells, offering these critical lens elements perfect protection. Oversized, adjustable 44mm objective lenses offer amazing light transmission in low light and bad weather conditions.

Nikon Titanium UCC

Nikon Titanium UCC

Nikon's exclusive 1/4-MOA low-profile handturn windage and elevation adjustments allow quick, accurate sighting both at the bench and in the field; and the Ultra ClearCoat® anti-reflective lens coating and absolute internal blackening allow for 95% light transmission, true color rendition and fine detail resolution.

89544

89542

Pentax Lightseeker Rifle Scopes are some of the most popular hunting & shooting scopes of all time. The standard Pentax Lightseeker adjustment mechanism, utilizing dual bias springs, has led the industry in providing much greater assurance that the reticle will not move under recoil. The Lightseeker is your guarantee of superior optical and mechanical quality.

89523

PENTAX

Pentax Light Seeker II

4-16x44 Adjustable Objective, Matte Finish, Plex Reticle with Perm-Align
89403 ..... $484.95

6-24x44 Adjustable Objective, Gloss Finish, Fine Plex Reticle with Perm-Align
89404 ..... $489.95

The Pentax Perm-Align system, standard on all Lightseeker II models, takes the technology of the Lightseeker an ultimate step further. A solid steel post locks the internal tube and reticle in place, replacing spring pressure, and positively securing windage and elevation settings. No amount of recoil, vibration, or incidental impact can cause the point of aim to shift. Windage and elevation adjustments in the past required a slot and the use of a coin, or some other tool, unless you owned a scope with target turrets that allowed adjustment by hand. With the Lightseeker II's finger adjustable knobs, you get the best of both worlds. No tools and the same slim-line style of your favorite hunting scope. Also has "zero-reset" feature, normally found only on full-size knobs. With the newly designed Lightseeker II windage and elevation adjustment mechanism you'll never have to worry about "creep" and "backlash". Internal adjustment posts move in and out freely without resistance. No more "tapping" the scope or firing a shot to "seat" sight-in adjustments.

Pentax Light Seeker 30mm

The next generation of Pentax Lightseeker Rifle Scopes, the Lightseeker-30 series incorporates legendary Lightseeker optics housed in a 30mm tube. The Lightseeker-30 series has evolved in response to suggestions and feedback from some of the most knowledgeable and experienced shooting authorities in North America. These are serious rifles scopes, developed for serious shooters: bean field shooters in the Deep South, groundhog hunters in the Piedmont, prairie dog hunters of the West, 1000 meter target shooters, or anyone who demands optimum optical and mechanical performance.

Superior light gathering, crystal clear resolution, return to zero accuracy, adjustable 50mm objectives, dramatically increased adjustment range, the finest mechanical precision, 100% US made, Limited Lifetime Warranty, built to last. Pentax Lightseeker-30 rifle scopes - truly International Class shooting optics.

You will find that locating your point of aim is much easier and quicker in poor light with these scopes, since the reticle stands out against the dark body of the animal. Even in poor light, the click stops allow you to quickly find the illumination level most suitable for the conditions. Once you have selected the proper setting, you can switch off the light and preserve the battery by slightly moving the knob out of the chosen click stop. This will turn off the light but let you turn it back on in a fraction of a second.

Schmidt & Bender Police/Marksman (34mm Tube)

A few years ago, Schmidt & Bender introduced its Police/Marksman rifle scopes, designed to meet the specific requirements of the precision sharpshooter, SWAT and tactical teams, law enforcement, security and corrections agencies. Now, these remarkable scopes have been even further refined to address the needs of SWAT and tactical teams, law enforcement, security and corrections agencies. The Police/Marksman II series is a new generation ... offering unsurpassed clarity, reliability and flexibility appropriate for a variety of shooting situations. The 34mm tube allows for increased windage and elevation adjustments.

TESTIMONIALS

"After reading several articles about the Super Sniper scope I decided I would give it a try. The only thing I can say is - I am VERY glad I did. I am a NYC Correction Officer assigned to the Emergency Service Unit, and I am a NYPD/MPTC certified firearms instructor. Last week I attended the New York Police Olympics in Albany NY. This is the first year that a sniper event was included. I usually go up and compete in the handgun events, but this year I felt I had to try the sniper event. I am happy to say that I used the Super Sniper scope I ordered from SWFA, and I was able to out shoot 28 other shooters and win the gold medal in this event. I want to thank you for making this product available. Once again thank you for your A+ products and service."

John Hernandez, NYPD

"I've been doing a test of a SS against Leupold MarkIV since about this spring....The (Super Sniper) is worth every penny. They could have doubled the price and it would probably still be worth it. I have been away awhile doing some training and I ran into an old buddy. He does most of his work in places that don't exist, but he likes to call Virginia Beach home. A bunch of real polite boys down there do some shooting for the US Navy. Whoever said that the Navy contract was a lie should have checked with the SEALS first, they say it's a fine piece of equipment. I've put just under 2500 rounds through it. Through interpolation that translates to at least 500 different firing solutions. Repeatability is never off even a click. It's been in the mud and the crud, sand blasted, rained on, beat on and thanks to the wonder of elevation it got froze and sleeted solid with ice."

Carry On
mike1alpha

"The 10X (SUPER SNIPER®) is still working great after 2000 rounds. This May, I met several other shooters in Wyoming for a 5 day prairie dog shoot. When I returned home, I took a trip to the range to clean rifles and check zeros. Out of three brands, the S.S. was the ONLY one to still be zeroed, and this after clicking up and down, side to side for 5 days of shooting. And it was the least expensive scope of the bunch. I have since purchased and mounted a 16X S.S. on a very well made custom rifle. Do whatever it takes, just keep this scope in the market. It's the best kept secret in optics today."

Thanks,
Clint Starke, Starke Bullet Company

"Just returned from winning the Canadian Long Range Challenge and the Aggregate for the 21st Century, at the Canadian Fullbore Rifle Championships, with a (Super Sniper) SS20X42 scope purchased from SWFA. This is the second time that the SS20X42 has been used to win the CLRC and many of these scopes are now found in use for F Class competition in Canada/U.S. This scope is ideal for F Class use from the standpoint of ruggedness, elevation & windage range, and price. What more can be said. Thanks for a good product and standing behind same if trouble arises."

Bill Wylde, Greenup, Illinois

In sub-zero temperatures or searing desert heat (-50 degrees to +130 degrees Fahrenheit, and altitudes of 30,000 feet to depths of 15 feet in salt water) the shockproof, waterproof, fogproof Super Sniper® performs. Whatever the weapon, from .223 to .50 BMG, the Super Sniper® handles the recoil. Whatever the target, Super Sniper® gives you the best advantage. Made of lightweight aluminum but strong as steel, it has superior, fully multicoated optics for maximum light transmission. Built to NATO specifications.

Custom Colors available for an additional $99.95!

SUPER SNIPER® Model Specifications

Model / Power Objective	Objective Lens Diameter	Field of View	Eye Relief	Tube Diameter	Scope Length	Scope Weight

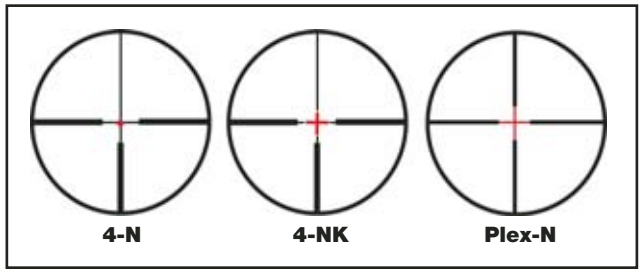
Swarovski Professional Hunter Illuminated Reticles



SWAROVSKI OPTIK

Swarovski Professional Hunter

The Swarovski Professional Hunter series are versatile, high-performance scopes offering:

- Sophisticated, high light-gathering optical system for a wide field of view with optimum edge-to-edge sharpness.
- Quick-focus eyepiece.
- Centered reticle in the first focal plane.
- Quadratic range of adjustment for larger area of reticle movement while sighting in.
- Microstructure grooves, for precisely defined baffling, prevent residual reflections inside the tube and creating high contrast images even in intense light.
- Scopes have ultra-precise adjustment turrets and patented four point coil spring suspension which guarantees shock resistance, even with heavy caliber firearms.
- Eyecup with telescopic shock absorption protects against recoil injuries, particularly when shooting in awkward positions.

TDS Reticle

TDS Tri-Factor Reticle System

Designed and licensed by TD Smith*. This reticle will enable any shooter, to quickly determine a straight line aim to a target corrected for distance and wind. This system, which has been tested and documented in over 2500 "One shot" harvest of wild game provides the shooter with an easy means of quickly making the sight adjustment decisions necessary to place an accurate shot on a target at ranges from 100 to 900 yards. As with any aiming device, a shooter must apply good,careful shooting technique, discipline and practice.

The Benefit of the TDS

Tri-factor System the TDS Tri-Factor system guides your eyes intuitively into following your body –much the same as when you point your finger at an object. Your eyes look where your finger is pointing, not the other way around. This system presents to you a dominant 9X or straight line aim to the target, depending on the model of scope selected and reduces the stress of guessing range, and holdover. GOOD HUNTING.

SWAROVSKI OPTIK

Swarovski 1" American

American features, Austrian quality. These slender, low-weight 1" models, ideal for hunting on the move, offer the following features:

- Variable magnification.
- Reticle in second focal plane for clear recognition and precise shot placement, even at accurate long-distance.
- Advanced, high light-transmission optical system for wide field of view with optimum edge-to-edge sharpness.
- Streamline ocular and body allows for low mounting. As a result, point of impact not affected by tilting of gun.
- Patented quick zero reference system for precise adjustment of the point of impact without the use of tools.
- Nitrogen purged to prevent internal fogging.

Swarovski Professional Hunter Tactical

This special run of scopes was built to withstand anything you have to offer:

- Adjustments: 120 MOA (Mil-Dot), 90 MOA (50 BMG). Both models are finger adjustable and resettable to "0" quadratic design.
- Patented 4 point coil spring system ensures reliable reticle adjustment and means absolute shot resistance, even with large calibre firearms.
- Complex, high light-gathering optical system for a wide field of view with maximum edge-to-edge sharpness.
- Nitrogen purged to prevent fogging.
- Micro-structure grooves to prevent residual reflections inside the tube for bright, contrasty images, even with backlighting.
- Constructed from one piece of aircraft structural alloy with a scratch-proof surface.
- Eyecup with telescopic shock dampening increases safety particularly when shooting upwards.
- Dioptric correction from –2 to 3 diopters.
- Functional temperature: (-4 to +131° F)
- Storage temperature: (-22 to +158° F)
- Submersion tightness: water-proof with or without the adjustment caps up to 13 ft.

Trijicon AccuPoint

Hunters know that the majority of the game only show themselves at dusk and dawn. The problem until now has been that you can no longer see your crosshairs on the animal. With Trijicon's AccuPoint you will be able to see your reticle even in total darkness. AccuPoint features a unique combination of fiber optics and tritium to illuminate your point of impact. The reticle automatically adjust to the lighting conditions or you can adjust the brightness to your preference. AccuPoint scopes are waterproof and require no batteries. AccuPoints feature the Bindon Aiming Concept (BAC). After many years of searching for and developing improved small arms weapons sights Glyn Bindon made an amazing discovery. The legendary aiming speed of the Armson O.E.G. can be combined with the accuracy and precision of magnified scopes. What was discovered is that the human brain automatically switches to the best system when you look through the scope with both eyes open. Two major universities have confirmed that anyone with normal vision (over 95% of the population) can learn to use the brain powered zoom in seconds. The BAC developed from this technology.

Trijicon A.C.O.G. and Compact A.C.O.G.

SWAT teams and other tactical units depend on a variety of Trijicon ACOG (Advanced Combat Optical Gun sights) for speed and accuracy in all situations-from close quarters to long range. ACOGs allow a high degree of discrimination, even among multiple, moving targets. TA-31 (4x32) and TA-11 (3.5x35) feature a red donut above the range finding bullet drop reticle and the Bindon Aiming Concept (BAC). The donut glows red at night from tritium and red in the day from its fiber optics. All models feature a special ranging reticle. The user does not need to make any special adjustments between shots at different ranges. Bullet drop is built into the reticle that is parallax free along its vertical axis. ACOGs are waterproof to greater than 500 feet under water. The 4x ACOGs have 3 clicks per inch adjustments at 100 yards, the 3.5x has 4 clicks per inch at 100 yards. Only the prism housing moves, external blows are easily absorbed by the light weight prism housing, making the ACOG the most rugged scope available. ACOGs come ready to mount on any AR-15 carry handle and are easily adaptable to any "weaver style" base with the two adapters available.

A specially modified 4x32 Trijicon ACOG (TA01-NSN) was chosen by the U.S. Special Operations Command (SOCOM) as standard issue for all Special Forces Units, including the Green Berets, Navy SEALs, and Rangers.

Trijicon Reflex

RX01

With the Trijicon Reflex, aiming is as easy as looking at the target. The Reflex uses both tritium and fibre optic technology to provide a quick and easily-seen aiming point under every lighting condition. The tritium offers a red dot aiming point that is enhanced in bright light by the fiber optic system, providing a more visible reticle in bright conditions and a dimmer reticle in low light.

1x24 6.5 MOA Sight without mount
RX01 . . . . . $296.99

Trijicon Reflex Special Forces (NSN)

The NSN Model is a Special Custom design for the M4A1 as sold to US Special Forces with Flattop adapter, polarizing filter, lens cleaning pen and dust cover.

Weaver T Series

The accuracy of the T-Series is legendary in competitive shooting circles. Weaver's patented Micro-Trac® 4-Point System utilizes a dual-spring, four-bearing contact design allowing for independent movement of windage and elevation for unmatched precision and repeatability. The T-Series offers you a choice of a Fine Cross Hair or Dot reticle and comes standard with an extra pair of oversized benchrest adjustments knobs, a sunshade and screw-in metal lens caps.

849981 ..... $429.99

Weaver V-16 & V-24 Classic

If you're looking for a scope that delivers a broad range of magnification as well as incredible value, this is it. The V-Series eye relief is long and forgiving, so hunters can spend those first precious seconds adjusting the scope instead of their head position. The power adjustment ring has a raised node that helps you crank it up quickly, even with heavy gloves on, in low light. All V's feature fully multi-coated lenses to reduce glare and give you edge-to-edge clarity. Their solid, one-piece construction makes them waterproof, fogproof, and shockproof. Each one is designed to be a reliable shooting partner for years to come. The V-24 target/varmint scope, has a special varmint reticle with very fine cross hairs for clear shot placement on the smallest or most distant varmints.

BAUSCH & LOMB BINOCULARS

Bausch & Lomb Elite Binoculars

Unparalleled workmanship and optical design place the Bausch & Lomb® Elite® binocular in a class by itself. The finest BAK-4 prism glass yields the brightest images and sharpest edges, and their exclusive Raingaurd® coating delivers crisp, clear images even in the most inclement weather. Fully multi-coated to reduce light loss. O-ring sealed, nitrogen-purged and rubber armored for water, fog and shock protection. Long eye relief is great for eyeglass wearers. Also features click stop diopter adjustment and convenient twist-up eyecups.

1000 Laser Rangefinder, 6x Magnifaction, 20-1500 yards (deer size target, 500 yds.) 201000 ..... **$324.95**

Introducing the world's smallest rangefinder the Yardage Pro Scout. Using Digital Technology and measuring a mere 1.5x4x2.75 inches and weighing 6.8 ounces the Yardage Pro Scout delivers superb and accurate range performance to +/- one yard. Range to a deer as far as 300 yards out or to a tree at 570 yards away for a reference point. The unique shape and palm size allows hunters to easily grip with a single hand and drop into a pocket when not in use. The rugged and weather resistant Yardage Pro Scout features popular "Scan" and ">150" modes and includes carrying case. Scan mode provides continuous distance measurements as multiple targets in the field of view are scanned and ">150" mode only captures distance measurements of objects greater than 150 yards away, enabling distance measurement through foreground clutter like brush and branches.

TROPHY

Waterproof / Fogproof 8 x 42
238042 ..... **$129.95**

Waterproof / Rainguard 10 x 42
230142 ..... **$149.95**

Trophy® binoculars are for anyone who considers a high quality binocular as essential to life in the outdoors as a pair of good boots. Trophy is the ideal binocular for hunters, hikers, anglers, naturalists and outdoor professionals. Trophy binoculars are waterproof/fogproof or water resistant and rubber-armored, built to protect the top quality optical system inside their rugged bodies. They'll go anywhere in any weather and take more punishment than any regular binocular can stand and keep on working. The deeply ribbed and grooved dark green rubber armoring lets the user keep a sure grip even while wearing gloves in wet, inclement weather. Trophy features roof prism design, high contrast amber fully-coated optics and center focus. Rugged carrying case and neck strap included.

Canon

Canon Image Stabilizers

Very detailed viewing at high magnification with no hand shake. The World's first electronic stabilized binoculars.

Features include:
Extra wide field of view
Focuses down to 12ft.
Long eye-relief
Eye-Glass friendly

8x25 Image Stabilizing Binocular 7562A002 ..... **$329.95**
- World's smallest & lightest IS Binoculars.
- High efficiency Tilt-System Image Stabilizer system.
- Ergonomically designed for better comfort and easier usage.
- High quality all glass Canon optics with Super Spectra coating for excellent sharpness &and contrast.
- Environmentally friendly lead-free glass.

10x30 Image Stabilizing Binocular 2897A002 ..... **$429.95**
- Ultra-compact lightweight 10x binoculars with built-in Image Stabilizer (IS).
- Doublet Field Flattener for sharp, distortion-free images from edge to edge.
- Canon's Super Spectra multi-coating for superior contrast.
- Water-resistant non-slip rubber coating for secure handling.
- Long eye relief for easy viewing.

12x36 Image Stabilizing Binocular 2896A002 ..... **$749.95**
- World's first active optical image stabilizer design for binoculars.
- High-magnification (12x), long eye relief, wide-field viewing (67°)
- Multi-coated Canon optics including doublet field-flattener for excellent edge-to-edge sharpness and contrast.
- Focuses as closely as 3.7m/12ft. for maximum flexibility

15x50 Image Stabilizing Binocular 4625A002 ... **$1229.95**
- Built-in Image Stabilizer (IS) provides shake free performance
- High magnification ratio: 18x and 15x
- Doublet Field Flattener for sharp, distortion-free images from edge to edge
- Extra-bright, large diameter 50mm objective lens
- Long eye relief: 15mm
- Water-resistant construction with non-slip rubberized grip

18x50 Image Stabilizing Binocular 4624A002 .... **$1599.95**
- Built-in Image Stabilizer (IS) provides shake free performance
- High magnification ratio: 18x and 15x
- Doublet Field Flattener for sharp, distortion-free images from edge to edge
- Extra-bright, large diameter 50mm objective lens
- Long eye relief: 15mm
- Water-resistant construction with non-slip rubberized grip

KAHLES
AUSTRIA

Kahles has been a leading optical manufacturer for more than 100 years, now continuing their tradition of innovative optical design engineering, Kahles is pleased to announce a new line of high quality binoculars.

Bino-Suspenders
60225 ..... $26.95

8x32 Roof Prism, Water-Proof, Rubber Armored, Dark Gray
55200 ..... $558.95

8x32 Roof Prism, Water-Proof, Rubber Armored, Camo

55101 ..... $698.95

10x42 Roof Prism, Water-Proof, Rubber Armored, Camo
55111 ..... $738.95

Features and Benefits:
- Precise central focus
- Observe the finest detail even at close distances (7.5 ft)
- Waterproof (submersible) and fog-proof
- Unique winged eye cups and flat eye cups standard
- Shock absorbing rubber armoring
- Light weight alloy housing (21.5 oz on 8x32 & 26.5 oz on 8x42, 10x42)
- Phase corrected roof prism with special fully multi-coated refractive glass
- Twist in eye cups for eye glass wearers
- Side palm swells and non slip grooves for better grip
- Extra wide field of view
- Lifetime warranty

55100

Leica Laser RangeFinders

The industry leader in laser rangefinders introduced the world's most compact 800 yard laser rangefinder. Now Leica introduces the new 1200 model in the same body as the 800. It measures only 4x3.75x1.5 inches and weighs only 10 ounces. Extremely durable construction, water-proof and will operate in -14 degree F to +122 degree F. Utilizing Leica's lenses with its "bullet-proof" construction and an easy to read LED display (not a hard to read LCD display).

Leica Duovid

Two binoculars in one! The Leica DUOVID 8+12x42 and the new Leica DUOVID 10 + 15 x 50 are the very first high-end binoculars with switchable magnification. They are built for the hardest use in hunting and they render brilliant images at great distances as well as in critical, poor light situations. The respective lower magnification of each model provides a steady image and a large field of view with great depth of field. By switching to the respective higher magnification you are then right close to the goings-on with an outstanding imaging performance, even with the very smallest details.

10+15x50 Duovid 40420

Give yourself permission.

To hell with ordinary optics. The NEW ULTRAVID is light on your neck, small in your hands and rugged as your truck. Thanks to a 100% magnesium housing, and a titanium center axis shaft. The thumb rest is an ergonomic trophy. As is the multifunction center drive; oversized and positioned for instinctive adjustments. Inside, our High Lux System™ prism coating combines with a new optical design to visibly increase brightness and game-finding contrast. ULTRAVID. The only permission you need is your own.

NEW.
ULTRAVID 7x42,
8x42 and 10x42.

Leica Trinovid BN Ultra

Want to observe tiniest details of trophy game in seething hot temperatures or in unfavorable lighting-conditions? In nature, we periodically encounter situations that can be very harsh on ourselves and on our equipment. At times like that, in order to continue observing with confidence, our equipment must be absolutely reliable. High quality optics coupled with robust and precise mechanism and superbly ergonomic shapes make every Leica Trinovid BN binocular an optimal companion for professional hunters.

NEW!

Leica

"Light Done Right"

Create a new line of binoculars that meet or exceed all of the legendary qualities of the Leica line, but in a more compact and lighter weight configuration. This was the challenge given to Leica development engineers. Result: Leica Ultravid, binoculars that are light, but done right. The new Leica Ultravid binoculars not only out perform the competition, but set a new benchmark in binocular design and function. They are lighter, brighter, faster and stronger than any other binocular on the market.

Each LEICA ULTRAVID Binocular starts with a housing made of light high-grade magnesium, with a center axis of titanium. Wall thickness is almost twice that of other binoculars on the market using magnesium, making the Leica stronger and more durable.

To produce even greater structural integrity and longer product life, the center axis shaft of the LEICA ULTRAVID is made of space age titanium. In addition, the complete focusing assembly is made of durable metal components, not plastic like some other companies. All of this is done, while achieving the target of lighter weight.

The extremely robust magnesium housing assures precise functioning under all outdoor conditions and great longevity. The Ultravid's compact dimensions, extraordinarily ergonomic design and their low weight (less than 26 ounces!) make these binoculars become constant companions that one will never want to leave behind.

Ten Years in the Making

Each Ultravid Binocular features enhanced optics with greater contrast and higher brightness by virtue of Leica's High Lux System (HLS™) and stray light elimination. The High Lux System is a special mirror coating enhancing the prism system that is applied utilizing an advanced Physical Vapor Deposition process generated by an Ion Beam and particle accelerator. Forty-three separate coatings are applied in a thickness as little as 40 nanometers. These so called lamba/2 coatings, which transfer 99.9% of the light over the mirrors, not only generate additional brightness, but also allow for optimization of the full spectrum of visible light making up the image. Commonly used coatings allow optimization for only one wavelength of light. Additionally, a new mechanical and optical design improves contrast and total light transmission. This is accomplished with new glass and new lens coatings. Net result: extraordinary light transmission that delivers the brightest and most natural image available from a binocular today.

MINOX

MINOX is a synonym for the miniaturization of optical instruments. The famous subminiature camera MINOX LX, which became world renowned as a spy camera, offers the highest precision. Following this tradition, the new generation of MINOX BR binoculars again proves MINOX's highlevel of competence in precision engineering. MINOX binoculars offer a lot for your eyes: a superb design with extremely high-resolution lens systems. The use of special glass increases the contrast so that the user is able to recognize small details even under critical light conditions. All MINOX binoculars are made of multicoated lenses. For this reason reflections are reduced and the observed results are much more brilliant. The MINOX engineers directed their attention towards an extremely short focussing distance so that even small objects can be observed from a close distance. The sturdy and extremely light weight body made of aluminum offers the necessary stability so that the new MINOX binoculars may be used with confidence in extreme outdoor activities. A powerful piece of optical equipment that fits perfectly into your pocket!

MINOX Binoculars BD 8x32 BR and BD 10x42 BR now also with aspherical lense technology. In the spring of 2000 MINOX presented the BD 10x52 BR ALT binoculars with aspherical lenses to the world public for the first time. Based on the huge success of these products the 8x32 and 10x42 models have now also been fitted with this new technology. The general advantage of aspherical lenses are that they are able to correct numerous optical aberrations with one lens element. The result is a much improved flatness of the field of view.

For the user this means high contrast and detail resolution right up to the edges. Moreover, the system enhances a neutral, brilliant color rendition and high light transmission. This is something nature observers and birdwatchers appreciate. With aspherical lenses the optical performance of these MINOX binoculars has now been improved even further to provide perfect rendering of the finest structures of petal and leaf markings. The exceptional nearest focusing distance (1.6 m in the 8x32 and 2.5 m in the 10x42), which also enables pin-sharp definition of insects, is an additional exciting feature.

The new generation of the MINOX BD 8 x 32 BR and MINOX BD 10 x 42 BR features a maximum of top-class high technology:
- Aspheric Lens Technology
- Our newest coating system for all prisms increases contrast even at twilight and dawn
- Rubber reinforced aluminum body for long life and mechanical stability
- Dust-free and waterproof up to 5 m / 16.4 feet
- Extended eye relief allows a full field of view even for wearers of eye glasses
- Internal nitrogen filling to prevent lens fogging

The scope of delivery includes a leather case which can also be attached to a belt.

Pentax Angle Compensating Laser Rangfinder

Features
- Available in 600 yard or 800 yard models
- Angle compensation gives the proper distance when shooting up or down a slope
- Superior single beam laser technology offers improved accuracy over multi-beam units in many applications
- Three times better distance resolution than comparable models
- Ranges as close as 4 yards (Bowhunters)
- Will measure in Feet, Yards or Meters
- Simple one button operation
- Very easy to read external LCD readout
- Includes carry case and strap
- State-of-the-art microprocessor automatically filters data, allowing accurate readings in rain or snow at any distance without the need to select a "rain mode"
- Red-Dot aiming allows you to verify the object you intend to range
- Ranging laser is not activated until the trigger button is released preventing the rangefinder from reading an incorrect object
- Operates on one easy to replace 9 volt battery
- Compact and lightweight (1.7"x4"x5.1")(9.6 ounces)
- 600 yard model will range up to 999 yards on reflective targets
- 800 yard model will range up to 1200 yards on reflective targets
- Accurate up to +/- 1 yard

PCF WP 8x40

Pentax PCF Water Proof

Features
- Nitrogen filled to make them water proof and fog proof to 1 meter depth in water.
- The PCF WPs deliver enhanced illumination by transmitting more light at the edges and the elimination of shadows for better, clearer images thanks to the high-performance BaK-4 prisms.
- Pentax's renowned Super-Multi-Coating on the aspherical lens elements provide brighter, clearer images and cuts down glare...it also eliminates harmful ultraviolet rays.
- Center focusing allows users to instantly bring images into focus.
- The mechanical focus lock feature allows the user to lock in at a specific distance for convenient focus-free viewing.
- Click stop diopter adjustment locks in the left eyepiece setting.
- Slide-style rubber eyecups and long eye relief provide viewing comfort for eyeglass wearers. Rubber eyecups won't scratch eyeglasses.
- The PCF WPs have an ergonomic design for a firmer grip and easy handling.
- They are ruggedly constructed with rubber covering to protect the optical and mechanical systems.
- Built to last, each PCF WP includes a built-in tripod socket.
- All PENTAX Binoculars are protected by a limited lifetime warranty.

STEINER GERMANY

Steiner Police

Law enforcement and public safety officers have a new professional tool for their efforts. Steiner is introducing Police binoculars with large objective lenses and multi-coated optics on all air-to-glass surfaces to provide a bright clear view in almost any surveillance situation. Unlike other binoculars, the Police models are built based on a rugged, military design concept.

Waterproof, fog-proof, and shockproof and housed in a black, rubber-armored shell, the Steiner Police binoculars perform admirably under the harshest circumstances. Outside, in rain and snow, or indoors, with little to no available light, the Police binoculars help officers detect the slightest movement or activity at long ranges in difficult conditions.

Steiner Safari

Equip yourself for outdoor adventure with the glare and UV blocking optics of the Steiner Safari series binoculars. Steiner's redesigned Safari series blocks UV light and cuts glare like the best sunglasses to give you a cool, comfortable image on snow, sand or sea.

Three new models, all with legendary Steiner BAK-4 optics and improved color fidelity, let you choose binoculars to fit your needs exactly, from seaside to the mountaintops, at a surprisingly affordable price. All Safari models are built to last through decades of rugged use and are resistant to rain and shock. Comes with a 10-year warranty.

NIGHTHUNTER

Steiner Night Hunter

Night Hunter 7x50

Never before has an optical tool been tailored so specifically for use in dark and low-light conditions. The Steiner Night Hunter gathers every bit of available light, including reflected rays from the moon and stars, and transfers that light to the user's eye. This is accomplished through a Porro-prism optical design that considers all conditions of the human eye, the nature of light and the visual characteristics of the target subjects. This proprietary design permits the user to see the unseeable.

Predator 10x42

Merlin 8x32

Peregrine 8x42

Steiner Predator

Comfort and convenience are critical when traversing unknown terrain, and the Predator is designed with these benefits in mind. The new Predator weighs less than 10 ounces making it small enough to tuck away in a coat pocket for an afternoon on a mountain trail. Its lightweight design and contoured thumb grooves allow hunters to glass for hours without arm fatigue and the smooth and accurate center-focus knob can be manipulated effortlessly and efficiently. The green-tinted Predator lens coating filters the indistinct colors of haze and foliage and amplifies the visibility of colors common to birds, game animals and other wildlife. Subjects that might normally be camouflaged by dense greenery will pop out when seen through the "eyes" of the Predator.

Steiner Merlin

Lightweight, compact, yet full featured. Because of the lighter weight, this binocular is ideally suited for longer walks or hikes.

8x32 438 ..... $398.95
8x42 448 ..... $448.95
10x42 458 ..... $498.95

Steiner Marine

It's no wonder we're chosen by more Round-the-World and America's Cup skippers than any other brand. Navy SEALs and professional mariners worldwide rely on Steiner's superior image quality and incredible reliability.

7x50 575 ..... $269.95

Marine 7x50

Steiner Peregrine

With Steiner's new Peregrine, a new level of brightness and natural color balance is achieved by use of a new dielectric prism coating by which over 40 layers of titanium oxide and other rare minerals are alternately applied to the glass surfaces.

8x42 348 ..... $848.95
10x42 358 ..... $898.95

STEINER GERMANY

Steiner Commander V

Navy SEALs and professional mariners worldwide rely on Steiner's superior image quality and incredible reliability, with optics designed to deliver superb low light performance, with cool, comfortable daytime viewing...and built mil. spec. tough: waterproof, fog proof and shock resistant.

7x50 293 ..... $748.95
7x50 with Compass 392 ..... $898.95

Steiner Tactical

A mil. spec. tactical binocular with the U.S. Army M-22 reticle, which can be used in conjunction with a variety of mil. dot or other reticles and riflescopes. This is the model used by many law enforcement and special operations units (they discourage us from telling you which ones), so let's just say these binoculars are ideal for many tactical applications.

6x30 B/ST with Mil Reticle 461 ..... $489.95
8x30 B/ST with Mil Reticle 481 ..... $489.95
7x50 Military R 538 ..... $698.95
10x50 Military R 536 ..... $698.95

Steiner Rockies

Compact, precise, center focus binoculars for the hunter, birder and traveler. Rocky compacts feature Steiner's CAT lens coating for enhanced low-light performance; they're actually brighter than many larger glasses. These lightweight roof prism binoculars fold to fit your pocket or their own small, belt-attachable case; excellent for rough terrain where ounces count. All Rocky models are rubber armored for a comfortable, no slip grip and feature wrap around eye-cups to eliminate distracting side light. All Rocky models feature a 10-year limited warranty.

8x42 148 ..... $619.95

Steiner Bighorn

If you're on the go and light weight, higher power, and razor sharp long distance performance is important, take along the Big Horn. Built light, yet extremely robust, the Big Horns are perfect for glassing Pronghorns and of course most ideal for Dall or Big Horn sheep. Both Big Horn binoculars feature Steiner's one-time Sports Auto-Focus system once set for your eyes images will be sharp to infinite distance. Light gathering is also good with full multi-coating on all lens surfaces.

9x40 Green Armored 290 ..... $319.95
15x56 Green Armored 215 ..... $598.95

Steiner Navigator

The new compact 8x30 Navigator is also the most versatile. Designed like the bigger 7x50s, the 8x30 Navigator has been adopted for use as a smaller viewing or "back-up" companion. Its compact design and light weight make it suitable for any use. It fits easily in a coat pocket and features Steiner's Sports Auto-Focus. The 8x30 Navigator offers Steiner's brilliant new "anti-haze" optics for day time and low light performance. Even if you prefer larger 7x50s, or units with an integral compass, you'll want to consider the new Navigator 8x30 as the perfect second binocular. 10-year limited warranty.

7x50 Navigtor II 275 ..... $389.95
7x50 Navigtor II Compass 385 ..... $489.95
8x30 Blue Armored 185 ..... $199.95

Steiner Military Marine

7x50 Green Armored

The design for this binocular is based on the legendary Steiner military-issue 7x50, selected by the US Army and over 40 other nations. 7x50 optics provide excellent low-light performance and image stability. These optics, and Steiner's Sports Auto-Focus system make this the perfect binocular for boating and law enforcement applications, as well as most hunting uses. Extra-long eye relief for eyeglass wearers and comfort during extended hours of use.

275 ..... $469.95

8x30 Green Armored

A tough, solid compact that offers plenty of magnification rainproof construction and maximum versatility. Refined design by years of use in a variety of settings from mountaintops to deep canyons, aboard and ashore. For spotting game or exploring nature's majesty Steiner's increased depth-of-view puts all the action in focus at once. Long eye relief for eyeglass wearers.

280 ..... $194.95

10x50 Green Armored

An excellent choice for those who need extra power and brightness. The large, 50-mm objective lenses gather more light, and present a larger image to the user yielding a brighter view and greater stability than binoculars with smaller objective lenses. The 10x50's power, brightness and great depth-of-field focusing make this an excellent choice for spotting antelope, elk, or caribou.

210 ..... $479.95

Steiner Commander III

Some of the best known, world-class skippers won't head out without their Steiner Commander III. They feature incredible brightness, and a range finding reticle combined with an illuminated, HD-stabilized compass. The 7x50 configuration, combined with Steiner's brilliant CAT (Color Adjusted Transmission) optics, give the Commander III the highest light gathering ability of any compass binocular, making easy work of navigating at night or in poor light conditions. Commander III's are built to mil. pec. standards for shock resistance, humidity and waterproofing. They feature a 30-year limited warranty.

7x50 C.A.T. , Compass RF Green 383 ..... $689.95
7x50 C.A.T. , Compass RF Blue 382 ..... $699.95

Steiner Senator

Whether you're glassing to the next ridge, down city streets, or in any other situation when you want to "let your optics do the walking," the Senator puts you at an effective distance of less than 100 yards from one mile distant wildlife or other objects. Many hunters and outdoorsmen are discovering these high power binoculars are easy to use, give them a better view and offer a lot more comfort during extended use than spotting scopes. And the 80-mm objective lenses, combined with Steiner's legendary optics, deliver far superior low-light performance. Don't let their light weight — they're 30% lighter than look-alike competitors — fool you. These binoculars were originally developed for military and border patrol applications and are mil. spec. tough: totally waterproof, shock resistant, and rubber armored. Tripod mount is included, but these models are light enough to be hand held. Depth of field is 60 yards out to infinity once focused for your eyes.

15x80 415 ..... $969.95
20x80 420 ..... $989.95

Steiner Observer

The Observer series binocular was specifically designed for Astronomy or the longest distance views on the surface of our own planet.

WEAVER

Introducing the Grand Slam line of binoculars. The two models feature 45mm objective lenses that gather 15% more light than a 42mm objective. Fully multi-coated phase coated optics are used in both models to give you the sharpest highest quality image available with less glare. Rubber armoring with special traction ribs make them very durable and easy to carry, dry nitrogen gas prevents them from fogging even under the roughest conditions. Newly designed twist in eye cups make them easy to use with or with out glasses.

Grand Slam Series

8.5x45 Phase Coated 800467 ..... $349.95
10.5x45 Phase Coated 800468 ..... $374.95

FEATURES & BENEFITS

- 45mm Objective – 15% more light gathering power than the standard 42mm binoculars
- Phase-coated roof Prisms – Enhance image sharpness and reduces glare
- High reflection aluminum coating for roof prism
- Fully Multi-coated lens system – Promotes the brightest possible image
- Twist-up eyecups
- Protect ocular lenses & provide continuous adjustment of eye relief for eyeglass wearers
- Superior optical design – Maximum image clarity with minimum distortion
- Dry Nitrogen gas purged – Prevents internal fogging
- Waterproof - under 1 meter for 3 minutes
- Durable, high-quality carrying case
- Armored body

Burris Spotting Scopes

Signature Spotting Scope 18-45x60
Designed and built for extreme conditions with the remote back-packer and hunter in mind, the Signature Spotting Scope combines incredible optical performance with ruggedness and portability. This premium scope is comparatively lightweight, compact, waterproof, shockproof, and fogproof. It also features rubber armor coating and a retractable sunshade built right in. With multicoated ultra-pure glass lenses, BaK-4 prism, and an advanced constant-focused optics design, the brightness, clarity, and resolution are superb. If it is a lifetime of quality viewing you're after, and/or the taxing requirements of an Alaskan Rocky Mountain Goat hunt, this stout spotter will suit you well. Although you won't need it, additional piece-of-mind is added by our Forever Warranty.

LEUPOLD

Imagine compressing the optical performance of a large, bulky spotting scope into a compact, lightweight package you could pack into the mountains.

Magnification ranges from 12x to a whopping 40x for total versatility in the field. Multicoat 4 lens coatings, a light absorbing interior finish to suppress glare, and an efficient lens and mirror optical system combine to transmit a maximum amount of available light to your eye. That means you get an impeccable sight picture that's bright, crisp, and rich in visual detail and contrast with an amazing amount of eye relief.

You get it all in a package that's just 11.3 inches long, tipping the scale at a mere 32 ounces. The tough, light magnesium body is coated with a protective rubber armor, and our exclusive nitrogen charging and sealing technology guarantees absolute waterproof performance.

The Leupold Gold RIng spotting scope is now offered with an optional Mil Dot reticle. The Mil Dot reticle will provide the correct subtension for target range estimation at any magnification setting.

To be in close proximity to the subject and to experience it intensively – that is made possible by high performance Leica Televid 62 and Leica Televid 77 spotting scopes and they're continuously adjustable 20x to 60x magnification.

The legendary high-performance Leica Televid 77 spotting scopes are now being complemented by the smaller and lighter Leica Televid 62 line of spotting scopes in four versions, thus clearing the way to applications where up to now spotting scopes were of only limited use because of their weight. All lines of spotting scopes are also available in APO-versions.

Leica Televid Spotters at a glance

- Dual focusing with 3.5 and 14 turns
- Sophisticated optics with 3 lenses (Apo-Televid) for colour-fringe-free viewing even under extremely poor light conditions and at high magnification
- Waterproof, all-metal housing with partial rubber armouring
- All eyepieces for Televid 77 spotting scopes can also be used on Televid 62 spotting scopes.
- The focal length of the lens of the Televid 62 spotting scope is shorter, resulting in a magnification that is 20% lower (16x, 26x, 32x, and 16x - 48x). A new version of the 32x wide-angle eyepiece that features an especially wide field of view of 40 m / yds at 1000 m / yds was designed specifically for the new Televid 62 spotting scopes.
- Choice of Angled or straight viewing
- Photo adapter as accessory. Enables you to attach any standard reflex camera (f/10.4/800mm). The Digital Adapter makes it possible to couple the new Leica Digilux 1

DIASCOPE
SPOTTING SCOPES

Zeiss Diascope 65 T* FL and Diascope 85 T* FL (both models with eyepieces for straight or angled viewing.) The optical systems re-designed on the basis of the Carl Zeiss Advanced Optics System (AOS) use glass material containing fluorine ions, which provides the objective lenses with superachromatic properties – with natural color rendition down to even the finest nuances, superb detail recognition and no color fringes.

Two wide-angle eyepieces with fixed magnifications and one zoom eyepiece are available for each model – including a bayonet mount with a safety catch for rapid eyepiece change. The ergonomically designed dual focusing system features two wheels for fast focusing and, if required, fine focusing with just one hand. Additional features include rotatable, generously dimensioned tripod bracket extensible sunshade with sight and leakage test and nitrogen filling.

Needless to say, the scopes are all provided with Carl Zeiss T* multilayer coating on all glass-to-air surfaces for maximum transmission and natural color rendition, and Carl Zeiss P coating on the roof surfaces of the reversal prisms for maximum resolution.

American Technologies Network NIGHT VISION

Night Vision Riflescopes

ATN's brand of Night Vision Devices are widely recognized as the most innovative and of the highest quality made. They manufacturer the widest selection of NVD's on the market and have a unit to satisfy almost every situation and budget. Choose from an inexpensive 1st generation device all the way up to a top of the line USA 3rd Generation Military Spec. System. They even offer previously unavailable 4th generation. The infra-red illuminator allows use in total darkness! All night vision units come with a 2 year warranty, a Night Vision reference video, and a toll free customer service line. The 2nd, 3rd, and 4th Generation NVDs made in the USA.

3X MK330 Warrior 1st Gen MK330 ..... **$479.00**

The Aries 330 Warrior is the first of our new line of Night Vision weapon sights produced under the brand name of Black Lion Optics. Affordable, high quality 1st generation weapon sight. Features: new super fast front lens system for optimal brightness, easy push button operation and a reticle brightness adjustment. Also comes with our new detachable, most powerful in the industry 450mw Infrared Illuminator with dedicated windage and elevation adjustments. This new IR lets you see even in total darkness up to 150 yards away! If you are looking for an inexpensive, quality 1st gen. riflescope the Aries 330 Warrior is your scope.

2.5 MK350c Gaurdian Compact 1st Gen MK350c **$529.00**

The Aries 350 Guardian is the most compact 1st gen. weapon sight on the market. Measuring only 8 inches long and weighing less then 2 lbs. the Guardian is one of the most rugged yet compact scopes made. The accuracy on the 350 Guardian is unparalleled thanks to our "Red on Green" reticle system. Windage and elevation adjustments are an amazing 1/8 inch @ 100yards. Combine this accuracy with other features such as a new super fast front lens system for optimal brightness, easy push button operation, reticle brightness adjustment and our new detachable, most powerful in the industry 450mw infrared illuminator and you have one of the best 1st gen. scopes made. If you are looking for a small, lightweight inexpensive night vision weapon sight then the 350 Guardian is the scope for you.

4X MK390 Paladin 1st Gen MK390 ..... **$579.00**

We started by improving the optical configurations which lowered the F-stop factor and increased optical resolution. By doing this, more light travels through the lens to the tube. More light and better resolution simply means brighter and sharper image. Then we added our precision "red on green" aiming system, easy push button operation, reticle brightness adjustment and the new detachable, most powerful in the industry 450mw infrared illuminator with dedicated windage and elevation adjustments. Our new Aries 390 Paladin is the best 1st. generation scope on the market.

3X MK6800c Defender II Compact 2nd Gen, MK6800c **$1429.00**

The c in 6800c, stands for compact. The Aries Defender is one of the most compact high-end night vision scopes you will ever find. Utilizing either a top grade US 2nd Gen. light intensifier tube the Defender has an extremely sharp resolution and brightness. This compact marvel is not a stripped down NVD it is full of features such as a new super fast front lens system for optimal brightness, easy push button operation, and a reticle brightness adjustment. Plus, it comes with our new detachable, most powerful in the industry 450mw Infrared Illuminator with dedicated windage and elevation adjustments for total darkness usage. Compact, rugged and highly accurate makes the 6800c Defender the perfect scope for the person on the move.

5X MK6900 Crusader II 2nd Gen. PS, MK6900 ..... **$1595.00**

Do you want the best NVD weapon sight on the market? If so then our new Aries 6900 "Crusader" is for you. It doesn't get any better then the Aries 6900 Crusader when it comes to performance. For the MK6900 we use a top of the line "Prime Select" US 2nd Gen. +light intensifier tube for added light gain and resolution. Combine this select tube with 5x magnification and a super fast F:1.4 lens the image that you will get out of your Crusader is unbelievable. The best optics, tubes and a 3 year warranty makes the Aries 6900 Crusader one of the best night vision weapon sights there is!

3X MK7800c Defender III Compact 3rd Gen, MK7800c **$1949.00**

The c in 7800c stands for compact. The Aries Defender is one of the most compact high-end night vision scopes you will ever find. Utilizing a high end US 3rd gen light intensifier tube, the Defender has an extremely sharp resolution and brightness. This compact marvel is not a stripped down NVD it is full of features such as a new super fast front lens system for optimal brightness, easy push button operation, and a reticle brightness adjustment. Plus, it comes with our new detachable, most powerful in the industry 450mw infrared illuminator with dedicated windage and elevation adjustments for total darkness usage. Compact, rugged and highly accurate,the 6800c Defender is the perfect scope for the person on the move.

5X MK7900 Crusader III 3rd Gen, MK7900c **$2195.00**

Do you want the best NVD weapon sight on the market? If so then our new Aries 7900 "Crusader" is for you. An upgrade from the 5X MK6900 model - the MK7900 uses a top of the line "Prime Select" US 3rd Gen.+ light intensifier tube for added light gain and resolution.

3X MK8800c Defender IV Compact 4th Gen, MK8800c **$4975.00**

The c in 8800c stands for compact. The Aries Defender is one of the most compact high-end night vision scopes you will ever find. An upgrade from the 3X MK7800c with a high end US 4rd gen light intensifier tube the Defender has an extremely sharp resolution and brighness.

5X MK8900 Crusader IV 4th Gen MK8900 ..... **$4995.00**

Do you want the best NVD weapon sight on the market? If so then our new Aries 8900 "Crusader" is for you. An upgrade from the 5X MK7900 model, the Aries 8900 Crusader uses a top of the line "Prime Select" US 4th Gen.+ light intensifier tube for added light gain and resolution.

Spotting Scopes, Binoculars and Goggles

1.5X Night Star Super Compact Monocular 1ST Gen.
NS1 ..... **$185.00**

Do not let darkness impair your vision for a moment longer. Whether you are camping, boating, observing wildlife or surveying your property for intruders there is always a need to see in the dark. That's why at ATN we are proud to offer the perfect night vision device, the NightStar. Why is it perfect, you might ask? The answer is simple. The NightStar provides the user with superior clarity and a high light gain allowing the customer to see clearly even on the darkest of nights at a minimal cost. The unit comes standard with our Total Darkness Technology that allows you to see even in the darkest of conditions. The NightStar is perfect for camping, boating, or home security. Get out of the dark and into the light with the NightStar.

3X Night Leopard High Res. Monocular 1ST Gen, NL1 .... **$219.00**

A new super fast lens system combined with a high resolution Gen. 1-Plus light intensifier tube gives the user an unparalleled bright image in a 1st gen. night vision device. Easy push button controls, 3x magnification and a built-in infra-red illuminator for viewing in total darkness are just a few of the features this scope packs. If you want a compact, high quality night vision monocular then look no further then our new Night Leopard!

American Technologies Network
NIGHT VISION

3.5X Night Storm Waterproof Monocular 1ST Gen. NSTRM1 $249.00
The NightStorm® is a rugged hand held spotting scope. Available in 1st and 2nd generation the Night Storm is one of the best monoculars made. Quality was our number one priority when we created the Night Storm. By using an all glass revolutionary F1.2 lens we were able to achieve an amazing 98.5% light transmission. What this means is that we were able to create a unit with the brightest and sharpest image available. Plus, the Night Storm is 100% waterproof and if dropped in the water it will float for easy recovery. Strict standards and precision manufacturing have brought to you a rugged yet lightweight, waterproof night vision device, which provides superior optical calibration at an economical cost. Comes with 1.5x lens for brighter image and wider field of view.

3X Compact Monocular 1st Gen NZT-35 $169.00
3.1x magnification all glass lens system combined with a high quality 1st generation + light intensifier tube gives you a bright and sharp image in any dark situation you may find yourself in. A free long-range infrared illuminator is also included to let you see even in total darkness.

5X Monocular 1ST Gen NZT-6 ..... $269.00
The NZT-6 night vision spotting scope comes standard with an impressive 5x magnification all glass lens system. Combine this lens system with a high quality 1st generation + light intensifier tube and you have a fantastic night vision spotting scope. A built-in long-range infrared illuminator is also included to let you see even in total darkness.

4X Night Jaguar Dual IR Binocular 1ST Gen NJAG $439.00

The Night Jaguar is the latest in night vision binoculars. A comfortable ergonomic design makes the Night Jaguar one of the best-looking Night Vision Binoculars on the market. However, since looks aren't everything we used two top of the line 1st gen plus light intensifier tubes with super fast optics to make the Night Jaguar the best functioning 1st gen binocular there is. New dual illuminator! With a push of a button you can select either a short range wide illumination or super long range mode.

1X Viper 1 Goggle 1ST Gen VIP1 ..... $269.00
Designed primarily to be a goggle system for hands free application, this unit can also be used as a compact monocular or can be attached to a camera for night time photography. This high resolution 1st Gen.+ night vision unit comes with 1x magnification, but has the option of being 4x or 8x. Surprisingly, even though we gave the Viper a heavy coated glass lens, we were still able to keep its weight down to only nine ounces. So for any activity you plan on doing which requires night vision and hands free operation, the Viper delivers superior results.

#22M68H Spacer $7.95

Comp Mount Modular Full Spacer
#22M68F Spacer $7.95

Multibase Flattop Mount
#5 ..... $69.95

A.R.M.S. Repeat Zero Guarantee

Why the Repeat Zero Guarantee? The spring loaded cammed lever pulls in a downward force when the lever is pushed inward, which does not disturb the windage (azimuth) normally encountered with thumbnuts, bolts, wrenches, and/or ratchet knobs, all of which only secure with cross force direction and varying non-repeat tension. Because the throw levers pull down instead of across, it means positive controlled attachment not found on any other system. No threads to strip, no cross threading, ratchet wear, over tightening, crushed or dented rails when using the A.R.M.S. spring loaded attachment. A.R.M.S.® Throw Levers will not freeze or absorb sand and mud, like threaded and ratchet designs. The unique force of direction and constant repeat tension guarantee on and off repeatability to a quality standard mil-spec dimensioned dovetail rail.

Standard 30mm Scope Rings (Maximized)

30mm. Standard Height .823”
These 30mm dia., high precision, heavy duty steel rings are machined in “Matched Pairs” and serialized. Mounts to any “Weaver Style” base.
P/N 306-08 ..... $139.95

30mm. Medium Height .885”
These intermediate size rings meet the growing demand for more mounting options required by scopes like the Nightforce 50mm NXS and Leupold Long Range 50mm SIde Focus scopes.
P/N 306-20 ..... $139.95

30mm. Medium Height 1.00”
Intermediate size rings to meet the growing demand for more mounting options required by scopes like the Nightforce 56mm NXS and European 56mm scopes.
P/N 306-21 ..... $139.95

30mm. High 1.125”
All rings are high precision, heavy duty steel machined in “Matched Pairs” and serialized. High enough to accommodate and adjustable objective and / or flip up lens covers.
P/N 306-09 ..... $139.95

30mm. Ultra High (AR-15) 1.400”
Mil-Std-1913 compatible (Picatinny optic mount) designed for use with flat top AR-15 and AR-10 type rifles.
P/N 306-10 ..... $139.95

Scope Ring Reducer
Reduces 30mm Std. Maximized rings down to 1 inch.
P/N 306-12 ..... $29.95

Standard 34mm Rings (Maximized)

34mm. Maximized Scope Ring, Medium High Height 1.00”
These 34mm dia., high precision, heavy duty steel rings are machined in “Matched Pairs” and serialized. Mounts to any “Weaver Style” base. Special made for the 34mm Schmidt and Bender Tactical Scopes.
P/N 306-14 ..... $159.95

Maximized Lugged Scope Rail

Remington Short Action - For Slotted Actions Only. Bottomed lugged for clip slotted actions only! This “Picatinny” spec. one piece mount is machined from 4142 pre-hardened (28-32Rc) steel. A Mil-Std-1913 slot pattern for more mounting options and a 20 MOA. Forward cant for extended range. Uses Badger's Maximized rings or any “Picatinny” compatible ring. 1/2” longer for night vision options.

Maximized Scope Rail, Short Action, Remington 700
One Piece for Round Rear Bridge Only
P/N 306-06UX $159.95

Maximized Scope Rail, Short Action, Remington 700
One Piece for Flat Rear Bridge Only
P/N 306-06U $159.95

Maximized scope rails

This “Picatinny” spec. one piece mount is machined from 4142 pre-hardened (28-32Rc) steel. With it’s integral recoil lug, A Mil-Std-1913 slot pattern for more mounting options and a 20 MOA. forward cant for extended range. Uses Badger’s Maximized rings or any “Picatinny” compatible ring. All Badger Bases have a 20 MOA forward cant, this helps to add range to the scope and allows full advantage of the rifles range.

Max-50 30mm Rings - Extra Wide - 6 screws per ring

30mm. Standard Height .823”

The MAX-50 rings are ONE Inch wide, giving them 60% more holding power than any other ring available. Utilizing 6 #8-40 Torx® screws to distribute the load providing the maximum amount of holding power while minimizing the chance of damaging the scope. Machined from steel as “Matched Pairs” and serialized. Mil-Std-1913 compatible (Picatinny optic mount) designed for the demanding .50 BMG round. Works with any “Weaver Style” bases.
P/N 306-11 ..... $149.95

30mm. High 1.125”
Made for scopes with an objective up to 65 mm. or for applications where the standard Max-50 is not high enough.
P/N 306-13 ..... $149.95

MAX-50 Ring Reducer
Made specifically for MAX-50 rings, reduces 30mm rings down to 1 inch.
P/N 306-15 ..... $39.95

Standard Rings

Burris rings and bases have long been favorites of custom gunmakers because of their strength, beauty and fit. It's easy to recognize Burris' leadership role in scope mounting systems when you consider the myriad of innovative designs and manufacturing processes that result in rock-solid performance. Each ring is made from a solid piece of steel with the top and bottom half perfectly mated. Zee rings with no moving parts are the best fitting and most positive gripping Weaver-style ring made. Signature rings are the most significant technological advancement in scope mounting history.

30mm Signature Zee Rings

1 Inch Signature Pos-Align Offset Ring Inserts

Signature Rings also accept Pos-Align Offset Inserts so you can virtually sight-in your gun without moving the scope adjustments. Lens systems perform at their optimum when all lenses are optically centered. By keeping the internal optics centered, you'll see through the scope all of the clarity, sharpness, and brightness that the optics designers intended for you to see. The offset inserts also correct for any mis-alignment caused by receiver holes drilled off center, or the bases or rings being slightly off perfect center. And for you 1000 yard and other long range shooters, the need for expensive tapered bases or shimming becomes a hassle and expense of the past.

Signature Pos-Align Offset Insert Kit
One Insert Each of +/- .005", +/- .010", +/- .020"
626019 ..... $11.95

* Requires low rear ring and medium front ring.

Ring Codes
SL = Super Low Ring
L = Low Ring
M = Medium Ring
H = High Ring
XH = Extra High Ring
F = Front Ring
R= Rear Ring
MXX = Medium Extension Front & Rear
X = Extended Ring
* = Low rings can be used on non-posi-lock model Example MXF = Medium Extension Front

Base Codes
SU = Supreme Universal Base (dovetail front, windage adjustable rear)
LU = Long Eye Relief Base (dovetail front, windage adjustable rear)
EXT = Extension Front Base (1" longer than standard, reversible)
DD = Double Dovetail (dovetail front and rear)
TU = Trumount Universal Base (dovetail front, windage adjustable rear)
LA = Long Action SA = Short Action LH = Left Hand

Notes:
Some rifles with heavy/varmint barrels may require one size higher rings. Fits will vary depending on gun modifications and shooting posture. All Posi-Lock models require medium rings instead of low rings on all one-piece bases.

LEUPOLD

With Leupold QR™ Mounts you can mount a scope, zero it, remove it, reattach it, and remain nearly dead-on with your original point of impact. The key is precise machining of the patented lever mechanism. Turning the lever forward engages the base of the ring, pulling the ring down and forward, locking it into its "zero" position.

How well does it really work? During 100-yard firing tests in our Beaverton, Oregon, factory we repeatedly removed and reattached a scope to a rifle using our QR Mount, firing the rifle after each time. Every time the scope was within just half an inch of the original point of impact on the target.

Leupold offers a complete line of steel cross-slot mounts—the Leupold QRW™ and PRW mounts. Use the QRW mounts for detachable accuracy. They use an adjustable lever mechanism to lock the rings securely to the base. When mounted, simply rotate the spring loaded levers into the desired position to keep them out of the way. Use the PRW mounts when a cross-slot format is desired or necessary but detachability isn't. Leupold PRW rings secure directly to the base with two screws for rock solid dependability.

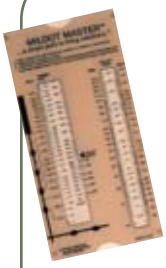
O.P.S. FN Police Sniper, Matte Steel, Picatinny, 1 Piece Base, with 20 MOA Cant
FN-WIN20 ..... $149.95

O.P.S. - Mounts are all Mil-Spec



Mil-Dot Master

The Mildot Master® is an analog calculator designed for performing the following operations: Rapid calculation of range to target, based on a measurement of the target with a mildot reticle. Simple calculation of the amount of sight correction necessary to compensate for bullet drop and/or wind drift for a given range. Additionally, angle of fire for uphill or downhill shots can be accurately measured, and the up/down compensation can be closely calculated to reduce errors.
MD1 ..... $29.95

SPRINGFIELD ARMORY®

These advanced scope mounts are as rugged as a blacksmith's anvil. Strong, durable mounts quickly attach in seconds with two massive screws to the M1A receiver. The design assures positive zero-retention, even when the mount is removed and replaced countless times. The tough Third Generation mount also allows the use of the M1A's standard iron sights. Accepts both Picatinny and Weaver style rings.

Extra Battery for Springfield Illuminated Reticle Scopes

SWFA RifleScopes.com WANTS YOU!

To win your share of $10,000.00 worth of Prizes

Including the Grand Prize, a Leica Ultravid 10x42 Binocular valued at over $1,500.00

The rules are very easy making it possible for anyone to win. Basically, you take a picture that includes a product you bought from us and submit it along with a story, the best picture and story combination wins the Grand Prize. Pictures can be anything from hunts, vacation, sporting events, races, it does not matter as long as the product you purchased from us is in the picture and has relevance in the story. You must be in our data base as purchasing the product on or after Sept. 1, 2003 and most importantly that product must be in the picture you submit. Contest ends at midnight Jan. 31, 2004. Ten finalists will be named at that time. Once the ten finalists are selected the general public will begin voting Feb. 1, 2003 – Feb. 29, 2003. Places 1 -10 will be determined on the amount of votes received per finalist.

For a complete entry form visit www.RifleScopes.com

The finalist are guaranteed one of the ten prizes that include a (1) Leica 10x42 Ultavid binoculars, (2) Burris Fullfield II 3.5-10x50 Illuminated Ballistic Plex, Burris Signature 10x50 binocular and Burris Landmark 20-60x80 spotting scope, (3) Leupold 3.5-10x40 VariX-III, Leupold 10x42 Cascades binocular and Leupold 15-45x60 Wind River Sequoia spotting scope, (4) Super Sniper 10x42 Side Focus, Super Sniper Anti-reflection device, Super Sniper sun shade and a Mil Dot Master, (5) Zeiss Conquest 3-9x40 and Zeiss Conquest 8x30 binocular, (6) Bushnell Elite 3200 5-15x40 and Bushnell Yardage Pro-Legend laser range finder, (7) Swarovski 8x30 SLC binocular, (8) Nikon 10x40 Monarch binocular and Nikon Coolpix 3100 Digital Camera , (9) Steiner 9x40 Big Horn Binocular, (10) Gamo Silver Shadow Supreme .177 air rifle with a BSA 3-12x50 air rifle scope.

Kyle Bradford from Alaska and his Leica Binoculars.

All photos will not be returned and become the property of SWFA to be used in future promotional material as desired. Winners announced February 2004.

the brand new Leica 10x42 Ultravid.

Talley Manufacturing, Inc.

CNC automated equipment and stringent quality control have vaulted Talley products to the top of the scope ring industry. Simply put, Talley scope rings are the best.

Talley Standard Two Piece Bases

Talley Bases are machined from solid bar stock with a double recoil shoulder design that holds your scope with absolute rigidity under severe recoil. Bases checked and rechecked prior to shipping to ensure the best fit possible to your firearm. Talley only makes one base and it fits both Fixed rings or Quick-Detachable rings.

Winchester Model 70 Pre-64 Long Action Magnum Calibers
435 rear whole spacing
252704 ..... $19.95

Winchester Model 70 Pre-64 Long Action Magnum Calibers
.330 rear whole spacing
252701 ..... $19.95

Winchester Model 70 Standard Calibers Including Short Mags
.860 rear whole spacing
252702 ..... $19.95

Remington Model 700 All Calibers
252700 ..... $19.95

Weatherby Mark V Magnum Calibers
252705 ..... $19.95

Weatherby Light Weight
252706 ..... $19.95

Browning A-Bolt and Steyr SBS
252000 ..... $19.95

Talley Standard Fixed Rings

The Fixed Ring is for the shooter who prefers the sleek profile of a non-detachable vertically split ring. Using larger screws and no moving parts, this system is extremely rigid. Double recoil shoulder ring base will stand up to any and all magnum calibers.

1" Low Standard Rings 100003 ..... $59.95
1" Medium Standard Rings 100004 ..... $59.95
1" High Standard Rings 100005 ..... $59.95
30mm Low Standard Rings 300003 ..... $59.95
30mm Medium Standard Rings 300004 ..... $59.95
30mm High Standard Rings 300005 ..... $59.95

Talley Screw Lock Quick Release Detachable Rings (QD) w/Torx Screw

Talley's Quick-Detachable Rings are famous for precise tolerances. QD ring system provides repeatability, flexibility, strength, and durability for the most discriminating of sportsmen. Repeatability allows you to remove and replace your scope with the confidence that it will return to zero. Flexibility allows you to carry more than one pre-sighted scope for your firearm, and also provides ease of removal for your scopes during travel.

The Talley Quick-Detachable System is as strong or stronger than any fixed system available. Guaranteed. Talley Quick-Detachable Rings are very simple. Talley mounts lock up as solidly as a fixed system.

The screw-lock detachable system will hold your scope firmly under the toughest of conditions and maintain its zero every time you replace it. All Screw Lock QD rings can be easily converted into a "throw lever" design by purchasing the options levers.

Ring Height Selection Guide:

Low for scopes up to 44 mm objective with standard barrel contour.
Medium for scopes up to 50 mm objective with standard barrel contour.
High Ring for scopes with a 56 mm objective with standard barrel contour.

1" Low QD Rings w/Torx 200003 ..... $74.95
1" Medium QD Rings w/Torx 200004 ..... $74.95

NOTES

32-3946M Elite® 3200 with Firefly reticle; 3-9x40
Featuring Patented Rainguard® Technology | New Firefly illuminating reticle

★★★★ ELITE 3200 ★★★★

ANY GOOD DEER HUNTER KNOWS DUSK IS WHEN THE DEER COME OUT.
ANY GOOD DEER HUNTER KNOWS YOU CAN'T SHOOT WHAT YOU CAN'T SEE.

SO, WHAT KIND OF DEER HUNTER ARE YOU?

There's a show that goes on most days at dawn or dusk. You're welcome to watch, but if you hope to participate — pack along the new Bushnell® Elite® 3200 riflescope with the revolutionary Firefly illuminated reticle. Just shine a flashlight on the crosshairs before heading out and they will glow when needed — no batteries required. Quite often on the side of a trophy animal. Pity those who are home eating a hot meal right now. You can bet it won't be venison.

Bushnell
Magnify Life.

SUPER SNIPER

NOTHING COMES CLOSE

Available Exclusively From:

SWFA RifleScopes.com

The World's Largest Dealer for Sports Optics

*In sub-zero temperatures or searing desert heat (-50°F to +130°F and altitudes of 30,000 feet to depths of 15 feet in salt water) the waterproof, shockproof, fog-proof SUPER SNIPER® performs. Whatever the weapon, from .223 to .50 BMG, the SUPER SNIPER® handles the recoil. Whatever the target, the SUPER SNIPER® gives you the best advantage.
