Aimpoint.

Any Other Sight Is Pointless

Aimpoint red dot sights are the original red dot sights. Aimpoints have the widest field of view, are 100% parallax free, and are waterproof and shockproof. You do not have to center the dot, you hit where you aim. They are available in two dot sizes, 4 minute of angle (M.O.A.) = 4" @ 100 yds for precision shooting and 2 minute of angle = 2" @ 100 yds in the 2x versions. Aimpoints have no eye relief so they work on handguns, rifles, or shotguns.

Aimpoint's electronic reflex sights are manufactured using a unique patented double front lens which eliminates the parallax error inherent in other red dot sights. This feature allows the shooter to get on target more quickly and shoot more accurately, because the dot does not need to be centered inside the sight.

Aimpoint's both-eyes-open, heads-up display generates rapid target acquisition and unequaled accuracy. By superimposing the red dot on the target, the shooter is mentally freed from his position behind the firearm. The physical adjustments a shooter must make with his body and his firearm, adjustments which require precious time and energy, become second nature with an Aimpoint. Aimpoints are parallax free, a result of Aimpoint's patented double-lens system. You will appreciate the confidence of knowing that with an Aimpoint, you will hit whatever is under the red dot. The dot does not have to appear in the center of your view. If the dot is on it, then you will hit it.

This concept seems impossible but if you think about it you will understand how it works. The scope has no parallax or eye relief, so it will appear that the dot is not in the center sometimes but actually the dot is always in the center. It is the way that you look through the Aimpoint that changes. Unlike a conventional scope that requires that you be perfectly aligned directly behind the unit, you can look through an Aimpoint and shoot from any position and this is what makes the dot appear to "float" when actually it never leaves the center.

The U.S. Army signed a contract with Aimpoint guaranteeing the purchase of 80,000 (with the option of purchasing an additional 20,000) Aimpoint Comp M electronic reflex sights and associated mounts for the M16A2 rifle and M4A1 carbine. Aimpoint sights now become the primary aiming systems for these two military firearms. As the choice of the U.S. Army and elite forces around the world, Aimpoint sights offer high performance, military-proven technology and rugged durability. Aimpoint's both-eyes-open, heads-up, rapid target acquisition and superior accuracy deliver unmatched precision for a variety of applications.

After 18 months of rigorous testing, only one red dot sight earns the U.S. Army's seal of approval - AIMPOINT! The U.S. Army dropped, baked, froze, and submerged sights from leading manufacturers during an eighteen month testing period to determine which sight could withstand the most punishing military conditions. After outscoring the competition in both operational and developmental testing, Aimpoint sights are the only sights chosen for the U.S. Army contract. Aimpoint sights are not only the choice of the U.S. Army, but the U.S. Special Forces, the Federal Bureau of Investigations, S.W.A.T. teams, and elite military units around the world.

Aimpoint U.S. Army Contract Models

U.S. ARMY APPROVED

Comp ML2

Comp M2 - 2x

2 M.O.A. Comp M2-2x Magnification (Night Vision Compatible) (CET)
10582.....**$526.99**

The successful CompM2 & CompML2 family of red dot sights and mounting systems for small calibre firearms such as pistols submachine guns and assault rifles have set a new standard for advanced sighting systems.
Specially modified variants of the CompC designed to meet military requirements; these sights are used by many armies and Special Forces around the world.
This sight has a special hard-anodized surface and the specification for water tightness is equivalent to a depth of 75 feet. The high quality requirements are designed to cope with frequent professional use on those types of guns that are typically used by the police and the military or for hunting under extreme conditions.
The CompML2 is a day sight and is therefore not compatible with Night Vision Devices (NVD). For night vision compatibility, look for the CompM2 model instead. In all other aspects, the CompML2 and the CompM2 are identical.

Features

- Unlimited field of view
- Parallax- free – No centering required
- Day sight only
- Unequalled light transmission
- Increased aiming confidence
- Submersible to 25 meters (70ft)
- No radioactive components
- Unaffected by sub-zero temperature
- CETechnology gives up to 10 years of hunting on one battery

2 M.O.A. Comp ML2-2x Magnification (CET) **10583**.....**$469.99**
Features

4 M.O.A. Comp ML2 (CET) **10338**.....**$359.99**

4 M.O.A. Comp M2 (Night Vision Compatible) (CET)
10336.....**$399.99**

4 M.O.A. Comp C **10332**.....**$318.99**

Designed for whenever a compact sight is required, the CompC is the lightest sight in its class, which means it is perfect for pistol shooting, turkey hunting and any situation where close conditions demand extreme accuracy and speed.
The CompC is supplied with a 30 mm wide ring that fits all Weaver bases. This sight is ideal when a short mounting base is required as the total length of the sight is only 4". This makes the CompC particularly desirable whenever a lightweight, compact sight is required, such as for use on a "scout" rifle, carbine, or competition pistol.

Features

- Unibody construction - virtually indestructible
- Ideal for use on a scout rifle, carbine or competition pistol
- Special 30 mm wide ring that fits all Weaver bases is supplied
- Unlimited field of view
- Parallax-free - No centering required
- Fogproof and submersible to 2 meters (7ft) water depth
- CETechnology gives up to 10 years of hunting on one battery

7000 SC, 4 M.O.A 10953 ..... $289.99

Features
- Fogproof and waterproof to 2 meters water depth
- Unaffected by sub-zero temperatures
- Hybrid design with features from 7000L and CompC sights
- Unprecedented mounting flexibility
- Suitable for firearms with shorter actions, for semi-automatic firearms and magnum handguns
- Unlimited field of view
- Parallax-free - No centering required
- CETechnology gives up to 10 years of hunting on one battery

7000 SC SM, Silver, 4 M.O.A 10955 .... $289.99

7000 SC SM, Silver, 7 M.O.A 10956 .... $318.99

7000 SC 2x, 2 M.O.A 10979..... $379.99
The Aimpoint 7000SC 2X is identical to the 7000SC model, but is equipped with a fixed 2-power lens system that provides low magnification for increased range while maintaining unlimited eye relief and rapid target acquisition. This sight can be used with virtually all 30 mm ring systems.

Comp C, Matte, 4 M.O.A 10332..... $318.99

Features
- Unibody construction - virtually indestructible
- Ideal for use on a scout rifle, carbine or competition pistol
- Special 30 mm wide ring that fits all Weaver bases is supplied
- Unlimited field of view
- Parallax-free - No centering required
- Fogproof and submersible to 2 meters (7ft) water depth
- CETechnology gives up to 10 years of hunting on one battery

Comp C, Matte, 2x 10581..... $415.99
The Aimpoint® CompC 2X is identical to the CompC model, but is equipped with a fixed 2-power lens system that provides low magnification for increased range while maintaining unlimited eye relief and rapid target acquisition.

7000 SC SM, 4 M.O.A. 10955..... $289.99
This is the favorite of deer hunters, who know that dense vegetation, low light conditions and rapid target movements demand instant accuracy. The 7000SC both-eyes-open view cuts target acquisition time in half.
The Aimpoint 7000SC is a hybrid design incorporating features of both the 7000 and Comp families of Aimpoint® sights. The fusion of the short front tube, compact body and long rear tube allows unprecedented mounting flexibility. This sight is suitable for firearms with shorter actions and for semi-automatic firearms as well as magnum handguns.
This sight can be used with virtually all 30 mm ring systems. For special applications, a 38 mm ring can be used to mount the sight by attaching directly to the objective "bell".
The only difference between the 7000SC SM and the 7000SC is the color.

Features
- Fogproof and waterproof to 2 meters water depth
- Unaffected by sub-zero temperatures
- Hybrid design with features from the 7000L and CompC sights
- Unprecedented mounting flexibility
- Suitable for firearms with shorter actions, for semi-automatic firearms and magnum handguns
- Unlimited field of view
- Parallax-free - No centering required
- CETechnology gives up to 10 years of hunting on one battery

7000 SC 2X, 2 M.O.A. 10979..... $379.99
The Aimpoint 7000SC 2X is identical to the 7000SC model, but is equipped with a fixed 2-power lens system that provides low magnification for increased range while maintaining unlimited eye relief and rapid target acquisition. This sight can be used with virtually all 30 mm ring systems.

7000L, (long), 2X, 10624 ..... $379.99
This sight is identical to the 7000L model, but is equipped with a fixed 2-power lens system that provides low magnification for increased range while maintaining unlimited eye relief and rapid target acquisition. This sight can be used with virtually all 30 mm ring systems

7000L, (long) 10622 ..... $289.99
Whether your targets are deer, moose or bear, the 7000L will deliver unmatched performance and reliability. Capable of handling big bore recoil, this revolutionary sight is the favourite of Safari hunters.
Full-length sight intended primarily for sporting rifles with standard and magnum length actions. This sight can be used with virtually all 30 mm ring systems. For special applications, a 38 mm ring can be used to mount the sight by attaching directly to the objective "bell".

Features
- Full-length sight intended primarily for sporting rifles with standard and magnum length actions
- Can be used with virtually all 30 mm ring systems
- Unlimited field of view
- Parallax-free - No centering required
- Increased aiming confidence
- Fogproof and submersible to 2 meters (7ft) water depth
- Unaffected by sub-zero temperatures
- CETechnology gives up to 10 years of hunting on one battery

BSA Sweet 17

Designed using technology similar to the sniper trajectory compensation scopes, the Sweet 17 elevation drum increments are precisely calculated to compensate for the elliptic drop of a .17 HMR/17 grain bullet.

Simply
- Zero the scope at 100 yards
- Loosen the screws of the elevation drum
- Turn the drum until the 100 yard marking matches the elevation turret indicator
- Retighten the screws.

Now you can compensate the trajectory of a bullet for any distance between 100 and 300 yards by just turning the elevation drum to the desired elevation marking.

BSA CatsEye

The BSA CatsEye has a large objective lens and camera quality glass is used to give a clear, undistorted image. The objective and ocular lenses are fully multi-coated to provide the brightest possible view. The ocular lens has a 4" to 5" eye relief without reducing your field of view. A European style reticle not only helps you to see better in low light, but it makes quick target acquisition easier. All BSA CatsEye models are made of one-piece aluminum tubing, and then covered with a Shadow Black coating. Finger adjustable windage and elevation knobs are easy to turn even when wearing gloves. Waterproof, fogproof and shockproof.
- The 4-16 and 6-24 models are 2 piece tubes.
- Shadow Black® rubber finish
- Finger adjustable windage & elevation
- Fully multi-coated optics
- European 3 post reticle
- Speed Focus ocular
- 4-5" eye relief

BSA Platinum

This is a scope that a varmint and target hunter will treasure. The optical and mechanical tolerances inside the scope are extremely close and tight so the consistency of accuracy is great. The lenses are camera quality and 1/8 MOA clicks on the windage and elevation turrets are precise. Forget about parallax problems when dialing in your distances. All the mechanics of good target scope were done right including Nitrogen filled chambers for waterproof, fog proof and shockproof.

BSA Big Cat

All the features wanted in a hunting scope: long eye relief; fully multi-coated lenses; very bright, three piece objective lens. The Big Cat has a longer eye relief, a full 5 inches, and finger adjustable windage and elevation knobs. The three piece objective lens system provides sharper resolution, better color and less distortion. And for extra brightness the lenses are 14 layer, fully multi-coated. All Big Cat models are very compact and finished in Shadow Black rubber coating which eliminates reflections and glare and resists fingerprints.

- 4-5" eye relief
- Shadow Black rubber finish
- Finger adj. windage & elevation
- Fully multi-coated optics

3.5-10x42 Matte, Plex BC3510X42..... $129.95

BSA Deer Hunter

The black textured finish on BSA Deerhunter scopes eliminates any bright reflections and covers the entire scope, even the turret caps. They have fully-coated optics and finger adjustable turrets for windage & elevation and one piece, 1" tube construction.
The BSA Deer Hunter model DH39X40IR has an illuminated reticle with 11 brightness settings and ocular speed focus. It has a rugged textured finish and is fog proof, waterproof and shockproof. Comes with a standard 3V lithium battery.

- Black matte textured finish
- Fully coated optics
- Finger adjustable windage & elevation
- Fogproof, shockproof, waterproof
- One piece 1" tube
- Standard BSA reticle

Burris Signature Select Series

Higher magnification Signatures really outshine the competition because of the image quality and brightness rendered at the highest magnifications. And, with the Burris-patented Light Collector on the 4X-16X, 6X-24X, and 8X-32X, you get to control the amount of light entering the scope. You get full use of the available light in low light situations, yet you can reduce the amount of bad light (glare) from entering the scope when your target may be between you and a setting or rising sun. Under varied field conditions, this feature allows you to optimize image sharpness, contrast, and depth of focus.

Burris Black Diamond

Burris' customers have repeatedly asked us to incorporate a side focus on these scopes for convenience, so this year they've brought out three magnification ranges with their new side focus parallax adjustment. While they were at it, they streamlined them a bit, made them a bit shorter, significantly lighter weight, and they can be mounted lower on a rifle. But other than that, they didn't change much. Of course they left the other features alone such as the famous image brightness, clarity, resolution, finger-adjustable and resettable adjustment dials, generous 3 1/2" to 4" of eye relief, durability, and value.

Burris Euro Diamond

Burris designed this exciting, new line of 30mm riflescopes especially for low light hunting situations. They combined optical and mechanical excellence with a collection of hunter friendly ergonomics and sensuous lines in a package that promises to give the pricey European brands a new standard to shoot for. The reticle is in the second focal plane so it does not get larger like European scopes.

$20,000.00 PHOTO CONTEST

The rules are very easy making it possible for anyone to win. Basically, you take a picture that includes a product you bought from us and submit it along with a story, the best picture and story combination wins the Grand Prize. Pictures can be anything from hunts, vacation, sporting events, races, it does not matter as long as the product you purchased from us is in the picture and has relevance in the story. You must be in our data base as purchasing the product on or after Sept.1, 2003 and most importantly that product must be in the picture you submit.

Contest ends at midnight Jan. 31, 2005. 36 finalists will be named at that time. Once the 36 finalists are selected, the general public will begin voting Feb. 1 – Feb. 29, 2005. Places 1-36 will be determined on the amount of votes received per finalist.

For a complete entry form visit www.RifleScopes.com

The finalist are guaranteed one of the 41 prizes that include:

Leica Geovid 10x42 BRF 1300 yard Laser Rangefinding Binocular. Burris Fullfield II 3-9x40 Matte, Ballistic Plex w/ 20x50 LandMark Compact Spotting Scope, Burris Large Window Mount. Burris FullField II

For almost 30 years now, the name Fullfield has represented the ideal combination of optical and mechanical performance with affordability. Recent enhancements which spawned the Fullfield II generation only serve to further the line's reputation for rugged dependability and optical accuracy. A few of the Fullfield II's notable features include more forgiving fore/aft, left/right eye positioning and a combination of lighter weight, shorter length and added strength.

Fullfield II eliminated most of the potential leak paths in the eyepiece/power ring area and sealed the remainder with special quad seals instead of O-rings. The adjustment system has been moved to improve mounting options and the European-style adjustable eyepiece requires no locking mechanism.

Bushnell Banner

Featuring Dusk & Dawn Brightness (DDB) multi-coated lenses for clarity and brightness in low light, you'll add precious minutes to every hunting day with the Banner Dusk and Dawn series. A fast-focus eyepiece and wide-angle field-of-view let you acquire and follow game easily - even in low light. The one-piece tube design ensures reliable performance and the fully waterproof construction protects your investment. The Banner Dusk and Dawn line includes a full assortment of specialty scopes for big game, varmint, .22 rimfire, slug, black powder and turkey hunting.

Bushnell Sportsman

Sportsman riflescopes feature multi-coated optics for reliable viewing from early morning to last light. Standard features include one-piece, 1"-tube construction for reliability, a fast-focus eyepiece and 1/4 M.O.A. fingertip windage and elevation adjustments. The easy grip power change ring makes switching between magnifications simple. Of course, like all Bushnell riflescopes, your Sportsman scope is designed to endure the elements. And the price tag? Let's just say the scope isn't the only thing that looks good.

3-9x32 Silver Finish, Multi-X 721393S .. **$39.95**

Bushnell Rimfire and Airguns

Varmints, small game and any aluminum can that happens to find itself atop a fence post, take note: Designed specifically for .22 rimfire rifles, the Bushnell Rimfire Scopes are the premier in small-caliber accuracy. Each is engineered with 50-yard parallax settings and includes fully coated optics for low light shooting, and an easy-grip power change ring. The full-size, one-piece, one-inch tube is waterproof and fogproof. 1/4 M.O.A. fingertip windage and elevation adjustments make fine tuning your accuracy simple. All told, you won't find a better scope for your rimfire rifle. Come to think of it, you won't find a better one for the price, either.

BUSHNELL HOLO sight

Lauded by experts as one of the most innovative gunsights ever made, the advanced holographic technology found within our HOLOsight lets you bead up on a target as quickly as you can raise your gun. It's that fast. HOLOsight projects the appearance of an illuminated crosshair 50 yards in front of your gun, yet no forward light is projected. Sight from any distance behind the gun without taking both eyes off of the target. Offers unlimited eye relief and an unlimited field-of-view.

Holosight Compact With Standard Reticle
510021 ..... **$248.99**

Bushnell

ELITE® WITH RAINGUARD®

Introducing RainGuard, the revolutionary new lens coating system which increases light transmission to 95% on 4200 series and is now available exclusively on Elite Riflescopes. RainGuard is a special water repellent coating on which condensation forms in much smaller droplets when the scope is exposed to rain, fog or snow. These droplets result in a much clearer and more usable view. Water actually sheets off of RainGuard coated lenses much more readily than from a standard coating. Now, the hunter will not miss the shot of a lifetime because he accidently breathed on his scope eyepiece while aiming. At 95% light transmission, these 4200 series scopes rank the brightest in the world, which lets you see your target better in low light. Bushnell is so proud of their BUSHNELL ELITE riflescopes that their materials and workmanship are warranteed to be free of defects for the life of the ELITE riflescope. The warranty is available to any owners of the ELITE riflescope. No receipt or warranty card is required. This warranty does not cover damages caused by misuse or improper handling, installation or maintenance of the riflescope.

FireFly Glowing Reticle

When you see a trophy your eyes light up. Now you'll have the scope to match. Developed by Bushnell® engineers especially for the lowest light hunting situations, the new FireFly™ reticle illuminates the cross hairs after only a quick 10 second charge with a flashlight. Unlike battery-powered reticles - which often fail at the absolute worst times - the FireFly reticle will glow green and you will see your crosshairs against the animal. Look for the exciting new FireFly reticle on select models of our Elite 4200 and 3200 riflescopes. It's the pinnacle of reticle innovation.

ELITE® 3200 WITH RAINGUARD®

The Elite 3200 offers multi-coated optics for generous light transmission and crisp image quality. To prevent light distortion from moisture, the exclusive, patented Rainguard lens coating reduces large drops of water into near-microscopic specks. Scattering far less light, their significantly smaller size results in dramatically increased light transmission and a remarkably clearer image in wet weather (including condensation from your own breath). Like the Elite 4200 the Elite 3200 riflescopes also feature ultrastrong, one-piece hammer-forged aluminum and titanium alloy tubes which are 30% stronger than standard aluminum scopes. They are also recoil-tested to 1000 rounds of a .375 H&H Magnum. With 1/4 M.O.A. fingertip, audible/resettable windage and elevation adjustments, the 3200 offers everything the most avid and discriminating hunter requires.

ELITE® 4200 WITH RAINGUARD®

Bar none, it's the brightest scope in the world. Boasting 95% light transmission at 550nm, this is the top-of-the-line riflescope. The exclusive, hydrophobic Rainguard lens coating, which disperses condensation into microscopic specks, allowing you to literally see around the moisture ensures you won't miss that trophy buck because you breathed on your eyepiece or you couldn't wipe the rain away in time. All optical lens surfaces are fully multi-coated for the absolute maximum light transmission and the sharpest image. Fingertip, audible/resettable 1/4 M.O.A. adjustments make windage and elevation tuning quick and easy. The ultra-strong one-piece tube is hammer-forged from an aluminum and titanium alloy for 30% more strength than standard aluminum scopes - and to be sure it lasts, it is recoil-tested to 10,000 rounds of a .375 H&H Magnum! Finally, the Elite 4200 scopes offer some of the largest magnification ranges in the industry for optimum versatility in the most challenging hunting situations. In the world of big game pursuit, there are hunters - and there are serious hunters. If you consider yourself the latter, the Elite 4200 is the scope that does justice to your commitment.

Bushnell Legend

The outstanding fully multi-coated optics provide an impressive 91% light transmission, giving you a scope that's not only tough, but packs the performance youd expect. With 100% waterproof, fogproof and shockproof construction, it can withstand those long, often treacherous, hikes through wild terrain and still provide you with a clear, bright image. Rounding out the Legend's performance features are a 31/2" eye relief, fast-focus eyepiece, 18'- to 36'-wide field-of-view for instant target acquisition and the confidence of knowing your scope won't fail at a key moment

DOCTER®
SPORTS OPTICS

DOCTER scopes bring you the ultimate in quality, brilliant clarity and superb German construction. Our lenses have a well-deserved reputation for being among the best in the world, providing unsurpassed brilliance, razor-sharp definition, and clarity from edge-to-edge of the entire viewing field. We invite you to compare the quality of DOCTER Sports Optics with other sporting optics. There is no better way to demonstrate why each of our rifle scopes is backed by a Limited Lifetime Repair Warranty – your assurance of a lifetime of trouble-free use.

ELCAN Optical Technologies

ELCAN High-Mag

The ELCAN HI-MAG Optical Sights search out those long range targets by providing a crisp, clear, magnified optical image of 6 power or 10 power. The designs are based upon the in-service ELCAN optical sight and provide a rugged sighting system for various applications. These high magnification optical sights are intended for the expert shooter, marksman category, namely Special Forces, Snipers and SWAT teams.

Features:

- Field-proven optical sight concept
- Tritium-illuminated reticle or LED battery powered
- Excellent high-magnification optical performance.
- Fully shock-protected optics

6x48 High-Mag Tactical Scope for .223 Comes standard with Picatinny Style Mount ELCH6223 ..... $1342.95

6x48 High-Mag Tactical Scope for .308 Comes standard with Picatinny Style Mount ELCH6308 ..... $1362.95

ELCAN Mounts and Accessories

Easily and quickly convert your existing ELCAN to fit any .223, .308 or .50 BMG rifle by purchasing additional "quick change" mounts with built in bullet drop compensation.

Mount Assembly for .223
ELC223MT $229.95

Mount Assembly for .308
ELC308MT $279.95

Mount Assembly for .50 BMG
901980-001 ..... $299.95

ELCAN M145

The Elcan M145 combines Elcan's legendary robustness and optical brilliance with a ballistically calibrated LED-illuminated Ranging reticle. Designed for application to Machine Guns and M4 carbines, it is in wide service with the United States Army (NSN 1240-01-411-6350) andhas been proven to withstand the rigors or modern combat.

3.4x28 Tactical Scope for .233 M249 and M240B SAW (Squad Automatic Weapons) Belt Fed Machine Guns. Comes standard with QR Picatinny Style Mount ELCM145C $1199.95

3.4x28 Tactical Scope for .223 M4 and any AR15 Variant, 500-1200 Meter M4 Reticle. Comes Standard with Picatinny Style Mount ELCM145M4 ..... $949.95

specterIR
Protective IR Optics by ELCAN

SpecterIR by ELCAN

Introducing SpecterIR by ELCAN; the first affordable thermal weapon sight designed specifically for homeland security, police and security professionals. SpecterIR uses heat imaging technology previously only available for military applications and offers true "see in-the-dark" infrared capability. Intended for hand-held or weapon mounted use, this simple-to-operate passive infrared sight can see what the human eye cannot. Darkness, rain, fog, dust and smoke are rendered completely transparent to the SpecterIR sight.

Specter IR Thermal Image Scope ELCSIR $12,999.95

2.4 GHz Wireless Command Link
ELCVL1000 ..... $2999.95

ELCEC1500 ..... $279.95

EOTech
Electro-Optics Technologies

WORLD'S FIRST HOLOGRAPHIC SIGHT

MUD

SNOW

DAMAGE

The Magic of Holography

In holography, all the information required to reconstruct the reticle image is recorded everywhere in the Heads-Up display window. If the window is obstructed by mud, snow, rain, etc., the HDS remains fully operational, with point of aim/impact being maintained. Even in such extreme cases where the laminated window is shattered, the HDS is fully functional! As long as the operator can see through any portion of the window, the entire reticle pattern is visible on target...the operator can still engage with confidence.

HOLOgraphic Diffraction Sights (HDS)

The HDS is designed to withstand Mil-Spec drop tests and still remain fully operational and hold zero. The HDS has been extensively tested in a punishing recoil simulator generating 3,500 G's of acceleration in less than 0.5 milliseconds (the recoil of a .454 Casull revolver) as well as various environmental chambers. The Heads Up Display is constructed with a 3 layer, shatterproof laminate glass that is 3/16" thick for added durability. Additional protection of the Heads Up Display is provided with a "roll bar" ruggedized hood. The EOTech 510 and 550 series feature these Holographic sights.

EOTech 500 Standard Series

EOTech 502 Series Standard Model with 2D reticle pattern 502.A65 .....$251.95

EOTech 502 Standard Series

EOTech 502 Series Standard Model with 1 M.O.A. dot reticle pattern.

Tactical Model with Standard 2D Reticle Pattern AA battery version (Lithium or Alkaline) 512.A65 .....$331.95
FREE Neoprene Protective Cover w/ EOTech Purchase ($19.95 Value)

EOTech 550 Military Series

- Compatible with Gen. I-IV Night Vision Systems (tandem operation)
- Includes ruggedized hood assembly and knobbed, tool-less mounting bolt
- Interfaces to standard 1" Weaver dovetail/Picatinny rail
- Factory pre-mounted with 2D Standard reticle pattern
- AA battery model with 2D standard reticle (supports Lithium and Alkaline) (552.A65)

Military Model with Standard 2D Reticle Pattern 551.A65 .....$331.95
FREE Neoprene Protective Cover w/ EOTech Purchase ($19.95 Value)

Military Model with Standard 2D Reticle Pattern AA battery version (Lithium or Alkaline) 552.A65 .....$398.95
FREE Neoprene Protective Cover w/ EOTech Purchase ($19.95 Value)

AA Battery Option

The M510 and M550 are available with the universally available AA battery source as an option. The AA option also allows interchangeability with one common battery source across all standard battery powered gear. Now operators can stock, maintain, and deploy with one common battery for CQB optic, night vision systems, GPS, flashlights, radio equipment, etc. The AA version extends the battery life to over 500 hours at the nominal daylight setting and allows operation in extreme arctic temperatures. The AA models accommodate all versions of AA batteries including lithium, alkaline, and rechargeable types. The length is extended by 1.3 inches and all other functions of the HDS are maintained. Battery usage at the default brightness setting of 12 Type "N" Alkaline batteries, 70 hours of continuous use, Type "AA" batteries Alkaline, 300 hours of continuous use.

EOTech Mounts and Accessories

Black Neoprene sight protectors for 510 and 550 series units
9-EOTECH511 ..... $19.95

P107-ND $3.95

Mount for HK MP45
9ARMS5

Mount for AK47
9-UM-M2B

Mounted on MP5

Mounted on Mossberg

Mounting platform/rings for tandem Night Vision operation

IOR Bucuresti (Industry Optic Romania) has produced high quality and precision optics since the late 1800's. IOR was one of the largest suppliers of military optics during the cold war and still provides a large number of devices to various armed forces across the globe. IOR optics are bright, crisp and clear. They were standard issue to the Warsaw Pact as well as a wide variety of national forces.

I.O.R. Is one of the largest and oldest factories in Europe, initially specializing in producing elite military opto-mechanical devices since 1936, products tested with great success even during W.W.II. Kept under the darkest shadow, as one of Romania's biggest secrets by the former dictator Nicolae Ceausescu, I.O.R. has developed and produced a few lines of optics, rated as some of the finest in the world. During the "Cold War" years the I.O.R. products were successfully used by the Warsaw Pact Army and Navy elite troops, along with other similar products from Carl Zeiss Jena Germany.

Today, I.O.R. - as the last original optical factory of Eastern Europe - to continue their legendary existence, remains a serious and reliable supplier of optical components and assemblies for other famous European companies such as: Leica, Schnider, Hensoldt, Pentacon, Fog-Gorlitz, Carl Zeiss GMBH, at the same time continuing their long time collaboration with Jaener GlassWerk GMBH from Jena, Germany.

TDS Tri-Factor Reticle System

Designed and licensed by TD Smith. This reticle will enable any shooter to quickly determine a straight line aim to a target corrected for distance and wind. This system, which has been tested and documented in over 2500 "one shot" harvest of wild game provides the shooter with an easy means of quickly making the sight adjustment decisions necessary to place an accurate shot on a target at ranges from 100 to 900 yards. As with any aiming device, a shooter must apply good,careful shooting technique, discipline and practice. The TDS Tri-Factor system guides your eyes intuitively into following your body –much the same as when you point your finger at an object. Your eyes look where your finger is pointing, not the other way around. This system presents to you a dominant 9X or straight line aim to the target, depending on the model of scope selected and reduces the stress of guessing range and holdover. GOOD HUNTING.

SSG William C. Ball (right) and SSG Kevin Q. Griffin set a NC state record at qualifying match for the W.P. Wilson National Sniper Championship Match. Using Leatherwood A.R.T.-II scopes SSG Bell won first place overall in the individual match shooting 326/13x out of 375. SSG Griffin placed 2nd overall shooting 309/9x out of 375. Together they won first in the team competition with a combined score of 638/22x out of 750.

Leatherwood Camputer A.R.T. (Auto Range Trajectory)

These new scopes tap the game-taking performance of these weapons and allows a "dead on" hold out to 300 yards, automatically compensating for bullet drop. This is accomplished by a unique circular external cam ring that raises the rear of the scope for shooting at extended ranges. The "through the lens" ranging system lets the shooter zoom in to frame a target between two points of the reticle and the scope determines the range and adjusts for trajectory. All the shooter has to do is center the crosshairs on the target and pull the trigger.

1.5-4.5x20 X-Bow (Cross Bow)

4-12x50 Matte Finish M412X50.....$86.95

Sharpshooter Series

The quality of the optics, construction, finish, and other popular features found within this series are unsurpassed by other comparably priced scopes on the market. Features positive windage and elevation adjustments. The MaxCoat multi-coated lenses have been polished to photographic quality. Fast Focus ocular lens allows a shooter to quick and easily tailor focus to his or her vision.

Uni-Dial Series

By using a series of ten moveable indicators or Flags, the shooter can set the range zero points. The dial is calibrated in minutes so the Flags can be set by computation as well as shooting. Once set, the Flags are locked in place and the dial is operated in a conventional manner. The vertical dial does not have clicks so the Flag settings are infinitely variable. The windage knob has 1/4 minute clicks. Both adjustments have a stop to prevent the shooter from getting "lost" as to where his zero is. But both adjustments can be unlocked from the stops to permit zeroing.

3.5-10x50 Adjustable Objective
U3510X50.....$239.95
4-12x50 Adjustable Objective
U412X50.....$270.95
6-18x50 Adjustable Objective
U618X50.....$293.95
6.5-20x50 Adjustable Objective
U6520X50.....$299.95
6.5-20x50 Adjustable Objective,
No Math Mildot, U6520X50MD.....$349.95

The No-Math Mildot

Shooter brackets (by turning power-magnifying-ring) 18 inches of the target (paper, animal or whatever) between the crosshair (reticle) intersection and either of the 4 perpendicular "hash-marks" located between the crosshair intersection and the first Mildot on each of the 4 crosshairs.

Leatherwood Distinguished Series

The rigid aluminum scope tube is finished with Leatherwood/ Hi-LuxPermaCoat soft luster blueblack finish that's practically impervious to wear. Internally, Leatherwood/ Hi-Lux Distinguished Series scopes incorporate all the latest scope manufacturing technology, and the turret adjustments are positive and precise.

3.5-10x50 Adjustable Objective
D3510X50.....$158.95

3-9x40 Matte, Plex H39X40.....$59.95
3-9x50 Matte, Plex H39X50.....$75.95

L.E.R. (Long Eye Relief) Series

The answer to those situations that require optics with an exceptionally long eye relief. Designed to give full view of the target when placed 12 to 16 inches ahead of the shooter's eye, LER scopes are ideal for installing on handguns, or lever-action rifles with top ejection and muzzleloaders with a sidehammer lock that interferes with mounting a scope in the normal position.

2-7x32 Long Eye Relief LER27X32.....$147.95

Double Deuce Rimfire Series

4x32 Matte Finish, Rimfire RF4X32.....$39.95
3-9x32 Matte Finish, Rimfire RF39X32.....$55.95

Lens Cleaners

Could be the most important item you buy to keep your optics clean and free from abrasives. Lenses are magnets for finger prints and smudges that greatly effect your visibility. Your optics will become dirty gradually and many times you won't realize how bad they are until you clean them. It is very crucial to the longevity of your optics to clean them with the proper cleaners. Using cleaners that are not intended for the special coatings on your scope or binocular can remove the coatings. Use only cleaners that are safe for the coatings. Another remover of coatings is abrasives like fine dirt or dust. Remove all abrasives first then clean with an approved solution. We like to use canned air, the stuff that's made for computer key boards and such to blow off the dust then use any of the listed cleaners. The lens pen is great for taking in the field with you because it has a retractable brush on one end and a non liquid dry cleaning compound with a chamois tip on the other end. The Pentax cleaning cloth is also invaluable. How many times have you been in light rain that later dries into water spots on your lens? The lens pen or cleaning cloth takes care of them, safely.

Lens Pen, LP99.....$9.95
Zeiss Pre-Moistened Lens
Cloths Tissue.....$4.95
Zeiss Lens Cleaning Solution
(3 oz. Spray) 3OZ.....$4.95
Zeiss COMBO Lens Cleaning
Solution & Pre-Moistened Lens Cloths
COMBO.....$9.90
Pentax Cleaning Cloth 88028.....$5.95

Hunters Helping Hunters

Ross Anderson (www.newsaboutross.org) has been battling leukemia for over two years. He has just undergone a bone marrow transplant that will cost $250,000 to $350,000. Insurance will not cover nearly all the cost, and others going through this experience report the inevitability of many unforeseen expenses.

Ross has been employed by Leupold & Stevens for twelve years and has been a fantastic and valued employee, working primarily in the marketing department in product development. He is an avid hunter and shooter, a devoted husband to his wife Judith, and a great father to his son Benjamin. Ross and his family are devout Christians. Ross's transplant procedure requires a minimum of 100 days in solitary confinement. He will not be able to return to work for some time after his recovery phase.

Please visit RifleScopes.com to contribute to Ross' medical expenses and recovery. By donating, you will be helping to ensure that Ross and Judith are able to pay the extraordinary expense of this procedure. You will also be eligible to win valuable merchandise and featured grand prize hunts that we will be giving away throughout the fundraiser. Details are available online.

At this difficult time Ross and his family can't thank each of you individually for your donations, but please know that each gift is equally appreciated. Thank you and God bless you!

Ross Anderson and his family thank you.

By donating to Ross Anderson's recovery online at **RifleScopes.com**, you can be eligible to **win** these great prizes!

Over $40,000 In Prizes!

The **Grand Prize** is a chance to win an **African Safari for Cape Buffalo and Plains Game in Mozambique** with **Nyati Safaris**! The hunt of a lifetime!

You also have a chance to win a **Trophy Whitetail hunt in Manitoba, Canada** with **Pioneer Outfitters**! Or try for a combination **Caribou, Wolf/Wolverine, Ptarmigan and Fly Fishing trip in Yellowknife, NWT, Canada** with **Arctic Safaris**!

2 Hunts in Canada!

Second Grand Prize! **Prophet Muskwa Outfitters of British Columbia, Canada,** have donated a **$12,000 Moose or Elk Hunt in the Canadian Rockies**! This deluxe hunt for Elk or Moose takes place in the beautiful western Candian Rocky Mountains, home of incredible rugged terrain, lakes, streams, alpine meadows and glaciers - an ideal setting for hunting and photography.

LEUPOLD®

AMERICA'S OPTICS AUTHORITY™

Leupold has been manufacturing optical products for nearly 100 years. This year Leupold is introducing more major new products than in any of the past 100! Every last line of Golden Ring hunting riflescopes has been upgraded to set a new standard of performance. Of course, all these new products have been painstakingly designed and thoroughly tested to ensure they'll give you the kind of performance you've come to expect from Leupold and nobody else. In short, every hunter or shooter will be able to find Leupold optics and accessories that are a perfect fit, and they'll be able to count on them for a lifetime of dependability, waterproof, ruggedness, and accuracy.

Leupold builds scopes to last not just for a lifetime...But for Generations. It's why shooters expect performance from their Leupold scope that they just wouldn't ask of lesser brands. It's why we're not afraid to back up our scopes with the strongest guarantee in the business: the Leupold Full Lifetime Guarantee.

Ruggedness and waterproofing are the heart and soul of every scope Leupold makes. Why? If your scope breaks or the lenses fog, it's absolutely useless. This doesn't mean the optics take a backseat. It's simply that high quality Leupold optics are worth going to extremes to protect. The result is an ideal balance between optical excellence and total durability. Since the production of Leupold's very first scope in 1947, they've been the benchmark by which all other riflescopes are judged.

Leupold's Full Lifetime Guarantee
Ask many of our customers what they like best about the Leupold Full Lifetime Guarantee, and in so many words, you get the same response: "I've never had to use it."That's the secret behind the famous Leupold Full Lifetime Guarantee. It's given to American-made scopes that are designed, built, and tested so well that our outstanding guarantee is hardly ever needed. When we say that we build scopes that will last for generations, it's not a slogan, and it's more than our philosophy. It's the truth.

We offer Leupold scopes in the following reticles:

Leupold Wide Duplex® Reticle
Leupold designed the new Wide Duplex reticle with a larger center gate for lightning fast target acquisition, even on a moving target.

Leupold Dot
A Leupold exclusive, this reticle still has a prominent dot like the so-called "floating dot." But the thinning portion of the crosshair makes locating the dot much easier.

Fine Duplex
Thinner posts and crosshairs allow for less target coverage, making precision shots on small targets easy.

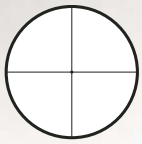
Duplex
Leupold invented the Duplex design more than 35 years ago. Heavy posts stand out against cover and in twilight conditions, pointing boldly to the intersection. Centering is a snap. The thin crosshairs obscure little.
VX-III models use the Duplex reticle for range estimating as well. If you bracket a deer, you can read the range on the power selector ring.

Illuminated Duplex

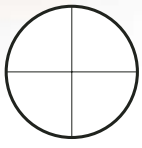
Heavy Duplex
With its heavy posts, the Heavy Duplex reticle is especially useful in low-light conditions.

CPC
The CPC reticle is a steady taper down to a fine intersection. This gives a faster reference than a conventional crosshair by leading your eye to the center.

Post & Duplex
Offering the benefits of both the Duplex and the German #4, the Post & Duplex is the favorite of many hunters.



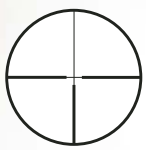
Target Dot
This is a conventional shooters dot, which seems to "float". The crosshairs are extremely thin.



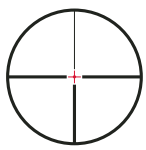
Crosshair
The conventional crosshair is still a popular choice among shooters because of its simplicity and versatility.

German #1, #4, and Illuminated #4 Dot
These typical European-style reticles are bold and easy to see, especially against tangled backgrounds and shadows.

German #1

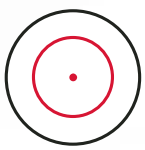


German #4

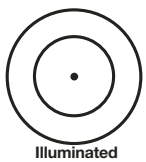


Illuminated German #4 Dot

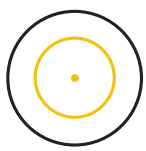
Illuminated Circle Dot
Designed for fast target acquisition in any environment, the Illuminated Circle Dot reticle can also be used to estimate range. Available in the VX-III 1.5-5x20mm Illuminated reticle model and Leupold Mark 4 CQ/T scopes.



VX-III Illuminated Circle Dot (when illuminated)



Illuminated Circle Dot (when not illuminated)



CQT Illuminated Circle Dot (when illuminated)

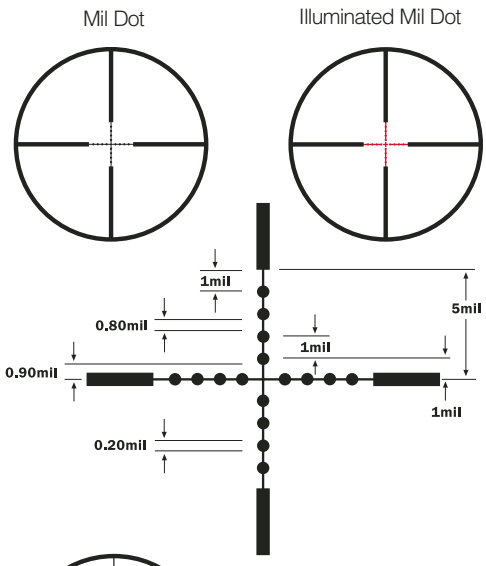
See the following page for information on the Mil Dot and NEW Leupold Boone & Crockett and Varmint Hunters Reticles.

Mil Dot Reticle

Several Leupold riflescopes are available with the Mil Dot reticle, which was designed to help the U.S. Marine Corps estimate distances. It's now standard for all military branches.

Range Estimating With the Mil Dot

With practice, it's a simple system to use. Dots are spaced in one mil (milliradian) increments on the crosshair. Using the mil formula, a table can be created that is based on the size of the object being targeted. Just look throughthe scope, bracket the object between dots, and refer to the table for an estimated distance to target. Leupold scopes fitted with the Mil Dotreticle include more specific instruction on its use.

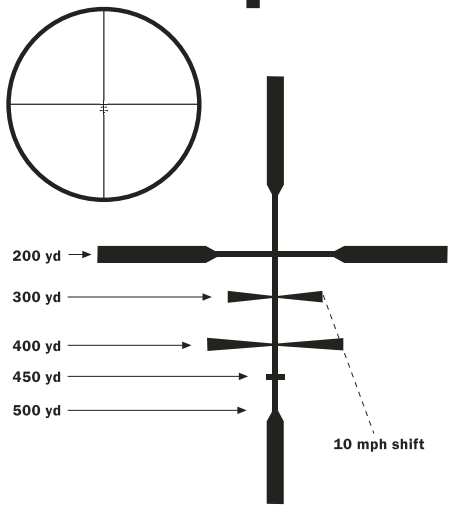


NEW! Leupold Boone & Crockett Big Game Reticle

Exaggerated view through scope

Boone and Crockett Club
Fair Chase and Conservation
SINCE 1887

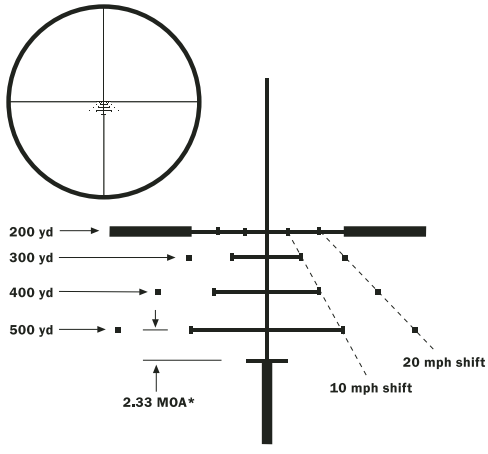
Available exclusively in the new VX-III riflescopes, this reticle system will help you take big game at longer distances. Not only does this reticle help determine the range, it provides precise aiming points for easy-to-remember range increments as well as wind deflection.



NEW! Leupold Varmint Hunters Reticle

Exaggerated view through scope

Available exclusively in the new VX-III riflescopes, this reticle system will help you hit small targets at longer ranges than ever, by helping you determine the range to the target, then providing precise aiming points for easy-to remember range increments, as well as wind deflection. Aiming points are fine lines, which won't obscure small targets at long range.



NEW! Leupold Wide Duplex RE Reticle

The Wide Duplex® Range Estimating (RE) reticle was designed to provide a more open center with the pickets farther apart to allow more unobstructed target viewing area. This reticle is particularly good for quick shots on moving targets. Since this open space is not the right size for range estimating, a new feature is incorporated in VX-III models to provide a range estimating function. A ranging bracket is located on the lower Duplex picket where a thinned down section provides a notch. To estimate range using the Leupold Wide Duplex RE reticle, place an animal or object of approximately 16" in height in the ranging bracket and turn the power selector until it just fits into this space. After the target is bracketed in this notch, read the numbers on the rear of the power selector ring to get an estimate of the range. "3" corresponds with 300 yards, "5" with 500 yards, etc. ***The range estimator is available with select VX III Wide Duplex models.***

VX III 3.5-10x40 Matte, Side View

NEW! Leupold Golden Ring VX-III

introducing a new line of scopes that's the sum total of everything we've learned in nearly 100 years of working with optics. Quite simply, these riflescopes will outshine and outperform nearly every scope on earth...they had to, if they were going to replace the famous Vari-X® III line, the scopes that helped to make Leupold a legend.

The new Leupold® Golden Ring® VX-III, a completely new riflescope line that incorporates new materials, exciting new and exclusive technology, and of course, 100 years of expertise. Pushing the envelope in every direction...structural design, optics, construction... to give you a better scope, one that's a worthy replacement for the Vari-X III. Everything you demand from an American-made scope, such as legendary Leupold ruggedness, absolute waterproof integrity, and the Leupold Full Lifetime Guarantee is there, but it's the new refinements that make the VX-III the most exciting Leupold in years.

VX III 3.5-10x40 Matte, Angle View

Features:

Index Matched Lens System™ on VX-III Riflescopes. New for 2004, Leupold's new VX-III riflescopes will feature the Index Matched Lens System, greatly improving upon what was already impeccable light management. Leupold users know that for a bright, crisp sight picture with good contrast in all light conditions, proper light management and maximum light transmission is absolutely critical. New for 2004, Leupold's new VX-III riflescopes will feature the Index Matched Lens System.

Finger-adjustable windage and elevation dials with resettable pointer dials, marking the zero point.

Fast-focus eyepiece on all models. Models without the illuminated reticle have a lockable, fast-focus eyepiece so you can securely lock the eyepiece once you've set your reticle focus.

Side focus parallax adjustment is standard on most models, so you can easily focus from any shooting position.

All side focus models have 30mm maintube with increased elevation and windage adjustments (up to 80 minutes of range on some models).

Three illuminated models provide the reticle-to-target contrast you need when hunting in low light.

Leupold VX-II

The VX-II is one of our most popular lines of riflescopes, and the reasons become clear to anyone who picks one up. Full of useful features like 1/4-minute "click" windage and elevation adjustments for precision, and added new ones such as the Multicoat 4 lens system for exceptional brightness and clarity, lockable, fast-focus eyepiece, tactile power indicator and the option of our new Wide Duplex® reticle, the VX-II is built to meet the demands of today's serious hunters and shooters.

New! Lockable, fast-focus eyepiece securely locks your eyepiece once you've set your reticle focus.

Multicoat 4 lens system for unparalleled light transmission in all light conditions (formerly available only on Vari-X III riflescopes). Absolute waterproof and fog proof integrity — Leupold pioneered the waterproofing technology that's now the industry standard.

1/4-minute "click" adjustments for windage and elevation.

Leupold Full Lifetime Guarantee.

New! Tactile power indicator makes it easy to tell your scope's magnification with just a touch, without ever taking your eye from the eyepiece.

Leupold VX-I

The VX-I is, simply put, the best scope in its class. No other riflescope will give you the performance and features of the VX-I at such a low price. The Leupold VX-I offers hunters Leupold quality and accuracy, affordability and a lifetime guarantee, all in an American-made riflescope straight from our Beaverton, Oregon, factory.

For the money, you won't find a better scope, or a better warranty. And now for 2004, the VX-I is also available in Leupold's attractive matte black finish, as well as the traditional gloss black finish.

The most popular hunting magnifications: 2-7x33mm, 3-9x40mm, and 4-12x40mm. Leupold's standard multicoat lens system for exceptional brightness, clarity, and contrast.

Absolute waterproof and fog proof integrity is guaranteed for the life of the scope. Leupold pioneered the waterproofing technology that's now the industry standard.

New! **Wide Duplex reticle**, ideal for picking targets from heavy brush or timber, is also available.

Rugged and totally dependable, the VX-I must pass the same stringent tests for durability as all Leupold optics.

Leupold Full Lifetime Guarantee.

Made in the U.S.A.

New! **Micro-friction windage and elevation adjustment dials make it easy to fine tune your rifle's accuracy.**

Leupold Competition Series

When it comes to competitive shooting, Leupold is the near unanimous choice of the world's best, people who set records of group sizes under a tenth of an inch at 100 yards. The reason why we're your choice is because when you speak, Leupold listens. Leupold Competition Series Riflescopes The Leupold Competition Series 35x45mm, 40x45mm, and 45x45mm riflescopes have everything the world's most demanding shooters have ever asked for, combining legendary Leupold accuracy with unequaled clarity. These riflescopes give competitors an edge where championships are won or lost by a thousandth of an inch.

Threaded lens covers to protect both the objective and ocular lenses of the scope

Side focus adjustment cover lets you protect that perfect focus once it's set.

Target Crosshair or 1/8-MOA Target Dot reticles available.

Multicoat 4 lens system provides outstanding brightness, clarity, and contrast, all at extremely high magnification.

1/8-MOA target-style "click" adjustment dials. Ocular adjustment range of -2.0 to +1.0. 30mm maintube gives you 38-MOA minimum of both windage adjustment and elevation adjustment.

Side focus parallax adjustment, so you can adjust your scope to be parallax free at distances from 40 yards to infinity, all from your shooting position.

Leupold Full Lifetime Guarantee.

Leupold Fixed Power

A classic just never goes out of style, and never outlives its usefulness. It's the best way to describe Leupold fixed power riflescopes. What truly makes them great, and what has made them such an enduring favorite, is their simplicity and ruggedness. Of course, each has specific features that will make it particularly useful for different shooting disciplines. If you appreciate a classic, top your rifle with one of our fixed power riflescopes. Each of them offers everything you've come to expect from a Leupold.

4x33mm
A traditional selection, it gives you the abundant, non-critical eye relief typical of Leupold riflescopes, and it's just10 inches in length...short for a 4x riflescope.

6x36mm and M8-6x42mm
Ideal for intermediate to long-range shooting, these scopes offer ample magnification and a generous field of view at 100 yards.

12x40mm Adj. Obj.
Gives you the same great features and performance, with even greater power for longer shots, with a Multicoat 4 lens system for a clear picture in all light conditions.

2.5x28mm IER Scout
Has 9 to 17 inches of non-critical eye relief that makes it excellent for your lever action or scout rifle. Mount this outstanding scope on the barrel, in front of the receiver.

6x42mm Adj. Obj. Target
This scope has tall, target-style windage and elevation dials featuring 1/4-MOA "click" adjustments, and a full 15-MOA of adjustment for each revolution. It's an ideal riflescope for hunter benchrest shooting.

Leupold Wide Duplex®

Friction dials are marked in 1/2-MOA increments for easy windage and elevation adjustments.

Durable matte black finish resists nicks, scratches, and abrasions.

Legendary Leupold ruggedness, ensured by Leupold's attention to detail in design, manufacturing, and assembly.

Absolute waterproof and fog proof integrity Leupold pioneered the waterproofing technology that's now the industry standard.

Eye relief is generous and non-critical.

Repeatable accuracy is guaranteed by the Leupold lens erector system.

Wide Duplex reticle and a wide field of view for rapid target acquisition.

Fully coated lens system offers a clear, bright sight picture in any hunting condition.

Leupold Full Lifetime Guarantee.

Leupold Rifleman

American-made. Accurate. Durable. Rugged. Reliable. Affordable. These words are those most often said by hunters and recreational shooters when describing the features they want in a riflescope. These words are also the best description of the new Leupold Rifleman riflescopes. We put our nearly 100 years of experience to work creating these scopes, giving them everything you asked for in a hunting riflescope. We even gave it a tough-as-nails, matte black finish, so the Rifleman looks every bit as good as it shoots. Match it up with our new Leupold Rifleman mounts and you're set for a lifetime of hunting. The Rifleman is the scope you've been waiting for, and it's only from Leupold.

Leupold Shotgun, Muzzleloader, Compact, Rimfire, Airgun and E.F.R.

Just as we make scopes tailored for the specific needs of long range, target, tactical, and handgun shooters, Leupold makes a variety of scopes to meet an array of special requirements. Everyone, from dangerous game and turkey hunters to muzzleloader, rimfire and air rifle enthusiasts, will find a scope that complements their particular passion. And though our compact scopes are small in stature, they're big on ruggedness, dependability, and craftsmanship, just like our full-size models.

Vari-X 2-7x28mm Compact

Vari-X 2-7x28mm Compact is one of the lightest compact scopes ever made, at just 8.2 ounces and 9.9 inches in length. The standard is parallax adjusted for 150 yards. The RF Special is parallax adjusted to 60 yards for rimfire rifles. Vari-X 3-9x33mm Compact The variable power Vari-X 3-9x33mm Compact is just 11 inches in length but big on versatility, with an exceptional sight picture.

Vari-X 3-9x33mm EFR Compact

The Vari-X 3-9x33mm EFR Compact has a close focusing distance that makes it ideal for air rifle shooting and other short range shooting.

VX-II Shotgun/Muzzleloader Scopes

VX-II 1-4x20mm Shotgun Muzzleloader and VX-II 2-7x33mm Shotgun/Muzzleloader With parallax adjusted to 75 yards, these are ideal scopes for shotgun or muzzleloader hunting. They offer 24- to 75-foot fields of view at 100 yards, depending on the model, and Leupold's Heavy Duplex reticle for precise shot placement even in dense cover.

Butler Creek Flip-Open scope covers are the best protection system in the world. See the sizing chart on page 110.

Leupold LR/T (Long Range/Tactical)

Leupold Mark 4 Long Range/Tactical

Leupold Long Range/Tactical riflescopes give you as much control as possible over this extreme type of shooting. We'll give you the tools to do the job, the rest is up to you.

Our LR/T scopes feature:

Finger-adjustable, knurled windage and elevation adjustment dials in two styles: the tall M1 dials or bullet drop compensation marked M3 dials.

Audible, tactile "clicks" let you adjust with extreme precision. M1 dials have 1/4-MOA "click" adjustments.

M3 dials have 1/2-MOA windage dials and 1-MOA elevation dials.

30mm maintubes for increased windage and elevation adjustment.

New! Fully Illuminated Mil Dot reticles available in some models.

Butler Creek Flip-Open Lens Covers come standard with all Leupold Mark 4 LR/T riflescopes.

Adjust for parallax for specific ranges from 50 yards to infinity using the turret mounted focus knob, without taking your eyes off the target.

Maintubes milled from one solid piece of 6061-T6 aircraft aluminum.

Adjustment knobs can be zeroed once sighted-in.

The Mark 4 10x40mm LR/T M1, Mark 4 16x40mm LR/T M1, and Mark 4 10x40mm LR/T M3 —are arguably among the toughest, highest-performing riflescopes you'll find anywhere. It's no surprise that the Mark 4 10x40mm LR/T M3 was chosen as the primary day optic of the U.S. Army M-24 Sniper System.
The reasons why are clear. Superior edge-to-edge sharpness across visual field and outstanding low-light capability.

Made in U.S.A.

Butler Creek Flip-Open Lens Covers come standard with all Leupold Mark 4 LR/T riflescopes.

NEW! Leupold Mark 4 CQ/T (Close Quarters/Tactical)

The Leupold Mark 4 1-3x14mm CQ/T is ready and able to handle the variety of close-contact situations common to both law enforcement and the military. **True 1x setting,** so it functions as your non-magnifying, illuminated sight at extremely close range. 2x or 3x settings give you the additional power to accurately engage targets at medium ranges.

Large field of view for fast target acquisition and tracking of moving targets.

Night-vision device compatible.

Attach accessories using the integrated MIL-STD-1913 rail mount cross-slots.

1/2-MOA "click" adjustments for windage and elevation.

Made in U.S.A.

Ten reticle illumination settings to match any light conditions without affecting your low-light vision.

One AA battery powers the Mark 4 CQ/T for up to 600+ hours at medium setting.

Leupold Circle Dot reticle is a bold aiming point and also provides range estimation.

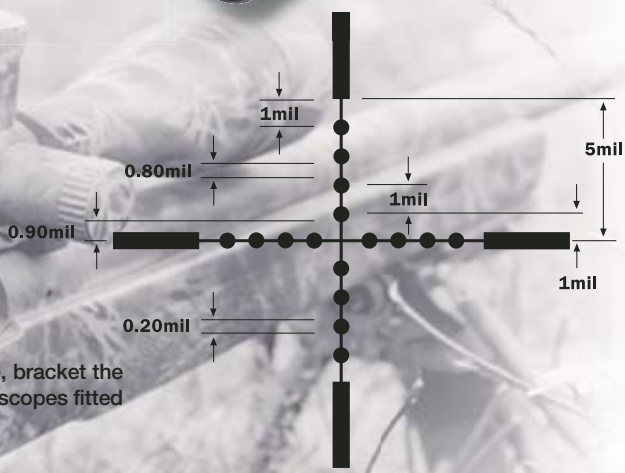
Leupold Mil Dot Reticles

Several Leupold riflescopes are available with the Mil Dot reticle, which was designed to help the U.S. Marine Corps estimate distances. It's now standard for all military branches.



Range Estimating With the Mil Dot

With practice, it's a simple system to use. Dots are spaced in one mil (milliradian) increments on the crosshair. Using the mil formula, a table can be created that is based on the size of the object being targeted. Just look throughthe scope, bracket the object between dots, and refer to the table for an estimated distance to target. Leupold scopes fitted with the Mil Dot reticle include more specific instruction on its use.

Meopta Rifle Scopes

Since 1933 Meopta Sports Optics has built and maintained a reputation throughout Europe for producing premium quality optics at affordable prices. For 2004 we proudly introduce a completely new line of riflescopes, MEOSTAR, which have been designed and constructed for the serious and most avid hunting enthusiast. We have raised our quality and performance to an entirely new level that our competitors are going to find extremely difficult to match, especially at the same price!

As with all Meopta products we have expertly blended old world craftsmanship with states-of-the-art processes in addition to selecting only the finest of optical elements and materials to ensure a lifetime of performance in the field or at the range.

Each Meostar Riflescope Features:

- A lightweight, one-piece, 30mm body tube, constructed of the highest-grade aircraft aluminum alloy available.
- An anodized matte black finish for added durability and reduced glare.
- Superior MB-550 lens coatings on all air to glass surfaces for optimum light transmission.
- Precise single click 1/4 in. Windage & Elevation adjustment at 100 yards
- Completely nitrogen charge and sealed to ensure a life time of fog proof, water proof performance, Guaranteed!
- Raised fingertip knobs for the Windage & Elevation adjustments for easy operation.

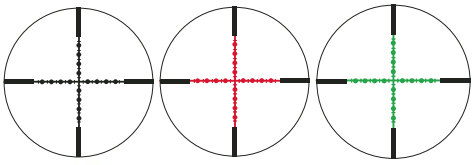
Mil dot

For over eighty years, Nikon, Inc. has built high quality optics, including binoculars, spotting scopes, and since 1985, riflescopes. From inception, Nikon has espoused innovation, quality and ruggedness. Today, this dedication is manifested in a broad range of high performance, durable hunting optics designed to perform well on any hunt.

Nikon Sport Optics products are manufactured in state-of-the-art production facilities by efficient, innovative design and production teams utilizing advanced machinery and construction techniques. The result is a group of riflescopes, hunting binoculars and spotting scopes endowed with unequaled durability, resolution, brightness, clarity and dependability.

Nikon has never been content to rest on its laurels. With each passing year, Nikon engineers and designers incorporate new production methods, materials and designs in their quest to provide hunters with the best hunting optics in the world. This dedication to the advancement of optical excellence will allow Nikon Sport Optics to lead the industry into the twenty-first century.

The 3.5-10x50, 6601 and the 6.5-20x44, 6603 are available with an Illuminated Mildot reticle using Nikon's Dual Illuminated Reticle technology. Dual Illuminated Reticles offer red or green illumination choices in eleven brightness settings.



Features

- One-piece, O-ring sealed and nitrogen filled aircraft grade aluminum tubes are waterproof, shockproof and fogproof
- Positive click, precise steel-to-brass 1/4 MOA windage and elevation adjustments free of reticle creep or backlash (6.5-20's have 1/8 MOA target knobs)
- Precision ground and polished lens with Ultra ClearCoat® provide 95% light transmission and virtual 100% anti-reflection capability - the theoretical maximum
- Nikoplex reticle available in all scope models for quick target acquisition
- Nikon Lifetime Limited Warranty on all scopes - your guarantee of complete satisfaction

HOLOGRAPHIC WEAPON SIGHT

Speed... Means Survival

Firefights in close quarter environments are won by fast accurate target acquisition. Locking onto the target fast means you win. The alternative is not an option. The HOLOgraphic Weapon sight (HWS) delivers unmatched speed gains... and is the solution.

Multiple threats are a given in tactical situations. Peripheral vision is critical for threat ID and situation awareness. The HWS's tubeless, heads up display allows operators to engage with both eyes open.

Deployed with elite Special Forces and SWAT teams, the HWS features passive operation with no muzzle side signature and compatibility with all night vision systems. The HWS is waterproof, shockproof, fogproof and adapts easily to virtually any tactical weapon platform.

Nikon Tactical Rifle Scopes

All Nikon Tactical scopes feature a large 44mm or 50mm diameter objective lenses for maximum light gathering. Lenses throughout the scope are meticulously finished, then given multiple layers of scratch resitent anti-reflective compounds for the utmost in fine detail resolution and maximum light transmission. A four times magnification range allows tremendous flexibility in the tactical enviroments. Easy to grip target-style windage and elevation knobs are employed for accurate field adjustments. Precise 1/4 MOA, anti-backlash. click-stop reticle adjustments provide tactile and audible feedback to assure repeatable accuracy while ranging.

Nikon Tactical riflescopes are equipped with turret mounted parallax adjustment knobs for discreet adjustment in the field. A tough, black andonized matte finish reduces glare and provides a ready surface for custom camouflaging.

Features

- Rugged, one-piece 30mm tubes; matte finish
- Side focus parallax adjustment
- Fully multicoated optics for maximum light transmission
- Includes FREE Butler Creek flip-up covers
- Finger adjustable 1/4 MOA windage and elevation adjustments
- Parallax Setting (yds): 50 to infinity
- Illuminated Reticle Models Feature : 5 intensity levels of GREEN / Standard BLACK / 5 Intensity levels of RED

All Nikon Tactical Mildot reticle rifle scopes come with a FREE Mildot Master. See page 122 for more information.

Nikon Monarch Dot Sights

The monarch Dot Sight, and VSD (variable sized Dot) are fully waterproof, fogproof and shockproof. Objective and ocular lenses are 30mm diameter, and are fully multicoated for incredible sharpness, brightness and color rendition. Reticle brightness is controlled by an 11-position rheostat and both are powered by a single, lithium battery (included). Nikon's Dot Sights have zero magnification, providing unlimited eye relief and a huge 47.2' field of view at 100 yards, perfect for the close up, fast shots that often occur. They have 100 MOA of internal adjustment, both in windage and elevation, making them easy to zero. The Monarch Dot Sight VSD has 1,4,6 and 10 MOA dots, controlled by a simple knob on the turret.

PENTAX

Pentax Lightseeker

Pentax Lightseeker Rifle Scopes are some of the most popular hunting & shooting scopes of all time. The standard Pentax Lightseeker adjustment mechanism, utilizing dual bias springs, has led the industry in providing much greater assurance that the reticle will not move under recoil. The Lightseeker is your guarantee of superior optical and mechanical quality.

Deep Woods Plex

Butler Creek Flip-Open Lens Covers

Butler Creek Flip-Open scope covers are the best protection system in the world. See the sizing chart on page 110.

Pentax Lightseeker II

The Pentax Perm-Align system, standard on all Lightseeker II models, takes the technology of the Lightseeker an ultimate step further. A solid steel post locks the internal tube and reticle in place, replacing spring pressure, and positively securing windage and elevation settings. No amount of recoil, vibration, or incidental impact can cause the point of aim to shift. Windage and elevation adjustments in the past required a slot and the use of a coin, or some other tool, unless you owned a scope with target turrets that allowed adjustment by hand. With the Lightseeker II's finger adjustable knobs, you get the best of both worlds. No tools and the same slim-line style of your favorite hunting scope. Also has "zero-reset" feature, normally found only on full-size knobs. With the newly designed Lightseeker II windage and elevation adjustment mechanism you'll never have to worry about "creep" and "backlash". Internal adjustment posts move in and out freely without resistance. No more "tapping" the scope or firing a shot to "seat" sight-in adjustments.

4-16x44 Adjustable Objective, Matte Finish, Plex Reticle with Perm-Align 89403 ..... **$484.99**

Pentax Lightseeker 30mm

The next generation of Pentax Lightseeker Rifle Scopes, the Lightseeker-30 series incorporates legendary Lightseeker optics housed in a 30mm tube. The Lightseeker-30 series has evolved in response to suggestions and feedback from some of the most knowledgeable and experienced shooting authorities in North America. These are serious rifles scopes, developed for serious shooters: bean field shooters in the Deep South, groundhog hunters in the Piedmont, prairie dog hunters of the West, 1000 meter target shooters, or anyone who demands optimum optical and mechanical performance.

Superior light gathering, crystal clear resolution, return to zero accuracy, adjustable 50mm objectives, dramatically increased adjustment range, the finest mechanical precision, 100% US made, Limited Lifetime Warranty, built to last. Pentax Lightseeker-30 rifle scopes - truly International Class shooting optics.

Pentax Whitetail Unlimited

Since its beginning in 1982, Whitetails Unlimited has remained true to its mission of support of educational programs, habitat enhancement and preservation of the hunting tradition for the direct benefit of the white-tailed deer and other wildlife. It has gained the reputation of being the nation's premier organization dedicating its resources to the betterment of the white-tailed deer and its environment. The purchase of every Pentax Whitetails Unlimited rifle or shotgun scope includes a free one-year membership in Whitetails Unlimited, and a portion of every Whitetails Unlimited scope purchase goes to the organization to support its conservation efforts.

REDFIELD

Reliability, Ruggedness along with Innovation and Quality — that's what you've come to expect from the Redfield brand of products. Redfield is again standing at the forefront of technology in the optics field.

Tracker 800618

Widefield 800615

Widefield 800617

Widefield 800613

Redfield Widefield

Widefield has a field of view is 30% wider than conventional scopes -- nearly 40 feet wide at 100 yards. It helps you scan more area to detect the slightest flick of an ear, or to pick the best shooting lane on running game. It's also designed to mount low on the receiver, so you get a quicker sight picture when you mount the rifle. Widefield gives you a choice of a 2-7 power model, 3-9 power or a fixed 4 power, in gloss or matte finish

Schmidt & Bender Illuminated Reticles (30mm)

You will find that locating your point of aim is much easier and quicker in poor light with these scopes, since the reticle stands out against the dark body of the animal. Even in poor light, the click stops allow you to quickly find the illumination level most suitable for the conditions. Once you have selected the proper setting, you can switch off the light and preserve the battery by slightly moving the knob out of the chosen click stop. This will turn off the light but let you turn it back on in a fraction of a second.

Schmidt & Bender Police/Marksman (34mm Tube)

A few years ago, Schmidt & Bender introduced its Police/Marksman rifle scopes, designed to meet the specific requirements of the precision sharpshooter, SWAT and tactical teams, law enforcement, security and corrections agencies. Now, these remarkable scopes have been even further refined to address the needs of SWAT and tactical teams, law enforcement, security and corrections agencies. The Police/Marksman II series is a new generation … offering unsurpassed clarity, reliability and flexibility appropriate for a variety of shooting situations. The 34mm tube allows for increased windage and elevation adjustments.

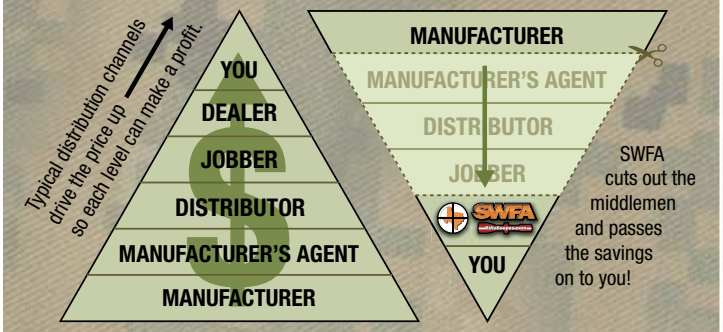
Why the Super Sniper scope is so affordable



Manufacturer Suggested Retail Price: $799 → SWFA Price: from $299.95

TESTIMONIALS

"I've been doing a test of a SS against Leupold MarkIV since about this spring....The (Super Sniper) is worth every penny. They could have doubled the price and it would probably still be worth it. I have been away awhile doing some training and I ran into an old buddy. He does most of his work in places that don't exist, but he likes to call Virginia Beach home. A bunch of real polite boys down there do some shooting for the US Navy. Whoever said that the Navy contract was a lie should have checked with the SEALS first, they say it's a fine piece of equipment. I've put just under 2500 rounds through it. Through interpolation that translates to at least 500 different firing solutions. Repeatability is never off even a click. It's been in the mud and the crud, sand blasted, rained on, beat on and thanks to the wonder of elevation it got froze and sleeted solid with ice." Carry On
mike1alpha, via email

"Just returned from winning the Canadian Long Range Challenge and the Aggregate for the 21st Century, at the Canadian Fullbore Rifle Championships, with a (Super Sniper) SS20X42 scope purchased from SWFA. This is the second time that the SS20X42 has been used to win the CLRC and many of these scopes are now found in use for F Class competition in Canada/U.S. This scope is ideal for F Class use from the standpoint of ruggedness, elevation & windage range, and price. What more can be said. Thanks for a good product and standing behind same if trouble arises."
Bill Wylde, Greenup, Illinois

"After reading several articles about the Super Sniper scope I decided I would give it a try. The only thing I can say is - I am VERY glad I did. I am a NYC Correction Officer assigned to the Emergency Service Unit, and I am a NYPD/MPTC certified firearms instructor. Last week I attended the New York Police Olympics in Albany NY. This is the first year that a sniper event was included. I usually go up and compete in the handgun events, but this year I felt I had to try the sniper event. I am happy to say that I used the Super Sniper scope I ordered from SWFA, and I was able to out shoot 28 other shooters and win the gold medal in this event. I want to thank you for making this product available. Once again thank you for your A+ products and service."
John Hernandez, NYPD

"The 10X (SUPER SNIPER®) is still working great after 2000 rounds. This May, I met several other shooters in Wyoming for a 5 day prairie dog shoot. When I returned home, I took a trip to the range to clean rifles and check zeros. Out of three brands, the S.S. was the ONLY one to still be zeroed, and this after clicking up and down, side to side for 5 days of shooting. And it was the least expensive scope of the bunch. I have since purchased and mounted a 16X S.S. on a very well made custom rifle. Do whatever it takes, just keep this scope in the market. It's the best kept secret in optics today."
Thanks,
Clint Starke, Starke Bullet Company

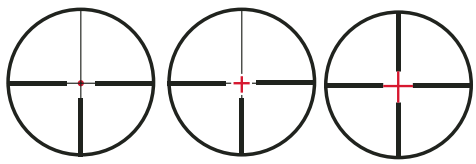
Swarovski Professional Hunter Illuminated Reticles



SWAROVSKI

Swarovski Professional Hunter

The Swarovski Professional Hunter series are versatile, high-performance scopes offering:

- Sophisticated, high light-gathering optical system for a wide field of view with optimum edge-to-edge sharpness.
- Quick-focus eyepiece.
- Centered reticle in the first focal plane.
- Quadratic range of adjustment for larger area of reticle movement while sighting in.
- Microstructure grooves, for precisely defined baffling, prevent residual reflections inside the tube and creating high contrast images even in intense light.
- Scopes have ultra-precise adjustment turrets and patented four point coil spring suspension which guarantees shock resistance, even with heavy caliber firearms.
- Eyecup with telescopic shock absorption protects against recoil injuries, particularly when shooting in awkward positions.

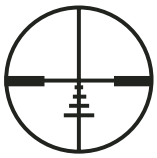
TDS Tri-Factor Reticle System



TDS Reticle

Designed and licensed by TD Smith. This reticle will enable any shooter to quickly determine a straight line aim to a target corrected for distance and wind. This system, which has been tested and documented in over 2500 "one shot" harvest of wild game provides the shooter with an easy means of quickly making the sight adjustment decisions necessary to place an accurate shot on a target at ranges from 100 to 900 yards. As with any aiming device, a shooter must apply good, careful shooting technique, discipline and practice.

The Benefit of the TDS
TDS Tri-Factor system guides your eyes intuitively into following your body – much the same as when you point your finger at an object. Your eyes look where your finger is pointing, not the other way around. This system presents to you a dominant 9X or straight line aim to the target, depending on the model of scope selected and reduces the stress of guessing range and holdover.
GOOD HUNTING.

SWAROVSKI

Swarovski Professional Hunter Tactical

This special run of scopes was built to withstand anything you have to offer:

- Adjustments: 120 MOA (Mildot), 90 MOA (50 BMG). Both models are finger adjustable and resettable to "0" quadratic design.
- Patented 4 point coil spring system ensures reliable reticle adjustment and means absolute shot resistance, even with large caliber firearms.
- Complex, high light-gathering optical system for a wide field of view with maximum edge-to-edge sharpness.
- Nitrogen purged to prevent fogging.
- Micro-structure grooves to prevent residual reflections inside the tube for bright, contrasty images, even with backlighting.
- Constructed from one piece of aircraft structural alloy with a scratch-proof surface.
- Eyecup with telescopic shock dampening increases safety particularly when shooting upwards.
- Dioptric correction from –2 to 3 diopters.
- Functional temperature: (-4 to +131° F)
- Storage temperature: (-22 to +158° F)
- Submersion tightness: water-proof with or without the adjustment caps up to 13 ft.

Trijicon®

Trijicon Tri-Power

Trijicon, Inc., the leader in the development of innovative, self-luminous aiming systems, has introduced the industry's first triple-illuminated sight. A failsafe firearms system that provides a fully illuminated reticle that's easy to see in virtually any lighting conditions, including partial or total darkness. It's your tactical advantage for special missions.

Trijicon AccuPoint

Hunters know that the majority of the game only show themselves at dusk and dawn. The problem until now has been that you can no longer see your crosshairs on the animal. With Trijicon's AccuPoint you will be able to see your reticle even in total darkness. AccuPoint features a unique combination of fiber optics and tritium to illuminate your point of impact. The reticle automatically adjusts to the lighting conditions or you can adjust the brightness to your preference. AccuPoint scopes are waterproof and require no batteries. AccuPoints feature the Bindon Aiming Concept (BAC). After many years of searching for and developing improved small arms weapons sights Glyn Bindon made an amazing discovery. The legendary aiming speed of the Armson O.E.G. can be combined with the accuracy and precision of magnified scopes. What was discovered is that the human brain automatically switches to the best system when you look through the scope with both eyes open. Two major universities have confirmed that anyone with normal vision (over 95% of the population) can learn to use the brain powered zoom in seconds. The BAC developed from this technology.

3-9x40 Matte Finish, Red Triangle BAC (1" Tube) TR20R $599.99

Trijicon A.C.O.G. and Compact A.C.O.G.

SWAT teams and other tactical units depend on a variety of Trijicon ACOG (Advanced Combat Optical Gun sights) for speed and accuracy in all situations-from close quarters to long range. ACOGs allow a high degree of discrimination, even among multiple, moving targets. TA-31 (4x32) and TA-11 (3.5x35) feature a red donut above the range finding bullet drop reticle and the Bindon Aiming Concept (BAC). The donut glows red at night from tritium and red in the day from its fiber optics. All models feature a special ranging reticle. The user does not need to make any special adjustments between shots at different ranges. Bullet drop is built into the reticle that is parallax free along its vertical axis. ACOGs are waterproof to greater than 500 feet under water. The 4x ACOGs have 3 clicks per inch adjustments at 100 yards, the 3.5x has 4 clicks per inch at 100 yards. Only the prism housing moves; external blows are easily absorbed by the light weight prism housing, making the ACOG the most rugged scope available. ACOGs come ready to mount on any AR-15 carry handle and are easily adaptable to any "weaver style" base with the two adapters available.

A specially modified 4x32 Trijicon ACOG (TA01-NSN) was chosen by the U.S. Special Operations Command (SOCOM) as standard issue for all Special Forces Units, including the Green Berets, Navy SEAL's, and Rangers.

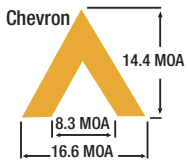
Amber Dot Reticle



Amber Chevron Reticle

Trijicon Reflex

With the Trijicon Reflex, aiming is as easy as looking at the target. The Reflex uses both tritium and fibre optic technology to provide a quick and easily-seen aiming point under every lighting condition. The tritium offers a red dot aiming point that is enhanced in bright light by the fiber optic system, providing a more visible reticle in bright conditions and a dimmer reticle in low light.

Trijicon - Armson O.E.G. (Occluded Eye Gun Sight)

Armson O.E.G. (Occluded Eye Gunsight) This red dot sight is simply the fastest sight available. It allows you to use both eyes to speed your focus onto the target. One eye never leaves the target scene. Binocular aiming means that while your view through one eye remains focused on the target, the other eye sees a red dot as the weapon is aimed. The result is a super-imposed dot on the target. There is never a contrast problem with an Armson because your brain automatically adjusts any contrast. The dot covers 4 inches at 100 yards and is adjustable for windage and elevation. During the day the sight uses ambient light to illuminate the red dot and at night it is illuminated by tritium.

Weaver Classic V Series

The V-Series eye relief is long and forgiving, so hunters can spend those first precious seconds adjusting the scope instead of their head position. The power adjustment ring has a raised node that helps you crank it up quickly, even with heavy gloves on, in low light. All V's feature fully multi-coated lenses to reduce glare and give you edge-to-edge clarity. Their solid, one-piece construction makes them waterproof, fogproof, and shockproof. Each one is designed to be a reliable shooting partner for years to come. The V-24 target/varmint scope, has a special varmint reticle with very fine cross hairs for clear shot placement on the smallest or most distant varmints.

Weaver Grand Slam

New top of line scope from Weaver. These scopes will simply amaze you when compared to others in the same price range! We can't say enough about how good these scopes are. *You will not be disappointed!*

Features and Benefits

- Camera quality, fully multi-coated lenses
- Provide the best light transmission and glare reduction
- Minimum distortion and maximum resolution
- Ruggedness and resistance to moisture and humidity
- Offset power and parallax indicators Allow the shooter to remain in shooting position while adjusting the scope
- Micro-Trac windage & elevation adjustment system
- Most rugged, reliable and accurate
- Eye piece features a fast-focus adjustment ring
- MOA windage and elevation adjustment increments
- Waterproof, shockproof, fog proof

XOTIC

X.O.T.I.C. Optics

Ultimate Sniper Scope

X.O.T.I.C. (Xtreme Operations Tactical Instruments Corporation) set out to build the world's brightest, clearest, most durable, repeatable long range sniper scope in the world. Mil-spec requirements were not tough enough. The end result was a scope deserving of the title 'The Ultimate Sniper Scope'.
The U.S.S. was built around a one piece, aircraft structural aluminum, 30mm main tube. The optical glass must meet exacting standards before it is ground or coated. Every lens is polished, then fully multi-coated with non glare, high resolution coatings. Every seal is waterproof and can withstand the pressure of depths down to 66 feet in salt water. Pure dry nitrogen is used to fill the tube to prevent any chance of internal moisture fogging the lenses. A special finish is baked on to make the tube scratch resistant on the outside, eliminate light loss and prevent internal flaking under extreme recoil. A large torx head center screw holds the windage, elevation, and side focus parallax turrets. Windage and Elevation adjustments are in 1/4 M.O.A. increments with over 100 M.O.A. of elevation adjustment to easily allow the shooter to engage targets beyond 1,000 yards without using special bases. Extra effort went into the extremely tactile and audible turrets themselves to make sure they could be operated with or without gloves, easily being able to count clicks by ear and/or feel. The unbreakable, glass sandwiched, laser etched, mil dot reticle has been placed in the 1st focal plane to allow the shooter to range and shoot on any power setting while maintaining proper mil spacing. A custom Power-Stop feature was incorporated that allows the shooter to stop on 10x without looking at the power selector.
Place your order today for fall 2004 delivery.

Power: 4x-16x
Objective: 56mm.
Tube Design: One Piece 30mm.
Exit Pupil: 14mm at 4x / 3.5mm at 16x
Field of View: 23' at 4x / 8' at 16x
Eye Relief: 4.7" at 4x / 3.3" at 16x
Waterproof: 66,
Shockproof: Over 2,000 G
Adjustment Range: 105 M.O.A. of Elevation
90 M.O.A. of Windage

The objective lens is set back in the housing to reduce glint and protect the lens

ZEISS

Zeiss VM/V 30mm German Series

The Diavari VM (with integral mounting rail) and V (without rail) scopes offer the hunter and shooter considerably lighter weight, increased field-of-view and a wider power range. Again, Zeiss has established an optical and technical standard by which all others are judged.

Zeiss Conquest 1" U.S.A. Series

Made in the U.S.A. Standard scopes feature 1/4 MOA click adjustments and target knob scopes feature 1/8 MOA adjustments. All 4.5-14's feature a side focus/ parallax adjustment that functions from 30 yards to infinity. All reticles are etched in the glass leaving no chance for the reticle to break. Up to 64" of elevation travel in the 3-9 and 4" of constant eye relief throughout the entire power range.

All CONQUEST models have the following features:

- 1 inch-diameter center tube for ring mounting.
- One piece tube body for superior ruggedness.
- Non-magnifying reticles throughout the entire power range to ensure that the reticle size remains constant and hides as little of the target as possible at long ranges.
- Easy-to-use reticle adjustment with 1/4 MOA = 0.7 cm per click at 100 m allows quick and precise sighting in.
- Large square reticle adjustment range - elevation and windage adjustments do not affect each other even at the ends of the adjustment ranges.
- Long eye relief of 4" with the CONQUEST 3-9x40 MC and 3.5" with the other scope models.
- Continuous eyepiece focusing from +2 to -3 diopters.
- Carl Zeiss MC multi-coating on all glass-to-air surfaces for maximum transmission (markedly above 90 %), color fidelity and brilliance.
- Waterproof in compliance with ISO 9022-8 - even with elevation caps removed.
- Nitrogen filling to prevent fogging on the inner lens surfaces.
- Lifetime Transferrable Warranty

Zeiss Z Point Reflex Sight

The Z-Point reflex sight offers not only state-of-the-art optical and electronic systems, but also a host of exclusive features:

- Hybrid power supply = battery + solar cell. By daylight, the solar cell supplies power to the light-emitting diode, saving the battery and prolonging its life.
- Basic brightness of the illuminated dot can be individually set and stored, and adjusts automatically . to the surrounding light conditions.
- Illuminated dot switches off automatically after 3 hours.
- Illuminated dot remains equally bright even when viewed at an angle, due to new, patented optical arrangement.
- Elevation and windage adjustment with centered illuminated dot – stays in the center of the ray path after sighting-in.

The Z-Point is mounted onto a Picatinny Rail using a spring clamp. It is recoil-proof, shock-resistant, vibration-resistant and waterproof – sealing test as per ISO 9022-8. Its casing consists of glass fiber-reinforced material with an integrated tube body of high-strength aluminum.

Aimpoint Hand Gun Scopes

Aimpoint red dot sights are the original red dot sights. Aimpoints have the widest field of view, are 100% parallax free, and are waterproof and shockproof. You do not have to center the dot, you hit where you aim. They are available in two dot sizes, 4 minute of angle (MOA)= 4" @ 100 yds for precision shooting and 2 minute of angle = 2" @ 100 yds in the 2x versions. Aimpoints have no eye relief so they work on handguns, rifles, or shotguns.

Burris Hand Gun Scopes

Burris pretty much defined handgun optics. While others didn't see the point, Burris was busy designing and testing and producing scopes that were rugged enough to withstand the severe and unique recoil generated by magnum handguns. Burris soon earned the reputation as "the only handgun scope to consider." Today, Burris handgun scopes are better than ever boasting fully multicoated optics throughout every scope. Burris lead the way with the first variable power handgun scopes, most powerful handgun scopes, and the first with parallax adjustment for precision long range and short range shooting.

Bushnell Trophy Hand Gun

Engineered with Amber-Bright optics which quickly help you distinguish between a brown tree and an equally brown critter, the Trophy riflescopes have long been heralded by hunters as the ideal scope for the autumn deer woods. For those willing to admit their addiction to hunting goes far deeper than an opening day drive, you'll appreciate the multi-coated optics for increased brightness in low light conditions. Fast-focus eyepiece and a wide-angle field-of-view ensure instant target acquisition, and 1/4 M.O.A. fingertip, audible/resettable adjustments make windage and elevation tuning quick and easy. With 100% fogproof, waterproof and shockproof construction, they're designed to excel during the day's most important times.

FREE BUSHNELL GEAR BAG!
When you buy any Bushnell Binocular, Spotting Scope, or Riflescope with RainGaurd. $99.95 Retail Value!

Bushnell Elite 3200 Hand Gun Scopes

Bar none, it's the brightest scope in the world. Boasting 95% light transmission at 550nm, this is Bushnell's top-of-the-line riflescope. Bushnell's exclusive, hydrophobic Rainguard lens coating - which disperses condensation into microscopic specks, allowing you to literally see around the moisture - ensures you won't miss that trophy buck because you breathed on your eyepiece or you couldn't wipe the rain away in time. All optical lens surfaces are fully multi-coated for the absolute maximum light transmission and the sharpest image. Fingertip, audible/resettable 1/4 M.O.A. adjustments make windage and elevation tuning quick and easy. The ultra-strong one-piece tube is hammer-forged from an aluminum and titanium alloy for 30% more strength than standard aluminum scopes -and to be sure it lasts, it is recoil-tested to 10,000 rounds of a .375 H&H Magnum! Finally, ther Elite® 4200 scopes offer some of the largest magnification ranges in the industry for optimum versatility in the most challenging hunting situations. In the world of big game pursuit, there are hunters - and there are serious hunters. If you consider yourself the latter, the Elite® 4200 is the scope that does justice to your commitment.

The Elite Bullet-Proof Warranty assures you that Bushnell will repair or replace, at no cost, any Elite riflescope that becomes defective during normal use.

Bushnell Holo Sight

If you're looking for a fast sight, you'll be hard-pressed to find one quicker than the Bushnell HOLOsight. Lauded by experts as one of the most innovative gunsights ever made, the advanced holographic technology found within our HOLOsight lets you bead up on a target as quickly as you can raise your gun. It's that fast. HOLOsight projects the appearance of an illuminated crosshair 50 yards in front of your gun, yet no forward light is projected. Sight from any distance behind the gun without taking both eyes off of the target. Offers unlimited eye relief and an unlimited field-of-view. At half the size of a conventional sight, it fits easily on handguns, shotguns and rifles with a standard Weaver®-style mount.

Leatherwood L.E.R. (Long Eye Relief) Series

Designed to give full view of the target when placed 12 to 16 inches ahead of the shooter's eye, LER scopes are ideal for installing on handguns. Leatherwood/ Hi-Lux LER scopes are available in the most popular magnifications - 4x and 2-7x. All feature the tough Leatherwood/ Hi-Lux PermaCoat finish, multi-coated photographic quality lenses and each individual scope has been thoroughly shock and leak tested at the factory.

4x32 Long Eye Relief LER4X32 ..... $118.99
2-7x32 Long Eye Relief LER27X32 ..... $147.99

LEUPOLD
AMERICA'S OPTICS AUTHORITY

Leupold Handgun Scopes

Today's large caliber/lightweight handguns deliver crushing recoil that tops some of the hardest kicking rifles. That's why Leupold puts such effort into the building and intensive testing of our EER(Extended Eye Relief) handgun scopes. It follows that our attention to detail is why so many manufacturers of powerful handguns recommend and sell Leupold EER scopes.

ZEISS

Zeiss Z Point Reflex Sight

The Z-Point reflex sight offers not only state-of-the-art optical and electronic systems, but also a host of exclusive features:
- Hybrid power supply = battery + solar cell. By daylight, the solar cell supplies power to the light-emitting diode, saving the battery and prolonging its life.
- Basic brightness of the illuminated dot can be individually set and stored, and adjusts automatically to the surrounding light conditions.
- Illuminated dot switches off automatically after 3 hours.
- Illuminated dot remains equally bright even when viewed at an angle, due to new, patented optical arrangement.
- Elevation and windage adjustment with centered illuminated dot – stays in the center of the ray path after sighting-in.

Zeiss Z Point Reflex Sight With Dual Illumination 521698 ..... $399.99

BURRIS SAVVY OPTICS.

Burris Signature Image Stabilizing Binocular

Burris Laser Rangefinder Binocular

Landmark 8x42

Burris Landmark II

An improved optical system, shorter length, lighter weight and more rugged construction are a few of the refinements we've incorporated into this tough new binocular series.

8x42 300192.....$129.95
10x50 300193.....$139.95

Burris Laser Rangefinder Binocular

Now you don't have to carry both binoculars and a separate rangefinder. The B-1500 combines a premium, waterproof, fully multicoated 7X binocular with the latest in digital and microprocessor- based laser rangefinding technology. It'll take you all the way out to 1500 yards on highly reflective targets and there's no question about getting accurate readings on poor targets and dim lighting conditions out to 600 yards.

7x40 B-1500 Laser Binocular 300176..$628.95

Burris Signature Image Stabilizing Series

Signature Image-Stabilizers counteract vibration for shake-free viewing even from a moving vehicle or a skittish horse. In fact, they can compensate for up to 5 times more movement than some others.
Just focus, press the stabilizing button and you're locked onto the image. These tough-as-nails, waterproof, fog-proof optics will most likely become an essential item in your short list of hunting essentials.

12x32 300188.....$659.95
16x32 300189.....$729.95

Signature 8x42

Burris Signature Series

Signatures deliver maximum detail resolution and light transmission in a handy, durable, and lightweight package. Each Signature is meticulously assembled, nitrogen-filled, totally waterproof, fogproof, and warranteed forever. This level of quality comes from the very best precision ground glass and prisms, a perfected optical system, and optimum lens multicoatings. Featuring right eye click-stop dioptic adjustment, rubber armor coating, carry case and neck strap. Burris Signatures are arguably the best high-end binocular value on the market.

LASER RANGEFINDER YARDAGE PRO

Introducing the world's smallest rangefinder, the Yardage Pro Scout. Using Digital Technology and measuring a mere 1.5x4x2.75 inches and weighing 6.8 ounces the Yardage Pro Scout delivers superb and accurate range performance to +/- one yard. Range to a deer as far as 300 yards out or to a tree at 570 yards away for a reference point. The unique shape and palm size allows hunters to easily grip with a single hand and drop into a pocket when not in use. The rugged and weather resistant Yardage Pro Scout features popular "Scan" and ">150" modes and includes carrying case. Scan mode provides continuous distance measurements as multiple targets in the field of view are scanned and ">150" mode only captures distance measurements of objects greater than 150 yards away, enabling distance measurement through foreground clutter like brush and branches.

"Light Done Right"

Create a new line of binoculars that meet or exceed all of the legendary qualities of the Leica line, but in a more compact and lighter weight configuration. This was the challenge given to Leica development engineers. Result: Leica Ultravid, binoculars that are light, but done right. The new Leica Ultravid binoculars not only out perform the competition, but set a new benchmark in binocular design and function. They are lighter, brighter, faster and stronger than any other binocular on the market.

Each LEICA Ultravid Binocular starts with a housing made of light high-grade magnesium, with a center axis of titanium. Wall thickness is almost twice that of other binoculars on the market using magnesium, making the Leica stronger and more durable.

To produce even greater structural integrity and longer product life, the center axis shaft of the LEICA Ultravid is made of space age titanium. In addition, the complete focusing assembly is made of durable metal components, not plastic like some other companies. All of this is done, while achieving the target of lighter weight.

Ten Years in the Making

Each Ultravid Binocular features enhanced optics with greater contrast and higher brightness by virtue of Leica's High Lux System (HLS™) and stray light elimination. The High Lux System is a special mirror coating enhancing the prism system that is applied utilizing an advanced Physical Vapor Deposition process generated by an Ion Beam and particle accelerator. Forty-three separate coatings are applied in a thickness as little as 40 nanometers. These so called lamba/2 coatings, which transfer 99.9% of the light over the mirrors, not only generate additional brightness, but also allows for optimization of the full spectrum of visible light making up the image. Commonly used coatings allow optimization for only one wavelength of light. Additionally, a new mechanical and optical design improves contrast and total light transmission. This is accomplished with new glass and new lens coatings. Net result: extraordinary light transmission that delivers the brightest and most natural image available from a binocular today.

The extremely robust magnesium housing assures precise functioning under all outdoor conditions and great longevity. The Ultravid's compact dimensions, extraordinarily ergonomic design and their low weight (less than 26 ounces!) make these binoculars become constant companions that one will never want to leave behind.

Leica Laser RangeFinders

The industry leader in laser rangefinders introduced the world's most compact 900 yard laser rangefinder. Now Leica introduces the new 1200 model in the same body as the 900. It measures only 4x3.75x1.5 inches and weighs only 10 ounces. Extremely durable construction, water-proof and will operate in -14 degree F to +122 degree F. Utilizing Leica's lenses with its "bullet-proof" construction and an easy to read LED display (not a hard to read LCD display).

Leica Laser Rangefinding Bnoculars

High performance binoculars and laser rangefinder - in one pair of compact binoculars. This dual functionality and a low weight of only 32 ounces (including batteries) makes the LEICA GEOVID BRF especially useful for hunting. Using the new LEICA GEOVID BRF instead of two separate instruments, the hunter can react more quickly - for example, when sighting game, the distance can be measured immediately at a press of a button. Due to its folding bridge, the LEICA GEOVID BRF is particularly compact. The new binoculars have an illuminated LED display with automatic brightness control which adapts to the ambient light. Its die cast aluminum housing makes it extremely durable.

8x42 BRF Geovid, 10-1300 yds.
40028 ..... **$1594.99**

10x42 BRF Geovid, 10-1300 yds.
40029 ..... **$1644.99**

Leica Duovid

Two binoculars in one! The Leica DUOVID 8+12x42 and the new Leica DUOVID 10+15x50 are the very first high-end binoculars with switchable magnification. They are built for the hardest use in hunting and they render brilliant images at great distances as well as in critical, poor light situations. The respective lower magnification of each model provides a steady image and a large field of view with great depth of field. By switching to the respective higher magnification you are then right close to the goings-on with an outstanding imaging performance, even with the very smallest details.

Leupold Wind River Binoculars

We created the Leupold Wind River line of optics to give you access to high-quality optics at an affordable price. We designed them using our nearly 100 years of experience of bringing the most rugged, reliable, high-performance optics products to our customers. The Green Ring™ is your assurance that what you see through them will be bright and crystal clear, with superb color fidelity, no matter what the light or weather conditions.

These are all indispensable attributes when you're glassing the timber for your next trophy. Plus, Leupold Wind River optics are built to be durable, sealed against moisture, then filled with bone-dry nitrogen so they'll be waterproof, fog free, and ready for years of outdoor enjoyment.

Finally, they're covered by the Leupold Wind River Limited Lifetime Warranty.

Cascades Series Binoculars

The in-line design of the Leupold Wind River CascadesTM Series 8x42mm and 10x42mm binoculars makes both models trim, lightweight, and a real pleasure to use. Outstanding low light performance for excellent early morning or late evening hunting.

Long eye relief and twist-up eyecups make the Cascades Series easy to use with glasses.

New! Center focus dial mounted lockable diopter adjustment keeps your focus setting secure against accidental bumps.

8x42 Matte, Cascades LEU53530.....$226.99
10x42 Matte, Cascades LEU53532.....$253.99

Olympic Compact Series Binoculars

The OlympicTM Compact 8x25mm and 10x25mm models are center focus, phase coated, roof prism binoculars. They give you outstanding performance with many of the same features, such as twist-up eyecups, as their full-size counterparts, in an even slimmer, lighter-weight package.

8x25 Matte, Olympic Compact
LEU53538 ..... $199.99
8x42 Matte, Olympic Compact

Olympic Series Binoculars

These premium quality 8x42mm, 10x50mm, and 12x50mm center focus, phase coated, roof prism binoculars deliver the kind of performance you wouldn't think possible in a binocular that's both affordable and lightweight.

Color fidelity, brightness, and clarity are all enhanced by the Olympic Series' phase coated, aluminum enhanced prisms and fully multi-coated lenses.

Ergonomic design gives them excellent fit and balance in any size hand.

Twist-up eyecups and ample eye relief make extended viewing a pleasure, even with glasses.

10x32 Matte, Katami

8x42 Camo, Mesa

8x23 Matte, Mesa Compact

8x32 Matte, Katami

8x42 Matte, Pinnacles

New! Katmai Series Binoculars

The KatmaiTM Series binoculars give you all the performance of a full-size binocular in a compact package that's lightweight, and easy to carry or pack. The key is the Katmai's 32mm objective lens that transmits a greater amount of light to your eye than traditional compacts, which usually employ a much smaller objective lens. 32mm objective lenses give you the light transmission of full-size binoculars.

L-coatedTM prisms and multi-coated lenses optimize light transmission and reduce glare. Ergonomic, compact design makes the Katmai's easy to carry or stow in a cargo pocket. Clear, bright sight picture with excellent image fidelity. Twist-up eyecups and generous eye relief for comfort and ease of use, even with glasses.

6x32 Wind River Katami LEU56410 ..... $269.99
8x32 Wind River Katami LEU56420 ..... $287.99
10x32 Wind River Katami LEU56430 ... $299.99

Pinnacles Series Binoculars

Both the Pinnacles 8x42mm and 10x42mm binoculars are tough and waterproof, as well as slim, lightweight, and ergonomic. Fully multi-coated lenses and phase coated, silver enhanced prisms for brightness, superb resolution, and image fidelity in all light conditions.

Slim, ergonomic design fits well in any size of hand. Interchangeable eyecups lets you switch between vented, retractable contoured eyecups and twist-up eyecups especially suited for users with glasses.

Mesa Compact Series Binoculars

Mesa Compact Series binoculars give you many of the same features in an inverted porro prism design that's unusually compact.

Aspheric lenses in the compact binoculars provide an enhanced image without increasing the size of the binoculars, and roll-down eyecups offer versatility for those with glasses.

8x23 Matte, Wind River Mesa Compact
LEU53534 ..... $89.99

10x23 Matte, Wind River Mesa Compact
LEU53536 ..... $104.99

Mesa Series Binoculars

The Leupold Wind River Mesa 8x42mm and 10x50mm center focus, porro prism binoculars have classic binocular styling with the same advanced features and outstanding optics you'd give them if you designed them yourself.

Multi-coated lenses optimize light transmission for enhanced brightness, clarity, contrast, and color fidelity. Tough rubber armor adds protection, and improves your grip in wet weather.

Twist-up eyecups and generous eye relief make the Mesas comfortable to use for long periods, even with glasses. The porro prism lens system provides great depth perception.

NEW! Leupold Wind River RB800 Laser Range Finding Binoculars

Never settle for a "guesstimate" of the range to your target again! The new Leupold Wind River RB800 Range Finding binocular combines the outstanding optics of a high-quality binocular with laser-precise measuring capability to create a single—and surprisingly affordable—new tool for hunters everywhere.
Find your target, push a button and you'll get precise measurements—accurate to within 1 yard—to deer-sized game and other animals more than 550 yards away. You can determine the exact distance to objects such as trees, rocks, signs or other landmarks out to nearly 900 yards!
Hold down the button for Scan Mode, to get continuous, precise range updates as you trackan animal or glass an area. And like all Wind River products the RB800 Range Finding biocular is rugged and waterproof—100 percent wilderness ready—to go wherever the hunt takes you. It's one hunting optic that takes the place of two. Built from the ground up for hunters, lightweight and compact.
Precise measurements to targets from 10 to nearly 900 yards away.

8x32 Matte,
Rangefinder Binocular

Scan mode works at the push of a button to give you continuous range updates to a moving target, or distances to different objects as you scan across them.

Digital display in your choice of yards or meters is visible even in bright sunlight.

Digital compass in the RB800C lets you mark the distance and direction to game once it's down, so it's easy to find, even in dense cover or over long distances.

Multi-coated lenses for the brightness, clarity, and contrast you expect from Leupold.

Automatic battery-saving shut-off gives you longer battery life in the field.

Lightweight, waterproof, and rugged, they're ready to go where the hunt takes you.

MINOX
THE CLEAR CHOICE™

Minox Binoculars

MINOX is a synonym for the miniaturization of optical instruments. The famous subminiature camera MINOX LX, which became world renowned as a spy camera, offers the highest precision. Following this tradition, the new generation of MINOX BR binoculars again proves MINOX's highlevel of competence in precision engineering. MINOX binoculars offer a lot for your eyes: a superb design with extremely high-resolution lens systems. The use of special glass increases the contrast so that the user is able to recognize small details even under critical light conditions. All MINOX binoculars are made of multicoated lenses. For this reason reflections are reduced and the observed results are much more brilliant. The MINOX engineers directed their attention towards an extremely short focussing distance so that even small objects can be observed from a close distance. The sturdy and extremely light weight body made of aluminum offers the necessary stability so that the new MINOX binoculars may be used with confidence in extreme outdoor activities. A powerful piece of optical equipment that fits perfectly into your pocket

8x32 BD BR A.L.T.
62122

MINOX Binoculars BD 8x32 BR and BD 10x42 BR now also with aspherical lense technology. In the spring of 2000 MINOX presented the BD 10x52 BR ALT binoculars with aspherical lenses to the world public for the first time. Based on the huge success of these products the 8x32 and 10x42 models have now also been fitted with this new technology. The general advantage of aspherical lenses are that they are able to correct numerous optical aberrations with one lens element. The result is a much improved flatness of the field of view.

For the user this means high contrast and detail resolution right up to the edges. Moreover, the system enhances a neutral, brilliant color rendition and high light transmission. This is something nature observers and birdwatchers appreciate. With aspherical lenses the optical performance of these MINOX binoculars has now been improved even further to provide perfect rendering of the finest structures of petal and leaf markings. The exceptional nearest focusing distance (1.6 m in the 8x32 and 2.5 m in the 10x42), which also enables pin-sharp definition of insects, is an additional exciting feature.

The new generation of the MINOX BD 8x32 BR and MINOX BD 10x42 BR features a maximum of top-class high technology:

- Aspheric Lens Technology
- Our newest coating system for all prisms increases contrast even in low light
- Rubber reinforced aluminum body for long life and mechanical stability
- Dust-free and waterproof up to 5 m / 16.4 feet
- Extended eye relief allows a full field of view even for wearers of eye glasses
- Internal nitrogen filling to prevent lens fogging

Pentax Angle Compensating Laser Rangefinder

Features
- Available in 600 yard or 800 yard models
- Angle compensation gives the proper distance when shooting up or down a slope
- Superior single beam laser technology offers improved accuracy over multi-beam units in many applications
- Three times better distance resolution than comparable models
- Ranges as close as 4 yards (Bowhunters)
- Will measure in Feet, Yards or Meters
- Simple one button operation
- Very easy to read external LCD readout
- Includes carry case and strap
- State-of-the-art microprocessor automatically filters data, allowing accurate readings in rain or snow at any distance without the need to select a "rain mode"
- Red-Dot aiming allows you to verify the object you intend to range
- Ranging laser is not activated until the trigger button is released preventing the rangefinder from reading an incorrect object
- Operates on one easy to replace 9 volt battery
- Compact and lightweight (1.7"x4"x5.1") (9.6 ounces)
- 600 yard model will range up to 999 yards on reflective targets
- 800 yard model will range up to 1200 yards on reflective targets
- Accurate up to +/- 1 yard

Steiner Merlin

The unique earth-tone dark brown color rubber armored exterior was especially formulated to not reflect light, but rather absorb it and make the binoculars almost transparent to wildlife. Water resistant; guaranteed not to fog or leak. 10-year limited warranty.

8x32 438 ..... **$398.99**

8x42 448 ..... **$448.99**

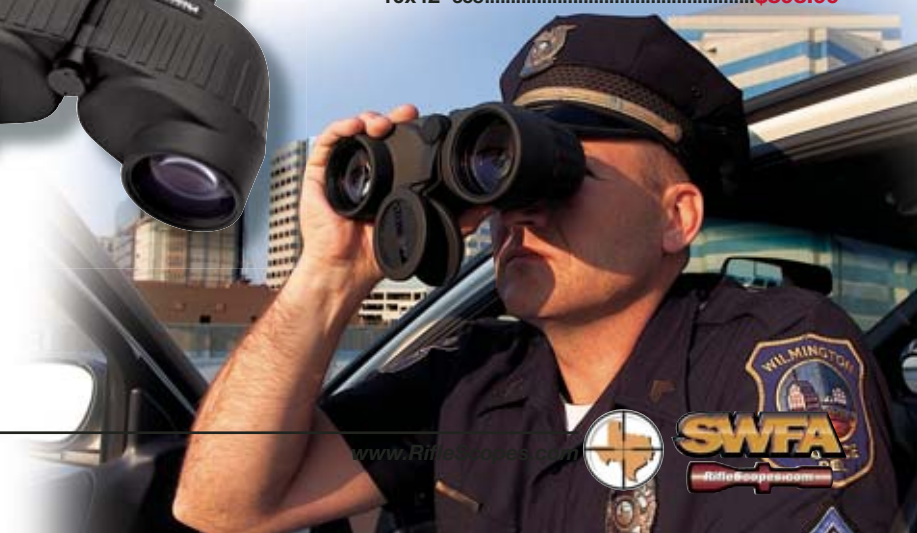
10x42 458 ..... **$498.99**

Steiner Peregrine

Phase corrected and fully multi-coated with Steiner exclusive broadband HD (High Definition) lens coating. Steiner's fast-focus system brings distance to close-focus in slightly, with an amazing close focus distance of only 5.2' for the 8x42 (6.0 for the 10x42). Waterproof and guaranteed not to fog or leak. 30-year limited warranty.

8x42 348 ..... **$848.99**

10x42 358 ..... **$898.99**



Steiner Commander V

The brightest binocular made: the Commander V. Steiner has created new HD (High Definition) optics that deliver over 96% peak light transmission – the highest ever recorded. Combined with the bright and steady 7 x 50 configuration, you get nighttime images so brilliant; it's almost like turning on a spotlight. Each Commander V is hand-built to be mil. spec. waterproof and shock resistant. 30-year limited warranty.

7x50 293 ..... **$748.99**

7x50 w/Compass 392 ..... **$898.99**

Steiner Tactical

Law enforcement and emergency response professionals rely on Steiner to provide clear details of what's ahead. Steiner's Military series are fully mil spec waterproof and shockproof with reticles ideal for may law enforcement and special operation forces use.

6x30 B/ST 461 ..... **$498.99**

8x30 B/ST 481 ..... **$489.99**

7x50 M22 w/Laser Filters 539 ..... **$798.99**

10x50 Military R 536 ..... **$698.99**

Steiner Rocky

Compact, precise, center focus binoculars for the hunter, birder and traveler. Rocky compacts feature Steiner's CAT lens coating for enhanced low-light performance; they're actually brighter than many larger glasses. These lightweight roof prism binoculars fold to fit in your pocket or their own small, belt-attachable case; excellent for rough terrain where ounces count. All Rocky models are rubber armored for a comfortable, no slip grip and feature wrap around eye-cups to eliminate distracting side light. All Rocky models feature a 10-year limited warranty.

8x42 148 ..... **$619.99**

Steiner Bighorn

Built light, yet extremely robust, the Bighorns are perfect for glassing Pronghorns and of course most ideal for Dall or Bighorn sheep. Both Bighorn binoculars feature Steiner's one-time Sports Auto-Focus system, once set for your eyes images will be sharp to infinite distance. Light gathering is also good with full multi-coating on all lens surfaces.

9x40 Green Armored 290..... **$249.99**

15x56 Green Armored 215 ..... **$598.99**

Steiner Navigator

The optics have been enhanced to cut through haze and glare for comfortable viewing in bright daylight and offer exceptionally bright images in darkness. Like all our marine binoculars, Navigators feature Steiner's Sports Auto-Focus system that, once set for your eyes, puts everything from 20 yards to infinity into sharp, clear focus, with no further adjustment. The Navigator Pro Compass now features a built in reticle, allowing range estimation to landmarks or points of interest. 10-year limited warranty.

7x50 II Blue 285 ..... **$389.99**

7x50 II Blue w/Compass 385..... **$489.99**

8x30 Blue Armored 185..... **$199.99**

Steiner Military Marine

Based on the legendary Steiner military-issue 7x50, selected by the US Army and over 40 other nations. 7x50 optics provide excellent low-light performance and image stability. These optics, and Steiner's Sports Auto-Focus system make this the perfect binocular for boating and law enforcement applications, as well as most hunting uses.

7x50 Green Armored 275..... **$469.99**

Commander V 7X50
293

8x30 Green Armored

A tough, solid compact that offers plenty of magnification, rainproof construction and maximum versatility. Refined design by years of use in a variety of settings from mountaintops to deep canyons, aboard and ashore. For spotting game or exploring nature's majesty Steiner's increased depth-of-view puts all the action in focus at once. Long eye relief for eyeglass wearers.

280..... **$194.99**

10x50 Green Armored

An excellent choice for those who need extra power and brightness. The large, 50-mm objective lenses gather more light, and present a larger image to the user yielding a brighter view and greater stability than binoculars with smaller objective lenses. The 10x50's power, brightness and great depth-of-field focusing make this an excellent choice for spotting antelope, elk, or caribou.

210..... **$479.99**

Steiner Commander III

Good enough for the US Navy seals, the new 7x50 Commander III Military is the ideal choice for your tactical needs. They feature incredible brightness, and a range finding reticle combined with an illuminated, HD-stabilized compass. The 7 x 50 configuration, combined with Steiner's brilliant CAT (Color Adjusted Transmission) optics, give the Commander III the highest light transmission ability of any compass binocular making easy viewing at night or in poor light conditions. The Commander III are built to military specification standards for shock resistance, humidity and waterproofing. 30-year limited warranty. Color: OD green

383..... **$689.99**

Steiner Senator

Whether you're glassing to the next ridge, down city streets, or in any other situation when you want to "let your optics do the walking," the Senator puts you at an effective distance of less than 100 yards from one mile distant wildlife or other objects. Many hunters and outdoorsmen are discovering these high power binoculars offer a lot more comfort during extended use than spotting scopes. The 80-mm objective lenses deliver far superior low-light performance. They're 30% lighter than look-alike competitors. These binoculars were originally developed for military and border patrol applications and are mil. spec. tough: totally waterproof, shock resistant, and rubber armored.

15x80 415..... **$969.99**

20x80 420..... **$989.99**

Steiner Observer

Their performance is like a premium quality spotting scope, with the ability to keep both eyes open. Focusing is simply done by fine tuning each eyepiece only once at distance of 50 yards, once set - no further adjustment is necessary and you'll always have sharp clear views with incredible depth of field. Bright, fully multi-coated 80mm lenses for maximum low light performance. Rugged construction with attractive black rubber armoring. 10-year limited warranty.

WEAVER™

FEATURES & BENEFITS

- 45mm Objective – 15% more light gathering power than the standard 42mm binoculars
- Phase-coated roof prisms – Enhance image sharpness and reduces glare
- High reflection aluminum coating for roof prism
- Fully multi-coated lens system – Promotes the brightest possible image
- Twist-up eyecups
- Protects ocular lenses & provides continuous adjustment of eye relief for eyeglass wearers
- Superior optical design – Maximum image clarity with minimum distortion
- Dry nitrogen gas purged – Prevents internal fogging
- Waterproof under 1 meter for 3 minutes
- Durable, high-quality carrying case
- Armored body

Grand Slam Series

Introducing the Grand Slam line of binoculars. The two models feature 45mm objective lenses that gather 15% more light than a 42mm objective. Fully multi-coated, phase coated optics are used in both models to give you the sharpest highest quality image available with less glare. Rubber armoring with special traction ribs make them very durable and easy to carry, dry nitrogen gas prevents them from fogging even under the roughest conditions. Newly designed twist in eye cups make them easy to use with or with out glasses.

Kowa Full Size 82mm Spotters

The 82mm objective lens provides outstanding light gathering power, ensuring a bright field of view. The sharp view and accurate color reproduction qualify the scope as a powerful instrument for observation at dawn or dusk. All lenses, prisms, and even dust protection glass on the main body are built with multi-layered coatings, ensuring clear visual range and sharp images. Strong yet lightweight, polycarbonate materials, provide a rigid structure that can endure hard usage. The shape is designed for ease of handling and ergonomic fit in the hand. The housing is waterproof to JIS Protection Class 7 and filled with dry nitrogen gas to prevent the lens from fogging. The scope also includes an aiming line for easy targeting, smooth one finger focus knob, rotating tripod mount, and a sliding hood (sunshade) to keep out unwanted sunlight and rain from hitting the optics.

Leupold Mark 4 12-40x60mm Tactical Spotting Scope

12-40x60 Mil Dot, Matte, Mark 4 Tactical

The scope most ideally suited for use as part of a sniper team. The Leupold Mark 4 12-40x60mm Tactical spotting scope features a Leupold Mil Dot "round dot" reticle for both range estimation and tactical cooperation with the shooter. It's the same proven reticle available in Leupold Mark 4 riflescopes.

Folded light path technology gives you greater magnification in a lightweight, compact design (12.4" long, 37 oz).

Includes soft-side case. Universal 1/4-20 thread tripod attachment.

Estimate range at any power setting.

Multicoat 4 lens coatings ensure maximum light transmission, brightness, clarity, and contrast.

12-40x60 Mil Dot, Matte, Mark 4 spotting scope LEU53756 ..... $999.95

15-45x60 Matte, Angled, Sequoia

15-45x60 Matte, Straight, Sequoia

15-45x60 Matte, Straight, Sequoia Kit

Leupold Wind River Sequoia Spotting Scopes

Our Sequoia 15-45x60mm spotting scope gives you a huge range of magnification, combined with an impeccably clear, sharp image with the contrast you demand. Choose between two models: one with a straight eyepiece or a 45° angled eyepiece (a very popular choice for use at the shooting range).
Either one is equally at home on the firing line or in the field, and each is rugged and waterproof enough to take anywhere.
Long eye relief and a twist-up eyecup make both models comfortable to use for long periods, even with glasses.

Fully multi-coated optics deliver maximum amounts of pure light to the eye, for superb brightness, clarity, and color.

Versatile magnification gives you excellent detail at all practical distances, so you can easily pick game from cover, even heavy timber.

The 45° angled eyepiece offers you versatility and easy viewing from a variety of positions, including prone.

Rugged and 100 percent waterproof, they feature the same durable rubber armor as our binoculars for added protection.

Covered by the Leupold Wind River Limited Lifetime Guarantee.

Leupold Golden Ring Spotting Scopes

Leupold Golden Ring 12-40x60mm Spotting Scope

The spotting scope one famous outdoors writer called a "landmark of optical design." Powerful, clear, bright optics with up to 40x magnification for judging the rack on your next trophy from extreme distances.

At a mere 37 ounces and 12.4 inches long, it's lightweight and compact. Multicoat 4 lens system for superior light transmission capability and anti-glare interior work together to give you a crisp, vivid sight picture without equal. Soft-side, form-fitting case is included. Operate the scope without ever removing the case.

12-40x60 Matte, Golden Ring LEU47878.....$899.95

Leupold Golden Ring 10-20x40mm Compact Spotting Scope

When the hunt is long and space is tight, this is the optic to carry. Amazingly stable when handheld, or mount on most standard tripods, monopods, or window mounts.

Just 7.5 inches and 15.8 ounces, you can carry it anywhere, even around your neck. Standard multicoat lens system offers exceptional brightness, clarity, and contrast, while reducing glare.

10-20x40 Matte, Compact Golden Ring
LEU54480.....$349.95

New! Leupold Golden Ring 15-30x50mm Compact Spotting Scope

The newest addition to our Golden Ring spotting scopes, it's the perfect spotting scope for judging trophy game at long ranges in rough terrain. It can close the distance with optical power rather than leg and lung power.

Just 21.5 ounces and 11 inches long, it's compact and lightweight enough to take anywhere. Use handheld, or mount on most standard tripods, monopods, or window mounts.

Standard multicoat lens system offers exceptional brightness, clarity and contrast, while reducing glare.

With up to 30x magnification it's extremely powerful and versatile.

Leica Televid Spotters at a glance

To be in close proximity to the subject and to experience it intensively – that is made possible by high performance Leica Televid 62 and Leica Televid 77 spotting scopes and they're continuously adjustable 20x to 60x magnification.

The legendary high-performance Leica Televid 77 spotting scopes are now being complemented by the smaller and lighter Leica Televid 62 line of spotting scopes in four versions, thus clearing the way to applications where up to now spotting scopes were of only limited use because of their weight. All lines of spotting scopes are also available in APO-versions.

- Dual focusing with 3.5 and 14 turns
- Sophisticated optics with 3 lenses (Apo-Televid) for color-fringe-free viewing even under extremely poor light conditions and at high magnification
- Waterproof, all-metal housing with partial rubber armoring
- All eyepieces for Televid 77 spotting scopes can also be used on Televid 62 spotting scopes.
- Choice of Angled or Straight viewing
- The focal length of the lens of the Televid 62 spotting scope is shorter, resulting in a magnification that is 20% lower (16x, 26x, 32x, and 16x - 48x). A new version of the 32x wide-angle eyepiece that features an especially wide field of view of 40 m / yds at 1000 m / yds was designed specifically for the new Televid 62 spotting scopes.
- Photo adapter as accessory. Enables you to attach any standard reflex camera (f/10.4/800mm). The Digital Adapter makes it possible to couple the new Leica Digilux 1.

85mm Angled, Silver 528012 + 20-60x 528020

Zeiss Diascope 65 T* FL and Diascope 85 T* FL (both models come with eyepieces for straight or angled viewing). The optical systems re-designed on the basis of the Carl Zeiss Advanced Optics System (AOS) use glass material containing fluorine ions, which provides the objective lenses with superachromatic properties – with natural color rendition down to even the finest nuances, superb detail recognition and no color fringes.

Two wide-angle eyepieces with fixed magnifications and one zoom eyepiece are available for each model – including a bayonet mount with a safety catch for rapid eyepiece change. The ergonomically designed dual focusing system features two wheels for fast focusing and, if required, fine focusing with just one hand. Additional features include rotatable, generously dimensioned tripod bracket extendible sunshade with sight and leakage test and nitrogen filling.

Needless to say, the scopes are all provided with Carl Zeiss multilayer coating on all glass-to-air surfaces for maximum transmission and natural color rendition, and Carl Zeiss P coating on the roof surfaces of the reversal prisms for maximum resolution.

CLEAR. BRIGHT. COLORFUL.

And extremely affordable.

Sight is more than visual. It's something you can feel. The highly successful Conquest Riflescope line allowed thousands of hunters across the nation to feel the thrill of Zeiss quality at a price they could afford. We listened to their comments and are proud to announce the launch of the expanded Conquest Riflescope line to now offer a 50MM series and the launch of the Conquest Binoculars series, both backed by a limited lifetime warranty.

The scopes include a 3-9, 3.5-10 and 4.5-14x50 MM line-up while the binoculars have you covered with an 8x30, 10x30, 12x45 and 15x45.

It's all in knowing what to look for. And to feel for. Dawn comes early at hunting camp and simply being the first in the field isn't good enough anymore. Let Zeiss help you translate all you imagined into all you can see.

Night Vision Riflescopes

ATN's brand of Night Vision Devices are widely recognized as the most innovative and of the highest quality made. They manufacturer the widest selection of NVD's on the market and have a unit to satisfy almost every situation and budget. Choose from an inexpensive 1st generation device all the way up to a top of the line USA 3rd Generation Military Spec. System. They even offer previously unavailable 4th generation. The infra-red illuminator allows use in total darkness! All night vision units come with a 2 year warranty, a Night Vision reference video, and a toll free customer service line. The 2nd, 3rd, and 4th Generation NVDs are made in the USA.

III 3rd Gen, MK7900

3X MK7800c
Defender III Compact
3rd Gen, MK7800c

3X MK330 Warrior 1st Gen MK330..... $479.00
The Aries 330 Warrior is the first of a new line of Night Vision weapon sights produced under the brand name of Black Lion Optics. Affordable, high quality 1st generation weapon sight. Features: new super fast front lens system for optimal brightness, easy push button operation and a reticle brightness adjustment. Also comes with our new detachable, most powerful in the industry 450mw Infrared Illuminator with dedicated windage and elevation adjustments. This new IR lets you see even in total darkness up to 150 yards away! If you are looking for an inexpensive, quality 1st gen. riflescope the Aries 330 Warrior is your scope.

2.5 MK350c Gaurdian Compact 1st Gen MK350c..... $529.00
The Aries 350 Guardian is the most compact 1st gen. weapon sight on the market. Measuring only 8 inches long and weighing less then 2 lbs. the Guardian is one of the most rugged yet compact scopes made. The accuracy on the 350 Guardian is unparalleled thanks to our "Red on Green" reticle system. Windage and elevation adjustments are an amazing 1/8 inch @ 100yards. Combine this accuracy with other features such as a new super fast front lens system for optimal brightness, easy push button operation, reticle brightness adjustment and our new detachable, most powerful in the industry 450mw infrared illuminator and you have one of the best 1st gen. scopes made. If you are looking for a small, lightweight inexpensive night vision weapon sight then the 350 Guardian is the scope for you.

4X MK390 Paladin 1st Gen MK390..... $579.95
We started by improving the optical configurations which lowered the F-stop factor and increased optical resolution. By doing this, more light travels through the lens to the tube. More light and better resolution simply means a brighter and sharper image. Then we added our precision "red on green" aiming system, easy push button operation, reticle brightness adjustment and the new detachable, most powerful in the industry 450mw infrared illuminator with dedicated windage and elevation adjustments. Our new Aries 390 Paladin is the best 1st. generation scope on the market.

3X MK6800c Defender II Compact 2nd Gen, MK6800c $1429.00
The Aries Defender is one of the most compact high-end night vision scopes you will ever find. Utilizing either a top grade US 2nd Gen. light intensifier tube the Defender has an extremely sharp resolution and brightness. This compact marvel is not a stripped down NVD it is full of features such as a new super fast front lens system for optimal brightness, easy push button operation, and a reticle brightness adjustment. Plus, it comes with our new detachable, most powerful in the industry 450mw Infrared Illuminator with dedicated windage and elevation adjustments for total darkness usage. Compact, rugged and highly accurate makes the 6800c Defender the perfect scope for the person on the move.

5X MK6900 Crusader II 2nd Gen. PS, MK6900..... $1595.00
It doesn't get any better then the Aries 6900 Crusader when it comes to performance. For the MK6900 we use a top of the line "Prime Select" US 2nd Gen. light intensifier tube for added light gain and resolution. Combine this select tube with 5x magnification and a super fast F:1.4 lens the image that you will get out of your Crusader is unbelievable. The best optics, tubes and a 3 year warranty makes the Aries 6900 Crusader one of the best night vision weapon sights there is!

3X MK7800c Defender III Compact 3rd Gen, MK7800c..... $1949.00
The Aries Defender is one of the most compact high-end night vision scopes you will ever find. Utilizing a high end US 3rd gen light intensifier tube, the Defender has an extremely sharp resolution and brightness. This compact marvel is not a stripped down NVD it is full of features such as a new super fast front lens system for optimal brightness, easy push button operation, and a reticle brightness adjustment. Plus, it comes with our new detachable, most powerful in the industry 450mw infrared illuminator with dedicated windage and elevation adjustments for total darkness usage. Compact, rugged and highly accurate, the 6800c Defender is the perfect scope for the person on the move.

t

5X MK7900 Crusader III 3rd Gen, MK7900..... $2195.00
An upgrade from the 5X MK6900 model - the MK7900 uses a top of the line "Prime Select" US 3rd Gen.+ light intensifier tube for added light gain and resolution.

3X MK8800c Defender IV Compact 4th Gen, MK8800c..... $4975.00
The Aries Defender is one of the most compact high-end night vision scopes you will ever find. An upgrade from the 3X MK7800c with a high end US 4rd gen light intensifier tube the Defender has an extremely sharp resolution and brighness.

5X MK8900 Crusader IV 4th Gen MK8900..... $5995.00
An upgrade from the 5X MK7900 model, the Aries 8900 Crusader uses a top of the line "Prime Select" US 4th Gen.+ light intensifier tube for added light gain and resolution.

Spotting Scopes, Binoculars and Goggles

1.5X Night Star Super Compact Monocular 1st Gen. Nightstar.....$185.00
Do not let darkness impair your vision for a moment longer. Whether you are camping, boating, observing wildlife or surveying your property for intruders there is always a need to see in the dark. That's why at ATN we are proud to offer the perfect night vision device, the NightStar. Why is it perfect, you might ask? The answer is simple. The NightStar provides the user with superior clarity and a high light gain allowing the customer to see clearly even on the darkest of nights at a minimal cost. The unit comes standard with our Total Darkness Technology that allows you to see even in the darkest of conditions. Get out of the dark and into the light with the NightStar.

3X Night Leopard High Res. Monocular 1ST Gen, NLEP.....$219.00
A new super fast lens system combined with a high resolution 1st Gen. Plus light intensifier tube gives the user an unparalleled bright image in a 1st gen. night vision device. Easy push button controls, 3x magnification and a built-in infra-red illuminator for viewing in total darkness are just a few of the features this scope packs.

3.5X Night Storm Waterproof Monocular 1ST Gen. NSTRM1 .....$249.00
The NightStorm is a rugged hand held spotting scope. Available in 1st and 2nd generation the Night Storm is one of the best monoculars made. Quality is the number one priority in the Night Storm. By using an all glass revolutionary F1.2 lens we are able to achieve an amazing 98.5% light transmission. The result is a unit withthe brightest and sharpest image available. Plus, the Night Storm is 100% waterproof and if dropped in the water it will float for easy recovery. Strict standards and precision manufacturing have brought to you a rugged yet lightweight, waterproof night vision device, which provides superior optical calibration at an economical cost. Comes with 1.5x lens for brighter image and wider field of view.

3.5X NightStorm II Waterproof Monocular 2nd Gen.NSTRM2.....$1195.00

3X Compact Monocular 1st Gen NZT35 .....$169.00
3.1x magnification all glass lens system combined with a high quality 1st generation + light intensifier tube gives you a bright and sharp image in any dark situation you may find yourself in. A free long-range infrared illuminator is also included to let you see even in total darkness.

Night Owl Optics® NIGHT VISION

The Explorer Binocular is a remarkable new night vision device incorporating the very latest advancements and safety features making it an excellent choice for observers who depend on high performance during extended viewing. The NOXB3 gives users a new level of operational reliability with such innovations as a low battery indicator and extended Infrared operation when the battery is loosing power.

3x Explorer Binocular NOXB3 ..... **$499.95**

The compact Night Owl Explorer is one of our best sellers. It features a two-piece, rubber-coated body frame and a camera-quality objective lens magnifying images at 3.1x. The NOCX3 also comes with ergonomically placed operational buttons near the ocular providing easy to use, single-hand operation.

3x Explorer Compact NOCX3..... **$199.95**

The NOCX5 boasts the highest-grade 48 mm camera quality objective lens providing 5x image magnification and unsurpassed resolution for higher quality distant visibility. Precision-engineered to higher specifications, the Explorer ProTM is our top of the line feature-packed full sized night vision monocular.

5x Explorer Pro NOCX5 ..... **$289.95**

Night Owl Optics introduces the All-View Binocular - a technological breakthrough with day and nighttime modes for a complete viewing experience 24 hours a day, anywhere, anytime. The advanced NOAV24/7 features a unique isolator system that safely disengages the two intensifier tubes from the field of view with a toggle switch, allowing you to also use the device as a daylight binocular.
The extra wide optics boast a multi-layered coating for minimal distortion and maximum sun glare filtration in day-light mode. The body is protected with rubberized armor ensuring comfortable handling in rugged conditions. Individual eye-focus provides excellent viewing flexibility while retractable eyecups protect the eyes from distracting light and provide comfortable viewing for eye-glass wearers.7x42 day / 2.4x night Binocular

NOAV24/7..... **$699.95**

The advanced Explorer G2TM represents the cutting edge in night vision, boasting the most technologically advanced night vision intensifier tube of our entire line. Packed with innovative features, it houses a state-of-the-art Generation-2+ intensifier tube with microchannel plate (MCP) for superior brightness allowing for an extraordinary long range of view up to 2,300 feet.

Aimpoint®

Any Other Sight Is Pointless

GGG-1014

For a sight and a gun to function as a reliable unit year after year, it is important that the mounting is done professionally and the mounting rings and bases are of high quality. An important detail that is often overlooked is the fact that the mounts and rings must be precisely aligned for best performance with any optical sight. The new generation of Aimpoint sights incorporates a very generous range of adjustment, which allows the user to compensate for any misalignment between the barrel, action and mounting hardware. Aimpoint mounts, rings and bases provide an excellent foundation for your sight.

Aimpoint Mounts and Accessories

Aimpoint "works", every Aimpoint mount you need to mount your Aimpoint anywhere! Aimpoint Military Quick Release Ring Mount, "Rail Grabber" Aimpoint AR15 Forward Carry Handle Mount, Aimpoint Spacer, Aimpoint 30mm Extra Wide Ring

A.R.M.S. Repeat Zero Guarantee

Why the Repeat Zero Guarantee? The spring loaded cammed lever pulls in a downward force when the lever is pushed inward, which does not disturb the windage (azimuth) normally encountered with thumbnuts, bolts, wrenches, and/or ratchet knobs, all of which only secure with cross force direction and varying non-repeat tension. Because the throw levers pull down instead of across, it means positive controlled attachment not found on any other system. No threads to strip, no cross threading, ratchet wear, over tightening, crushed or dented rails when using the A.R.M.S. spring loaded attachment. A.R.M.S. throw levers will not freeze or absorb sand and mud, like threaded and ratchet designs. The unique force of direction and constant repeat tension guarantee on and off repeatability to a quality standard mil-spec dimensioned dovetail rail.

Badger Ordnance Standard 34mm Rings (Maximized)

34mm. Maximized Scope Ring, Medium High Height 1.00"
These 34mm diameter, high precision, heavy duty steel rings are machined in "Matched Pairs" and serialized. Mounts to any "Weaver style" base. Special made for the 34mm Schmidt and Bender Tactical Scopes.
306-14 ..... **$159.95**

Badger Ordnance Maximized Lugged Scope Rail

Remington Short Action - Bottomed lugged for clip slotted actions only! This "Picatinny" spec. one piece mount is machined from 4142 pre-hardened (28-32Rc) steel. Features a Mil-Std-1913 slot pattern for more mounting options and a 20 MOA forward cant for extended range. Uses Badger's Maximized rings or any "Picatinny" compatible ring. 1/2" longer for night vision options.

Maximized Scope Rail, Short Action, Remington 700
One Piece for Round Rear Bridge Only
306-06UX **$159.95**

Maximized Scope Rail, Short Action, Remington 700
One Piece for Flat Rear Bridge Only
306-06U **$159.95**

Badger Ordnance Maximized Scope Rails

This "Picatinny" spec. one piece mount is machined from 4142 pre-hardened (28-32Rc) steel. Features an integral recoil lug, a Mil-Std-1913 slot pattern for more mounting options and a 20 MOA forward cant for extended range. Uses Badger's Maximized rings or any "Picatinny" compatible ring. All Badger bases have a 20 MOA forward cant, which helps to add range to the scope and allows full advantage of the rifle's range.

Badger Ordnance Max-50 30mm Rings, Extra Wide - 6 screws per ring

30mm. Standard Height .823"
The MAX-50 rings are ONE Inch wide, giving them 60% more holding power than any other ring available. Utilizing 6 #8-40 Torx® screws to distribute the load, providing the maximum amount of holding power while minimizing the chance of damaging the scope. Machined from steel as "matched pairs" and serialized. Mil-Std-1913 compatible (Picatinny optic mount) designed for the demanding .50 BMG round. Works with any "Weaver Style" bases.
306-11 ..... **$149.95**

30mm. High 1.125"
Made for scopes with an objective up to 65 mm. or for applications where the standard Max-50 is not high enough.
306-13 ..... **$149.95**

MAX-50 Ring Reducer
Made specifically for MAX-50 rings, reduces 30mm rings down to 1 inch.

Photo submitted by John Sinz
SWFA Photo Contest Entry
John used: Badger Ordnance Max-50 Rings to mount this Burris Black Diamond on his barrett.

In the early 1990's Badger Ordnance identified the need for quality tactical scope rings and mounts designed to meet the higher demands of the emerging military and law enforcement tactical shooting community. Badger Scope Rings are machined from steel barstock as serialized matched pairs. This assures that both rings are identical and eliminates the damaging effects of mismatched mass produced rings. Maximized rings are designed to fit MIL STD 1913 (also called Picatinny) optical rails and are finished with Mil Spec Black Oxide.

All the hardware on Badger Ordnance rings is made to their specifications including the Torx® screws that hold the scope securely in the rings. MAX-50 Rings are made to the same specifications as the standard rings but are 1 INCH wide! The MAX-50's have 60% more holding power and were designed specifically to tame the recoil of the .50 BMG. Six 8-40 Torx® screws secure each scope cap to the ring. The Maximized series of Scope Rings and Rails are made to the highest tolerances in the industry.

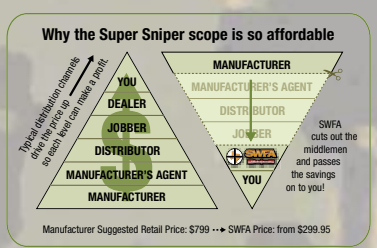
NOTHING COMES CLOSE

*In sub-zero temperatures or searing desert heat (-50° to +130° Fahrenheit, and altitudes of 30,000 feet to depths of 15 feet in salt water) the waterproof, shockproof, fogproof SUPER SNIPER® performs. Whatever the weapon, from .223 to .50 BMG, the SUPER SNIPER® handles the recoil. Whatever the target, the SUPER SNIPER® gives you the best advantage. Made of lightweight aluminum but strong-as-steel, it has superior multi-coated optics for maximum light transmission. Built to **NATO** specs.*

Awarded U.S. Navy Contract

#N00164-93-C-205



TESTIMONIALS

"After reading several articles about the Super Sniper scope I decided I would give it a try. The only thing I can say is - I am VERY glad I did. I am a NYC Correction Officer assigned to the Emergency Service Unit, and I am a NYPD/MPTC certified firearms instructor. Last week I attended the New York Police Olympics in Albany NY. This is the first year that a sniper event was included. I usually go up and compete in the handgun events, but this year I felt I had to try the sniper event. I am happy to say that I used the Super Sniper scope I ordered from SWFA, and I was able to out shoot 28 other shooters and win the gold medal in this event. I want to thank you for making this product available. Once again thank you for your A+ products and service.

John Hernandez, NYPD"

Burris Standard Rings

Burris rings and bases have long been favorites of custom gunmakers because of their strength, beauty and fit. It's easy to recognize Burris' leadership role in scope mounting systems when you consider the myriad of innovative designs and manufacturing processes they have devised that result in rock-solid performance. Each ring is made from a solid piece of steel with the top and bottom half perfectly mated. Zee rings with no moving parts are the best fitting and most positive gripping Weaver-style ring made. Signature rings are the most significant technological advancement in scope mounting history.

Burris Signature Rings

Signature rings are for the shooter who demands the best performance from his equipment and is a practical thinker. The benefits of this revolutionary design are many. Consistent accuracy. Tremendous gripping power. Scratch-free and stress-free mounting. Scope value preservation. By putting a synthetic pivoting insert within a steel outer ring, your scope-to-ring surface area contact becomes virtually 100%.

BURRIS SAVVY OPTICS.

A single set of bases allows any height or color of universal-style Standard or Signature Rings to be used on Tikka bolt action rifles.

Tikka Base

Burris went the extra mile for these special rifles. Featuring an attractive and unique custom-look sculpted design to complement the grace and prestige of these fine rifles.

Kimber Base

Burris 1 Inch Signature Pos-Align Offset Ring Inserts

Signature Rings also accept Pos-Align Offset Inserts so you can virtually sight-in your gun without moving the scope adjustments. Lens systems perform at their optimum when all lenses are optically centered. By keeping the internal optics centered, you'll see through the scope all of the clarity, sharpness, and brightness that the optics designers intended for you to see. The offset inserts also correct for any misalignment caused by receiver holes drilled off center, or the bases or rings being slightly off perfect center. And for you 1000 yard and other long range shooters, the need for expensive tapered bases or shimming becomes a hassle and expense of the past.

* Requires low rear ring and medium front ring.

Ring Codes
SL = Super Low Ring
L = Low Ring
= Medium Ring
= High Ring
XH = Extra High Ring
F = Front Ring
R= Rear Ring
MXX = Medium Extension Front & Rear
X = Extended Ring
* = Low rings can be used on non-posi-lock model
Example MXF = Medium Extension Front

Base Codes
SU = Supreme Universal Base (dovetail front, windage adjustable rear)
M LU = Long Eye Relief Base (dovetail front, windage adjustable rear)
H EXT = Extension Front Base (1" longer than standard, reversible)
DD = Double Dovetail (dovetail front and rear)
TU = Trumount Universal Base (dovetail front, windage adjustable rear)
LA = Long Action SA = Short Action LH = Left Hand

Notes:
Some rifles with heavy/varmint barrels may require one size higher rings. Fits will vary depending on gun modifications and shooting posture. All Posi-Lock models require medium rings instead of low rings on all one-piece bases.

80043 ..... $24.95

Tini Bikini Bikini scope cover with a waterproof fit for your shorter pistol, shotgun and red dot scopes.
TINI BIKINI $5.95

Experienced hunters are aware that fatigue plays a major role in missed or poorly placed shots. Now, the Butler Creek Sling solves this problem. The sling's special shock absorbing feature reduces "felt weight" that makes your shoulder and neck tire. Plus, it molds around the shooter's forearm to stabilize barrel weave. Features of these very affordable slings include four shell loops, quick adjustment, and quiet, non-slip grippers.

80038 80013

80037

ELCAN Optical Technologies

All Elcan Mount assemblies attach directly to MIL-STD-1913 rails or receivers. The mount incorporates generous elevation and azimuth adjustment and is produced in ballistic calibrations for 5.56 NATO, 7.62 NATO, and .50 BMG. Elcan mount assemblies, when installed on a weapon sight, are designed to withstand a drop of 1.5 meters onto concrete while attached to an 8kg weapon.

ELCAN Mounts and Accessories

Easily and quickly convert your existing ELCAN to fit any .223, .308 or .50 BMG rifle by purchasing additional "quick change" mounts with built in bullet drop compensation.

Mount Assembly for .223
ELC223MT **$229.95**

Mount Assembly for .308
ELC308MT **$279.95**

Mount Assembly for .50 BMG
ELC50BMG **$299.95**

Mossberg 590 Shotgun Saddle Mount 9-BSQ-46585

M16/AR15 Adjustable Cantilever Mount 9-BC-CAM

MP5 Low Profile Mount 9-BT-21262

EOTech Mounts

M16/AR15 Adjustable Cantilever Mount (fits all known variants)
Operator maintains a cheekweld position. The mounting system allows you to adjust the height of the optic to the proper level for co-witnessing with your iron sights. Iron sight axis typically positioned in lower 25% of the sight's heads-up display window.
9-BC-CAM **$129.95**

M16/AR15 Cantilever Mount Sight co-witnesses front and rear iron sights. Operator maintains a cheekweld position. Iron sight axis typically positioned in lower 25% of the sight's heads-up display window. Cantilever mount attaches with finger operated nut to carry handle. The mount is machined from 7075 aluminum with an anodized, flat black finish.
9MWGSAM3AH **$119.95**

M16/AR15 Carryhandle Mount with access to iron sights
9-ARMS2-EXT **$89.95**

M16/AR15 Mount with access to iron sights (extended version for Night Vision Device) Sight is positioned on top of carry handle, providing unlimited field of view. Can be used with night vision goggles or gas mask peripherals. User maintains access to iron sights. Meets MIL Spec 1913.
9ARMS2 ..... **$99.95**

MP5 Low Profile Mount supporting Night Vision Device and EOTech Tandem (no access to iron sights) Sight is mounted in a low profile position off upper receiver for Heckler & Koch assault rifles. Operator maintains a cheekweld position. Designed to fit all variations of MP5 as well as the HK91/93/94. Mounting system is an erector-based kit that locks solidly to the upper receiver within minutes. When the sight is not mounted, the user maintains access to the iron sights.
9-BT-21262 ..... **$109.95**

MP5 Mid Range Profile Mount with Extended Rail for Night Vision Device (access to iron sights) (also fits 91, 93, 94)
9-BT-21256 ..... **$109.95**

LEUPOLD®

AMERICA'S OPTICS AUTHORITY™

Why invest in a Leupold Riflescope and then attach it to your rifle with a sub-standard mount?

Leupold's American-made mounting systems are as rugged and reliable as the Leupold riflescopes they're intended to secure. No matter which mount you choose, you can count on it for rock-solid dependability and repeatable accuracy.

STD Rings

STD Extension Rings

STD One Piece Base

Leupold STD Rings

STD Rings are designed to match up with STD 1-Piece and 2-Piece Bases. We offer five different ring heights, though most shooters wisely opt for rings that position the scope as low as possible.

Leupold STD 1" Rings

Leupold STD One Piece Bases

STD Mounts, constructed of machined steel, are versatile and available for many different rifles. They are engineered to match up with STD rings. The forward part of the base accepts a dovetail ring, locking it solidly into position. The rear ring is secured by windage adjustment screws. Long Range STD mounts provide 1/4 degree of built-in elevation, compensating for bullet drop at extreme ranges.

Leupold Rifleman Mounts and Rings

Leupold Rifleman aluminum scope mounts are precision-machined from aircraft-grade aluminum to provide the necessary strength and recoil resistance, while not adding excess weight to the rifle.

- Black matte or silver finish
- Bases for many popular rifle models available
- Detachable medium and high rings
- Vertical split rings
- Detachable see-thru rings
- Integral see-thru mount systems
- Affordable, just like the Rifleman riflescope.

Quick Release Rings

Quick Release Two Piece Base

Quick Release One Piece Base

Leupold Quick Release Rings

Quick Release Rings allow shooters to remove and reattach a scope using Leupold's QR Mounts and still return to within half an inch of the original point-of-impact on the target. Proven in extensive testing, the key to the Quick Release's reliability is the super-close machining tolerances at the heart of the patented lever mechanism. All you have to do is turn the lever forward and an eccentric on the lever shaft engages the base of the ring, pulling it down and forward on the base, locking it solidly into its "zero" position.

Cross Slot Rings

QRW Two Piece Base

QRW Rings

Dual Dovetail Rings

Leupold QRW / PRW Bases

Leupold offers a complete line of steel cross-slot mounts—the Leupold QRW™ and PRW mounts. Use the QRW mounts for detachable accuracy. They use an adjustable lever mechanism to lock the rings securely to the base. When mounted, simply rotate the spring loaded levers into the desired position to keep them out of the way. Use the PRW mounts when a cross-slot format is desired or necessary but detachability isn't. Leupold PRW rings secure directly to the base with two screws for rock solid dependability.

Leupold Mark 4 Mounting System

LEU52136

Leupold's steel construction American-made Mark 4 mounting systems are engineered to be as rugged and reliable as the Leupold Mark 4 scopes they're intended to secure. These mounts employ a slot and spline design, and come in one piece and two piece configurations. Mark 4 bases accept Mark 4 rings, cross-slot rings, and QRW/PRW rings. The AR15/M16 model is specifically designed for use with handle mounting configurations.

Leupold Gunmakers Bases

Leupold Gunmaker bases are intended for those who embrace the philosophy of one hundred percent customization. With these unique bases, you get the freedom to tailor your scope mounting system to specific configurations. There are no pre-drilled holes or fluting, which affords you the freedom to custom drill holes, cut to length, cut flutes, and cut a specific radius.

Leupold Ringmounts

Leupold ringmounts mean superior integrity and tighter tolerances because they're machined from solid stock. Use them as a high-quality alternative to ringmounts sold by firearms manufacturers and as a no-tap mounting method for most .22 rimfire rifles with an 11mm, 13mm or 3/8" dovetail rail.

Put your rifle, shotgun, or pistol "on the paper" fast with the Leupold magnetic boresighter. You can even use this revolutionary boresighter to recheck your zero quickly, anywhere, anytime. It's easy to use, fits all rifles, pistols or shotguns, and works with any optical sight. The magnetic boresighter requires no barrel spuds or batteries, and it fits in a shirt pocket so you can take it anywhere. Great for the workbench, at the range, or in the field!

Magnetic Boresighter LEU53500

Keep critical, custom ballistics data where you can access it from any shooting position. Attaches to your scope's maintube (1" or 30mm) for instant access, and the durable metal tape with your ballistics data automatically retracts after use.

Mildot Master

The Mildot Master® is an analog calculator designed for performing the following operations: Rapid calculation of range to target, based on a measurement of the target with a mildot reticle. Simple calculation of the amount of sight correction necessary to compensate for bullet drop and/or wind drift for a given range. Additionally, angle of fire for uphill or downhill shots can be accurately measured, and the up/down compensation can be closely calculated to reduce errors.

SPRINGFIELD ARMORY USA.

Springfield Armory Accessories

These advanced scope mounts are as rugged as a blacksmith's anvil. Strong, durable mounts quickly attach in seconds with two massive screws to the M1A receiver. The design assures positive zero-retention, even when the mount is removed and replaced countless times. The tough Third Generation mount also allows the use of the M1A's standard iron sights. Accepts both Picatinny and Weaver style rings.

Talley Manufacturing Inc.

Lightweight Aluminum and Fixed Scope Rings

Talley Lightweight One-Piece Aluminum Scope Mounts

The one-piece construction of the Tally Lightweight Aluminum Scope Mount is unique. The rigid design has no joint between the scope and the rifle. The Tally Lightweight unitized design eliminates the possibility of an "out of alignment" interface or "loose connection" between the ring and base of traditional two-piece designs. Ultimately this provides more strength and durability than rival steel rings and bases, accomplished with a lighter overall weight. By extruding the 7000 series aluminum known for its durability and then precision CNC machining the mount to its final design we can provide you with the strongest, lightest mount system on the market. These mounts are for scopes with one inch tubes.

Talley Standard Two Piece Bases

Talley Bases are machined from solid bar stock with a double recoil shoulder design that holds your scope with absolute rigidity under severe recoil. Bases checked and rechecked prior to shipping to ensure the best fit possible to your firearm. Talley only makes one base and it fits both fixed rings or Quick-Detachable rings.

Winchester Model 70 Pre-64 L/A Magnum Calibers 435, rear whole spacing 252704 ..... $19.95
Winchester Model 70 Post-64 L/A Magnum Calibers .330, rear whole spacing 252701 ..... $19.95
Winchester Model 70 Standard Calibers Including Short Mags .860, rear whole spacing 252702 ..... $19.95
Rem Model 700 All Calibers 252700 ..... $19.95
Wby Mark V Magnum Calibers 252705 ..... $19.95
Wby Light Weight 252706 ..... $19.95
Browning A-Bolt and Steyr SBS 252000 ..... $19.95

Standard One Piece Bases

TC Contender 252723 ..... $34.95

Talley Standard Fixed Rings

The Fixed Ring is for the shooter who prefers the sleek profile of a non-detachable vertically split ring. Using larger screws and no moving parts, this system is extremely rigid. Double recoil shoulder ring base will stand up to any and all magnum calibers.

1" Low Standard Rings 100003 ..... $59.95
1" Medium Standard Rings 100004 ..... $59.95
1" High Standard Rings 100005 ..... $59.95
30mm Low Standard Rings 300003 ..... $59.95
30mm Medium Standard Rings 300004 $59.95
30mm High Standard Rings 300005 ..... $59.95

Talley Screw Lock Quick Release Detachable Rings (QD) w/Torx Screw

Talley's Quick-Detachable Rings are famous for precise tolerances. QD ring system provides repeatability, flexibility, strength, and durability for the most discriminating of sportsmen. Repeatability allows you to remove and replace your scope with the confidence that it will return to zero. Flexibility allows you to carry more than one pre-sighted scope for your firearm, and also provides ease of removal for your scopes during travel. The Talley Quick-Detachable System is as strong or stronger than any fixed system available. Guaranteed. Talley Quick-Detachable Rings are very simple. Talley mounts lock up as solidly as a fixed system. The screw-lock detachable system will hold your scope firmly under the toughest of conditions and maintain its zero every time you replace it. All Screw Lock QD rings can be easily converted into a "throw lever" design by purchasing the optional levers.

Ring Height Selection Guide:

Low for scopes up to 44 mm objective with standard barrel contour.

Medium for scopes up to 50 mm objective with standard barrel contour.

High Ring for scopes with a 56 mm objective with standard barrel contour.

1" Low QD Rings w/Torx 200003 ..... $74.95
1" Medium QD Rings w/Torx 200004 ..... $99.95
1" High QD Rings w/Torx 200005 ..... $74.95
30mm Low QD Rings w/Torx 400003 ..... $74.95
30mm Medium QD Rings w/Torx 400004 ..... $74.95
30mm High QD Rings w/Torx 400005 ..... $74.95
QD Lever for all Screw Lock QD rings Lever $19.95
Steyr Scout Integral Rings, 1" Medium Height Rings 700004 ..... $99.95

Vero Vellini Bino Straps and Rifle Slings

Vero Vellini Rifle Sling - One inch width to fit on any 1" swivels. Available in black, forest green, brown, and safety orange. All are handsomely accented with brown leather end panels.

Wide-Top Rifle Slings - Our Wide-Top slings extend to a width of 3.5" at the shoulder area for even more comfort and sure grip. All of our Realtree and Advantage pattern slings are made with 1000 denier Cordura backing. The Cordura® backing is thornproof and moisture resistant. Edging on the sides of the sling adds styling and prevent excessive stretch and fraying.

Zeiss TripleXXX Monoculars

This practical monocular converts Zeiss Victory full size binoculars into spotting scopes. By simply attaching this 1.9 oz. gem to the binocular, it triples the magnification. Zeiss precision design assures perfect alignment of the optical channels, so you needn't worry about strain or fatigue. The TripleXXX is one of the smartest, most reasonably priced accessories available. And for the record, it excels on its own as a fantastic 3x monocular, or as a 5x magnifier for close work.
